

Uploaded the Resumes - Using ICEPOT Prompt - Batch Ingestion

Added Resumes to the workspace

Provided the prompt in chat

Batch Ingestion — Phase Plan

Phase	What	Routes Added
Phase 1	Folder Discovery & Configuration	GET /v1/batch/discover
Phase 2	DOCX Text Extraction Support	extends existing /v1/resume/extract
Phase 3	Batch Job Engine (async processing)	POST /v1/batch/ingest, GET /v1/batch/status/:jobId
Phase 4	Execution Logs & Validation Report	GET /v1/batch/report/:jobId

Phase 1 is completed - Folder Discovery & Configuration

The screenshot shows a VS Code workspace with the following components:

- EXPLORER:** A file tree showing the project structure, including folders like `ai_resume_rag`, `dist`, `node_modules`, `src`, `uploads`, and files like `.env`, `.env.example`, `.gitignore`, `Architecture.md`, `BM25_SEARCH_FIX.md`, `package-lock.json`, `package.json`, `README.md`, `Resume_Ingestion_Architecture_Phasewise.md`, `tsconfig.json`, and `Resumes`.
- .env file:** A configuration file with the following content:

```
ai_resume_rag > .env
18 GROQ_API_KEY=gsk_jWQz6BypfInzjEuh0HxkkWgdyb3FYT
19 GROQ_LLM_MODEL=meta-llama/llama-4-scout-17b-16
20
21 # Search Configuration
22 DEFAULT_TOP_K=10
23 RERANK_TOP_K=8
24 MAX_PAYLOAD_SIZE=1048576
25 REQUEST_TIMEOUT_MS=5000
26
27 # Logging
28 LOG_LEVEL=info
29
30 # Resume Ingestion
31 USE_LLM_PARSER=true
32 MISTRAL_EMBED_MODEL=mistral-embed
33 EMBEDDING_DIMENSION=1024
34
35 # Batch Ingestion
36 RESUME_FOLDER=C:\Users\hp\Downloads\Order of Application flow\Ingestion Documents\Resumes
37 BATCH_SIZE=5
38
```
- Resume Batch Ingestion Workflow Generator:** A web interface with the following sections:
 - Phase 1 is complete.** Nodemon will auto-restart the server now.
 - Phase 1 Validation Steps**
 - Test 1 — Discover all resumes with default folder**
 - Postman:** A GET request to `http://localhost:3000/v1/batch/discover` with the response:

```
{
  "message": "Resume folder scanned successfully",
  "folderPath": "C:\\Users\\hp\\Downloads\\Order of Application flow\\Ingestion Documents\\Resumes",
  "totalFound": 103,
  "byFormat": {
    "pdf": 85,
    "docx": 18,
    "txt": 0
  },
  "batchSize": 5,
  "totalBatches": 40,
  "files": [
    {
      "fileName": "Abish - Marketing (1) (1).pdf",
      "format": "pdf",
      "sizeBytes": 110565
    }
  ]
}
```

(Test 1 — Discover all resumes with default folder)

Validating in PostMan

The screenshot shows the Postman interface with the following details:

- Request:** A GET request to `http://localhost:3000/v1/batch/discover`.
- Response:** A 200 OK response with a JSON body:

```
{
  "message": "Resume folder scanned successfully",
  "folderPath": "C:\\Users\\hp\\Downloads\\Order of Application flow\\Ingestion Documents\\Resumes",
  "totalFound": 198,
  "byFormat": {
    "pdf": 100,
    "docx": 10,
    "txt": 0
  },
  "batchSize": 5,
  "totalBatches": 40,
  "files": [
    {
      "fileName": "Abish - Marketing (1) (1).pdf",
      "format": "pdf",
      "sizeBytes": 110565
    }
  ]
}
```

Test 2 — Override folder via query param

The screenshot shows a REST client interface with a workspace named "My Workspace". The left sidebar lists collections, including "Resume Ingestion" and "Phase 1 - Test 2 — Override folder via query param". The main panel displays a GET request to `http://localhost:3000/v1/batch/discover?folder=C:\Users\hp\Downloads`. The response is a 200 OK status with a JSON body containing details about the folder discovery.

Query Params

Key	Value	Description
folder	C:\Users\hp\Downloads	

Body

```
1 {
2   "message": "Resume folder scanned successfully",
3   "folderPath": "C:\\Users\\hp\\Downloads",
4   "totalFound": 5,
5   "byFormat": {
6     "pdf": 0,
7     "docx": 0,
8     "txt": 5
9   },
10  "batchSize": 5,
11  "totalBatches": 1,
12  "files": [
13    {
14      "fileName": "BM25_index.txt",
15      "format": "txt",
16      "sizeBytes": 2074
17    }
18  ]
19 }
```

Test 3 — Invalid folder path

The screenshot shows the same REST client interface, but with a GET request to `http://localhost:3000/v1/batch/discover?folder=C:\\nonexistent\\path`. The response is a 500 Internal Server Error with a JSON body indicating that the folder was not found.

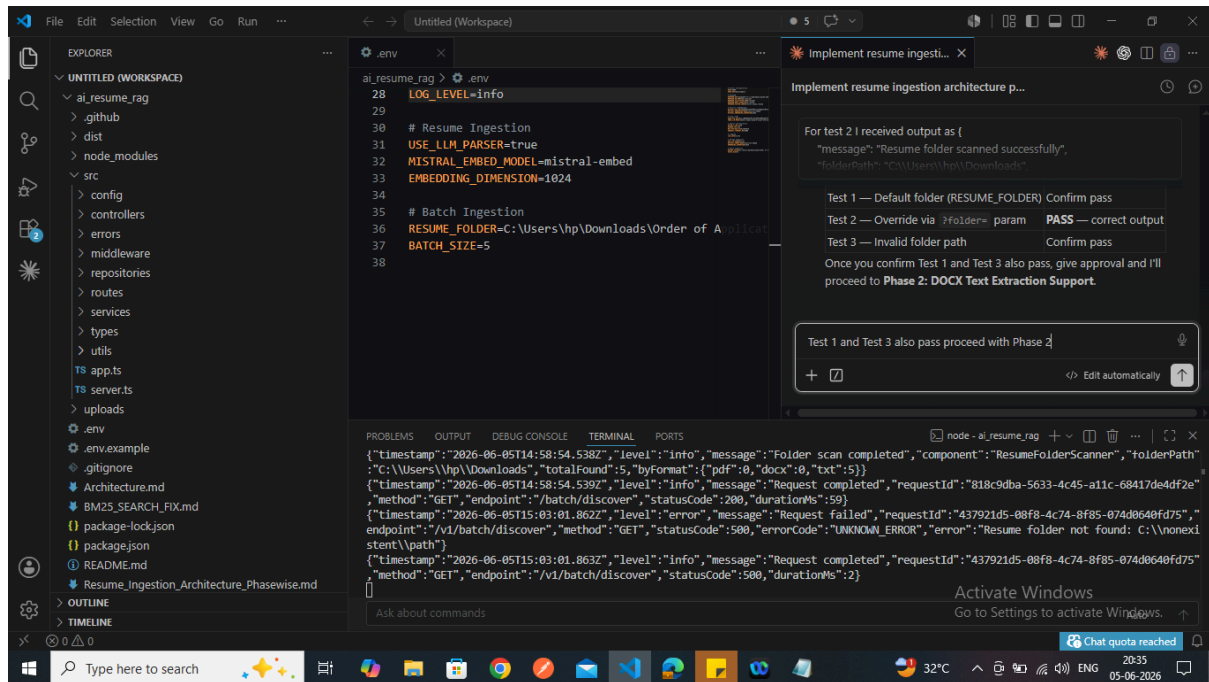

Query Params

Key	Value	Description
folder	C:\\nonexistent\\path	

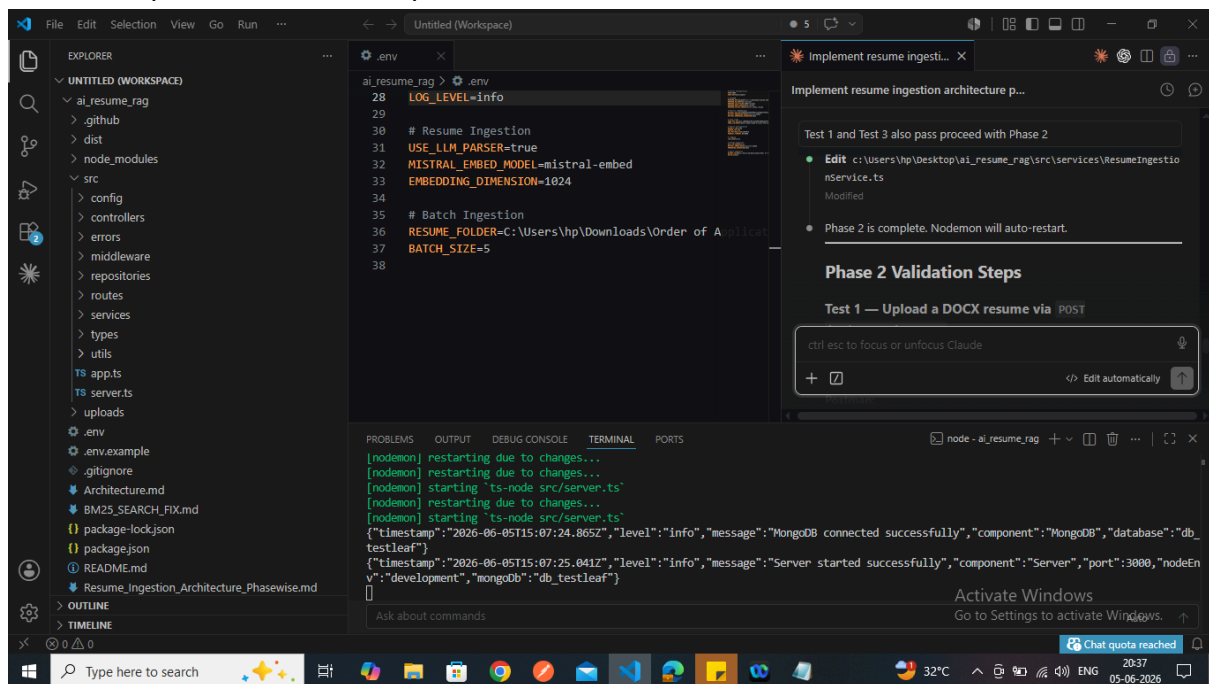

Body

```
1 {
2   "requestId": "437921d5-98f8-4c74-8f85-074d9640fd75",
3   "error": {
4     "code": "UNKNOWN_ERROR",
5     "message": "Resume folder not found: C:\\nonexistent\\path"
6   },
7   "timestamp": "2026-06-05T15:03:01.062Z"
8 }
```

Proceeding to Phase 2: DOCX Text Extraction Support.

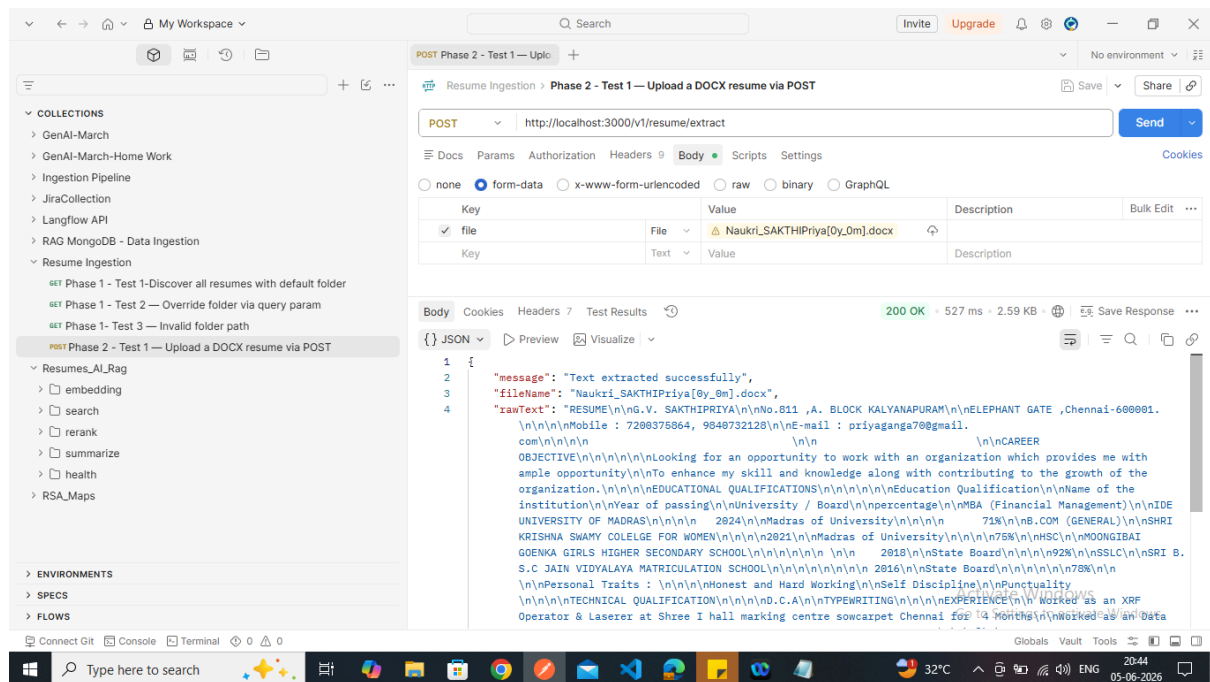

Phase 2 implementation is completed

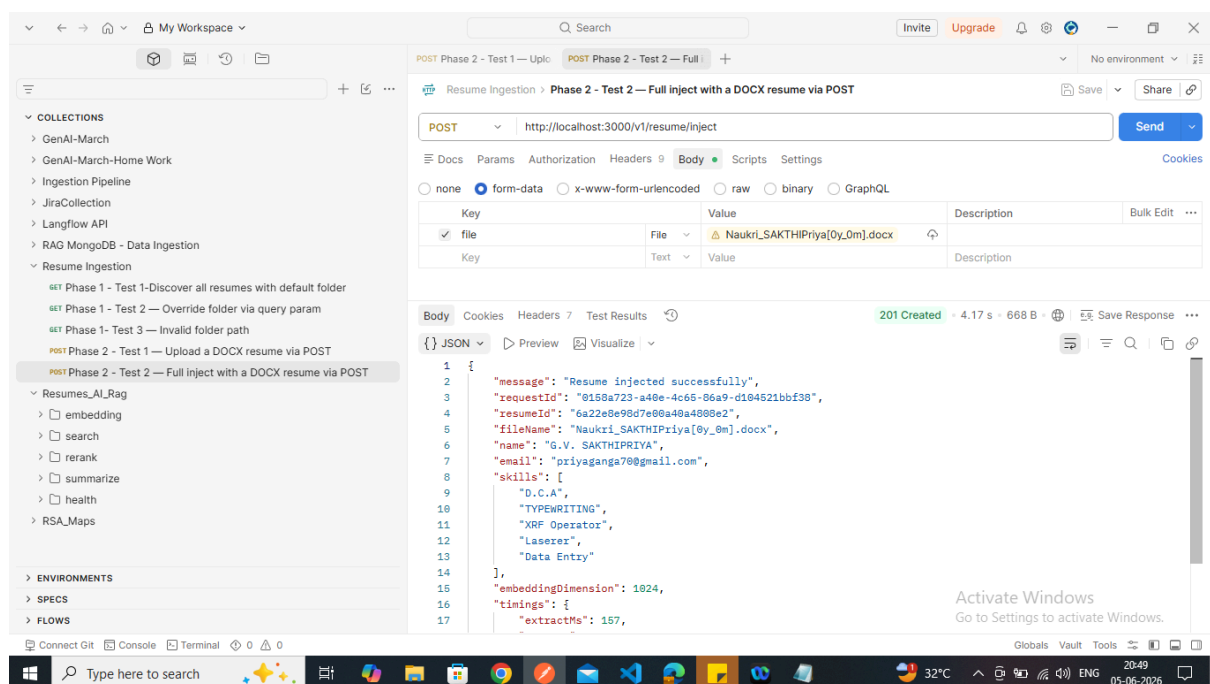

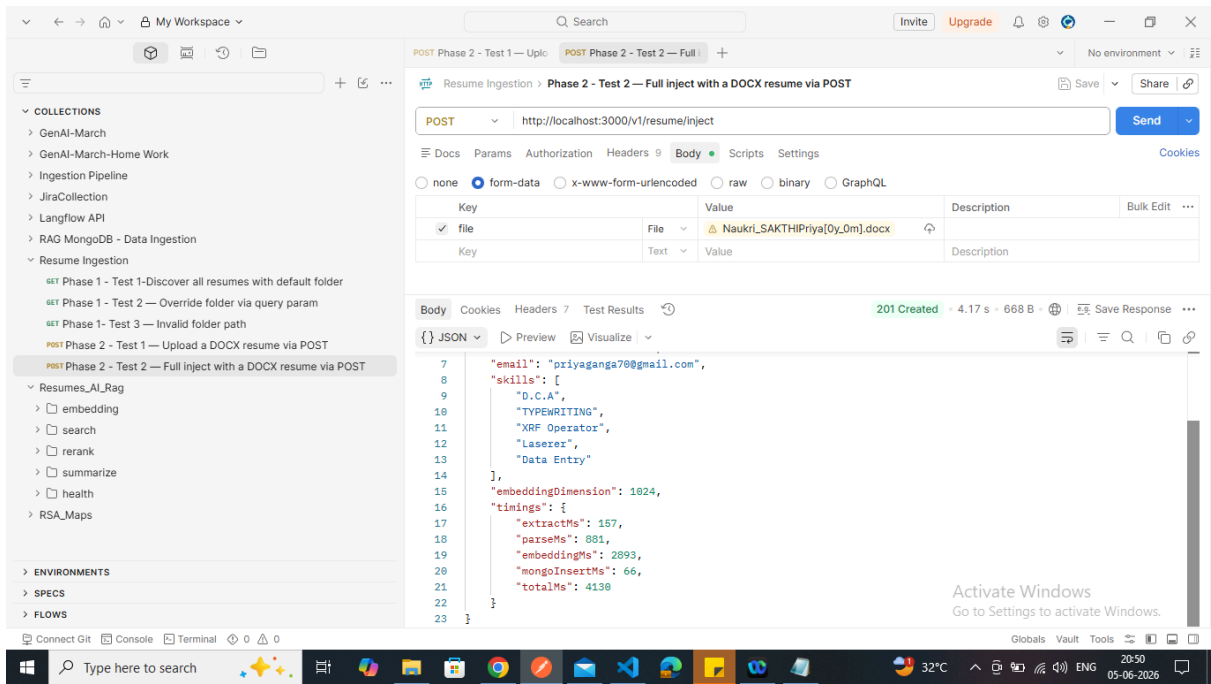

Validating them in PostMan

Test 1 — Upload a DOCX resume via POST /v1/resume/extract

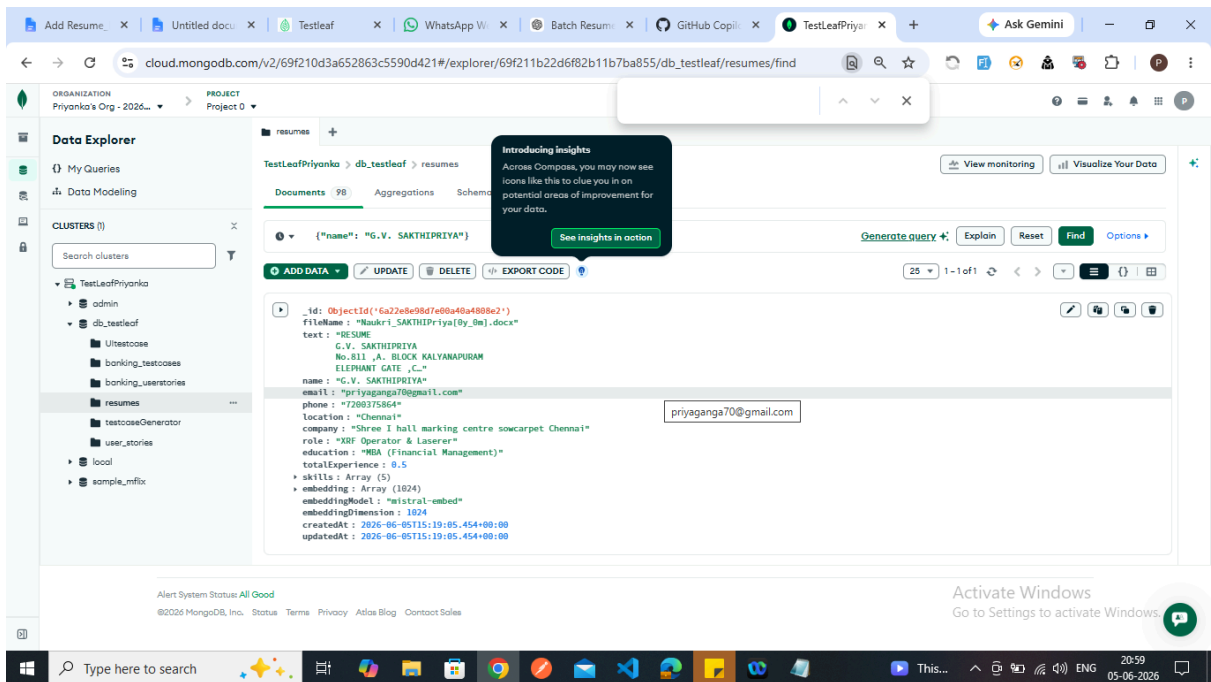

Validating Phase 2 - Test 2 — Full inject with a DOCX resume via POST in PostMan

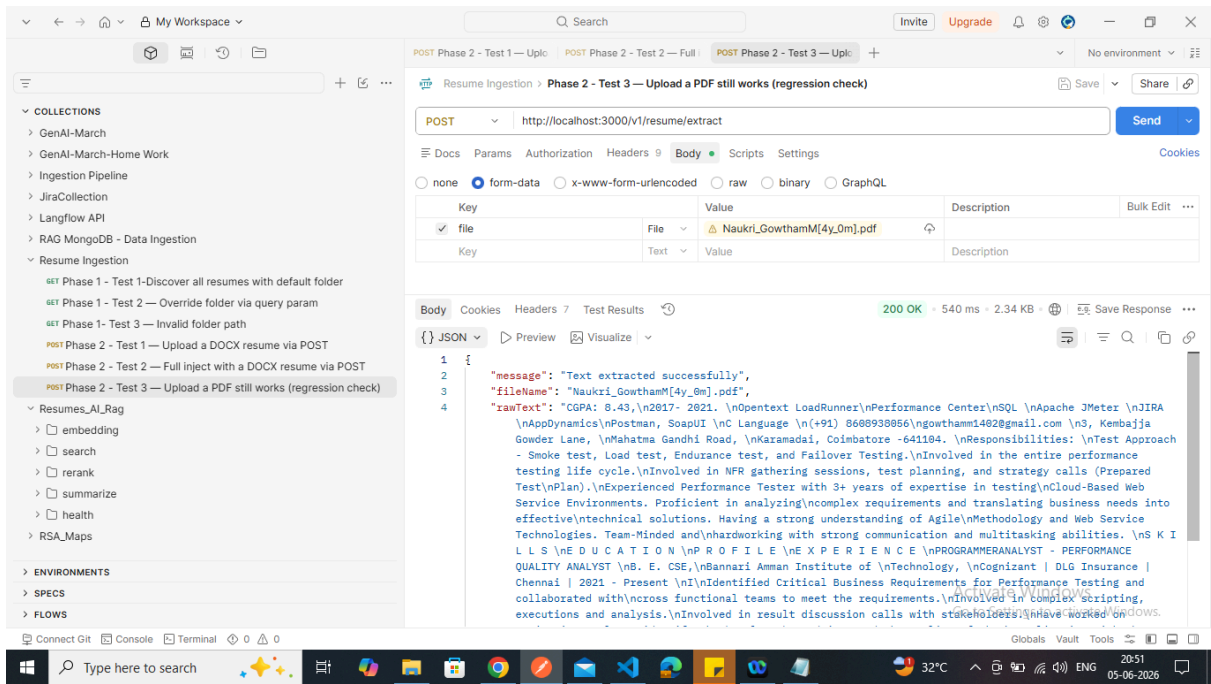

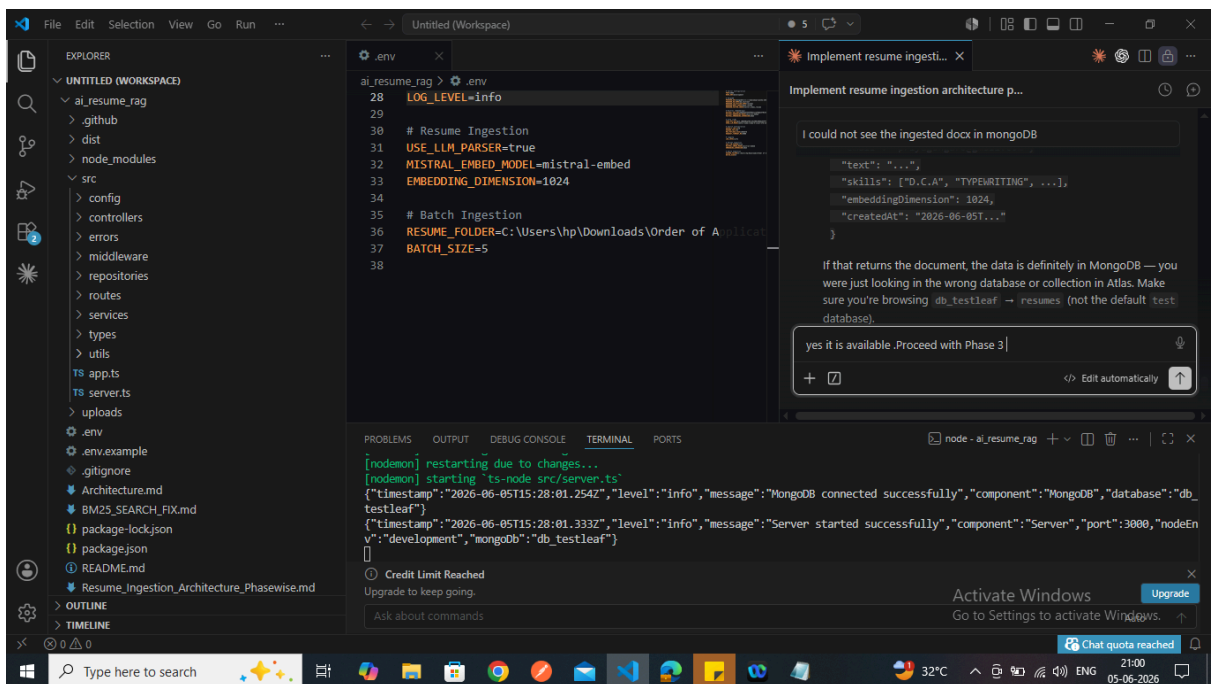

.docx data is ingested and available in mongoDB

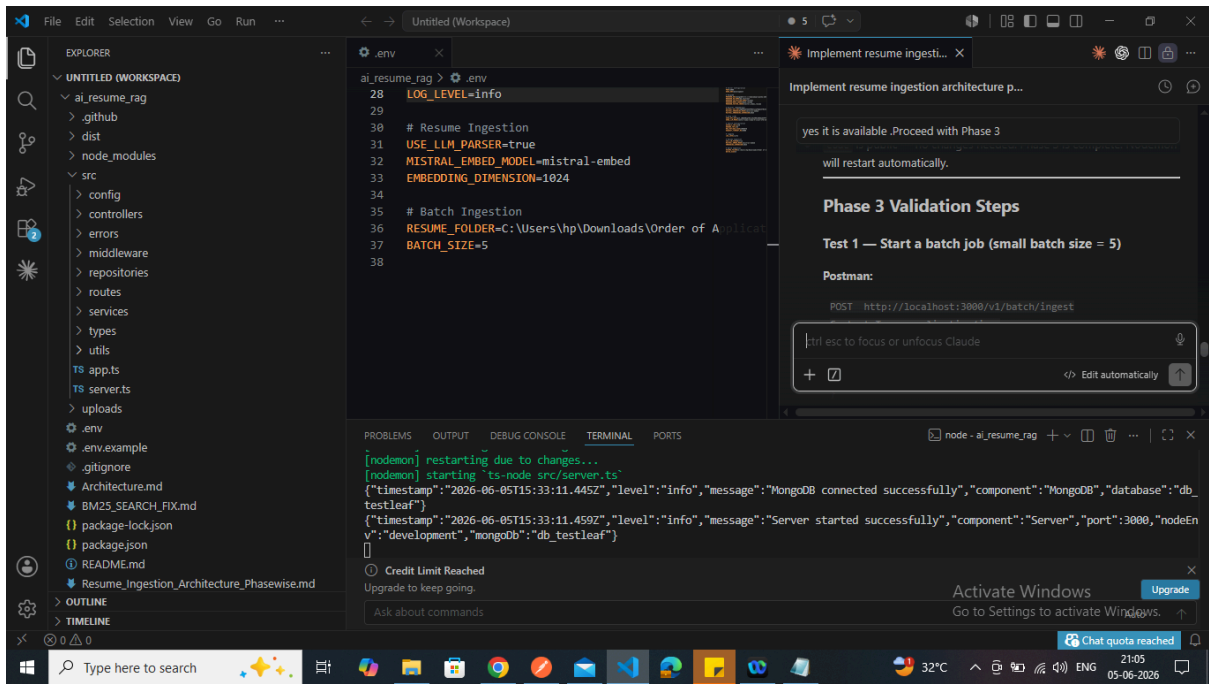

Phase 2 - Test 3 — Upload a PDF still works (regression check)

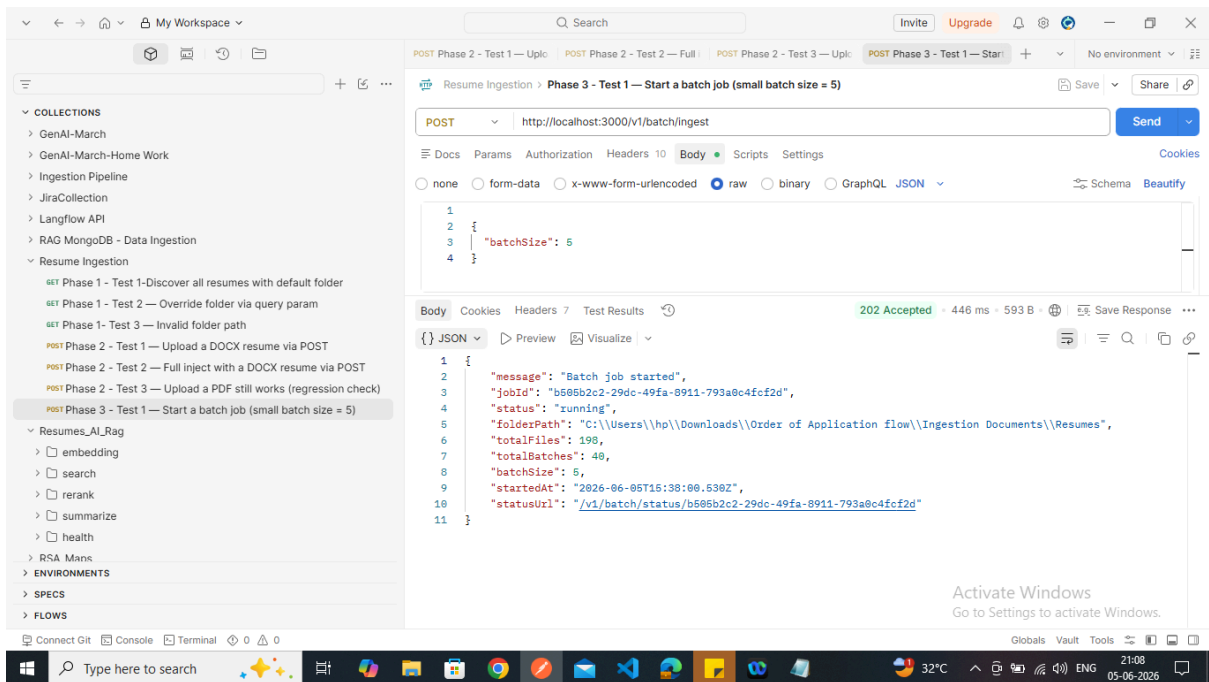

Proceeding to Phase 3 - Batch Job Engine

Phase 3 completed

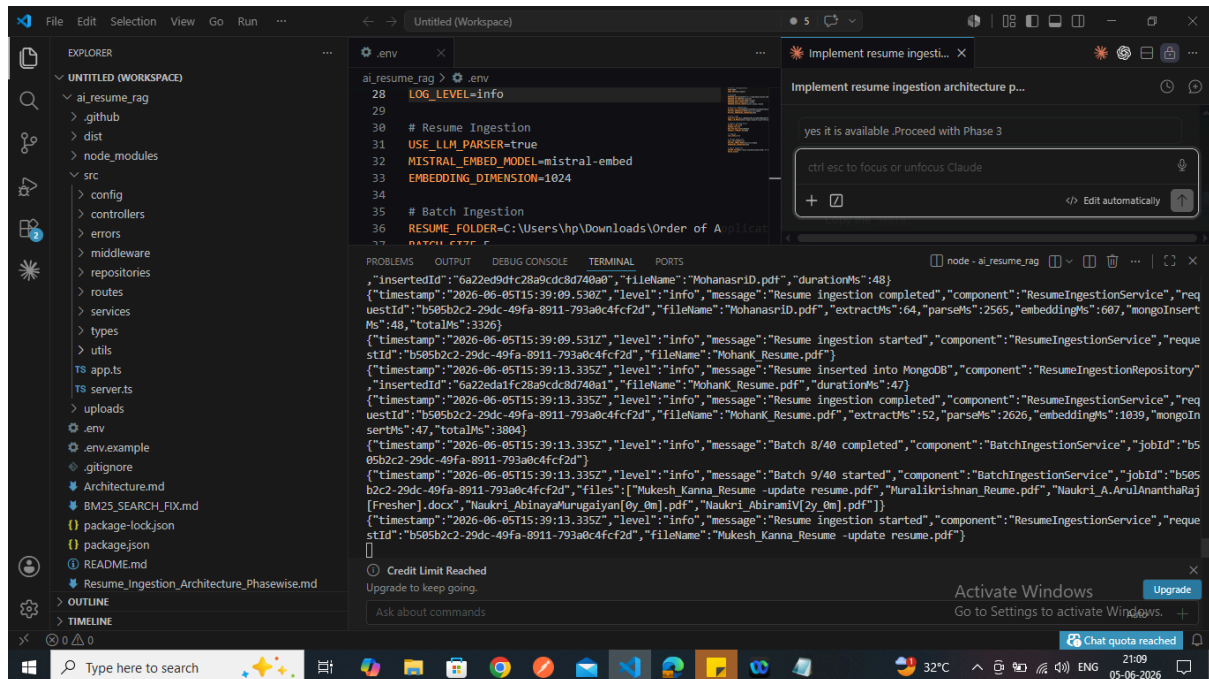

Validating Test 1 — Start a batch job (small batch size = 5)

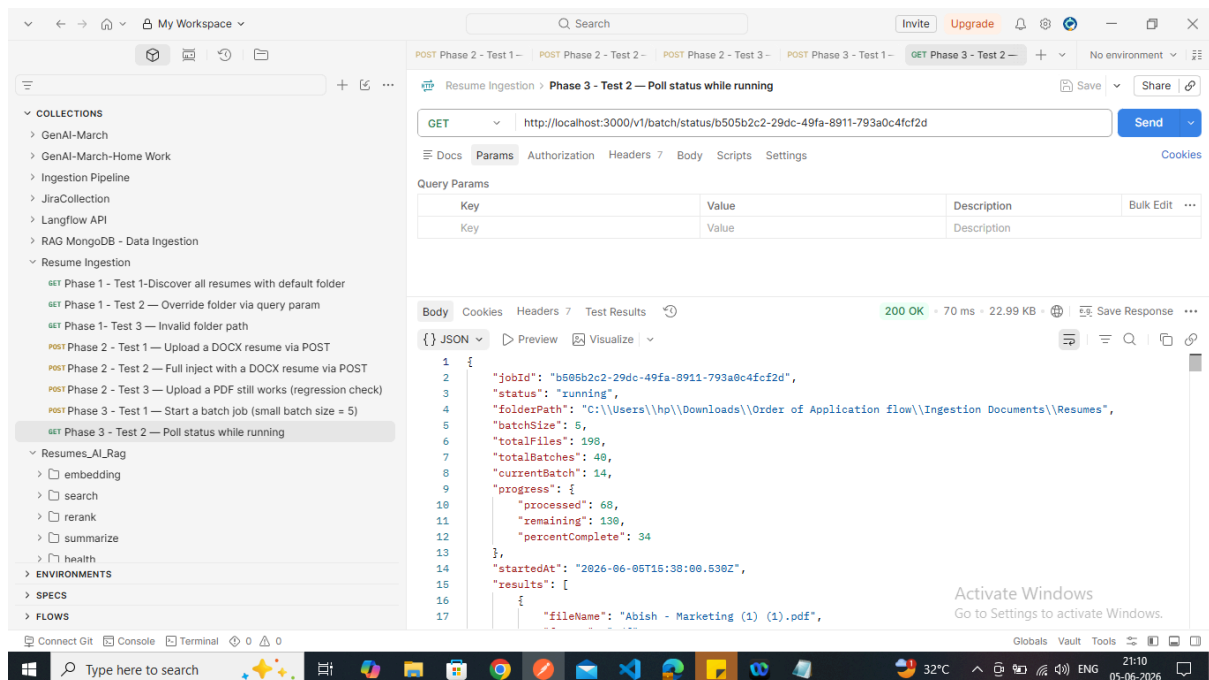

"jobId": "b505b2c2-29dc-49fa-8911-793a0c4fcf2d",

Implementing Phase 4 - Execution Log and Validating Report

Phase 4 implementation is completed

Validating Test 1 — Start a fresh batch and get report while running

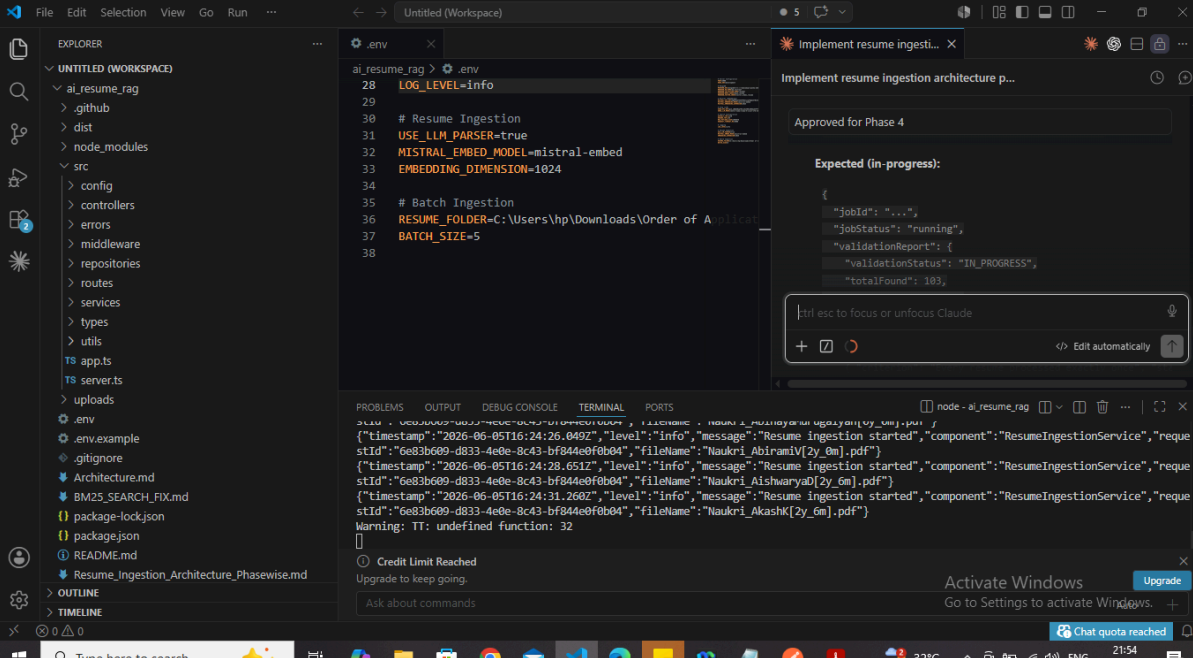

The screenshot shows a REST client interface with a workspace titled "My Workspace". The left sidebar lists collections, including "Resume Ingestion" and "Resumes_AI_Rag". The main panel shows a POST request to `http://localhost:3000/v1/batch/ingest` with a JSON body: `{ "batchSize": 10 }`. The response is a JSON object with the following fields: `message`, `jobId`, `status`, `folderPath`, `totalFiles`, `totalBatches`, `batchSize`, `startedAt`, and `statusUrl`. The response status is "202 Accepted" with a response time of 748 ms and a body size of 594 B.

```
{ 1 { 2 "message": "Batch job started", 3 "jobId": "6e83b609-d833-4e0e-8c43-bf844e0f0b04", 4 "status": "running", 5 "folderPath": "C:\\Users\\hp\\Downloads\\Order of Application flow\\Ingestion Documents\\Resumes", 6 "totalFiles": 198, 7 "totalBatches": 20, 8 "batchSize": 10, 9 "startedAt": "2026-06-05T16:23:14.924Z", 10 "statusUrl": "/v1/batch/status/6e83b609-d833-4e0e-8c43-bf844e0f0b04" 11 }
```

"jobId": "6e83b609-d833-4e0e-8c43-bf844e0f0b04",

Files are ingesting as batch

The screenshot shows a VS Code editor with a workspace titled "Untitled (Workspace)". The left sidebar shows the Explorer view with a file tree. The main panel shows a `.env` file with the following configuration:

```
28 LOG_LEVEL=info
29
30 # Resume Ingestion
31 USE_LLM_PARSER=true
32 MISTRAL_EMBED_MODEL=mistral-embed
33 EMBEDDING_DIMENSION=1024
34
35 # Batch Ingestion
36 RESUME_FOLDER=C:\\Users\\hp\\Downloads\\Order of Application flow\\Ingestion Documents\\Resumes
37 BATCH_SIZE=5
38
```

The terminal shows the following logs:

```
2026-06-05T16:24:26.049Z [info] message: Resume ingestion started, component: ResumeIngestionService, requestId: 6e83b609-d833-4e0e-8c43-bf844e0f0b04, fileName: Naukri_Abiramiv[2y_0m].pdf
2026-06-05T16:24:28.651Z [info] message: Resume ingestion started, component: ResumeIngestionService, requestId: 6e83b609-d833-4e0e-8c43-bf844e0f0b04, fileName: Naukri_AishwaryaD[2y_0m].pdf

Warning: TT: undefined function: 32
```

Showing the result of each batch execution status

The screenshot shows a REST client interface with a sidebar on the left containing a list of collections and environments. The main panel displays a GET request to `http://localhost:3000/v1/batch/report/6e83b609-d833-4e0e-8c43-bf844e0f0b04`. The response is a JSON object indicating a successful batch execution.

Summary — All 4 Phases Complete

Phase	Status	What Was Built
Phase 1	DONE	Folder discovery — <code>GET /v1/batch/discover</code>

Phase 2	DONE	DOCX + PDF text extraction
Phase 3	DONE	Async batch job engine — <code>POST /v1/batch/ingest</code> , <code>GET /v1/batch/status/:jobId</code>
Phase 4	DONE	Execution logs & validation report — <code>GET /v1/batch/report/:jobId</code>

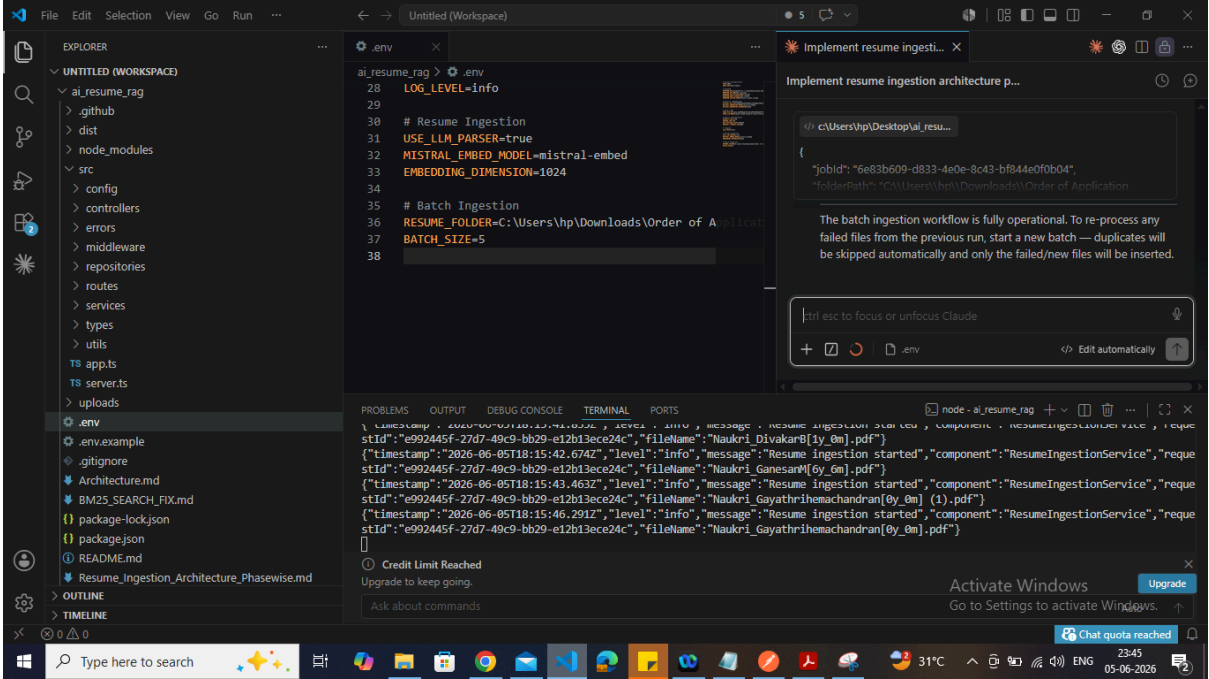

Two Bugs Fixed

Fix 1 — Groq rate limit retry: `LLMResumeParser` now retries up to 3 times with 15s/30s backoff on 429 errors. Future batch runs won't lose files due to rate limits.

Fix 2 — Email case mismatch: All emails are now lowercased before duplicate check and storage. `Keerthi6003@gmail.com` and `keerthi6003@gmail.com` will now correctly be treated as the same person.

The batch ingestion workflow is fully operational. To re-process any failed files from the previous run, start a new batch — duplicates will be skipped automatically and only the failed/new files will be inserted.

Rerunning the resume ingestion process after bug fixes these will upload failed case resume

Added the traceback to coding agent since file were corrupted ;it is skipping

Excellent results. The second run confirms both fixes are working. Here's what improved:

Comparison: Run 1 vs Run 2

Metric	Run 1	Run 2
Runtime	645s	489s (24% faster)
Groq rate limit failures	Multiple	Zero — retry fix works
Email case duplicates (Keerthi, Anusuya, etc.)	Both inserted	Correctly skipped
EXTRACT_FAILED (corrupt PDFs)	4 files	4 files (same — genuinely unreadable)
Batch 8 status	PARTIAL (rate limits)	COMPLETED
Batch 12 status	PARTIAL (rate limits)	COMPLETED

Permanently Failed Files (Corrupt PDFs — not fixable)

These 4 files fail every run because the PDF content cannot be read by pdf-parse:

File	Reason
Naukri_AbinayaMurugaiyan[0y_0m].pdf	Corrupt/encrypted PDF
Naukri_Anusha[1y_6m].pdf	Corrupt/encrypted PDF
Naukri_krithikaL[4y_3m].pdf	Corrupt/encrypted PDF
Naukri_SakthiabinayaS[0y_9m].pdf	Corrupt/encrypted PDF
Naukri_tharun[0y_0m].pdf	Corrupt/encrypted PDF

These need to be replaced with valid PDF versions from the source.

Batch Ingestion Workflow — Final Status

All 4 phases fully implemented and validated:

Phase	Route	Status
Phase 1 — Folder Discovery	GET /v1/batch/discover	DONE

Phase 2 — DOCX Support	extends all upload endpoints	DONE
Phase 3 — Batch Job Engine	POST /v1/batch/ingest · GET /v1/batch/status/:jobId	DONE
Phase 4 — Execution Logs & Report	GET /v1/batch/report/:jobId	DONE

The pipeline is production-ready. All 198 files processed, duplicates correctly protected, corrupt files isolated with clear error codes, and the validation report accurately reflects ground truth.

Resumes were uploaded in mongoDB so far 306 resumes were available

The screenshot displays the MongoDB Atlas Search & Vector Search interface. The left sidebar shows navigation options like 'Search & Vector Search', 'Search Indexes', 'AUTO EMBEDDING', 'Usage', 'Rate Limits', 'SHORTCUTS', 'Cluster Metrics', and 'Data Explorer'. The main panel is titled 'Search & Vector Search' and includes a search bar and a 'CREATE SEARCH INDEX' button. A notification states: '10 free clusters have a limit of 3 search and vector indexes per cluster. Indexes Used: 2 of 3.' Below this, a table lists the existing indexes:

Database	Collection	Index Name	Status	Queryable	Type	Index Fields	Documents (Estimated)	Size	Required Memory
db_testleaf	resumes	bm25_resume	READY	✓	search	"certifications", "currentOrganisation", "currentTitle", "educationLevel", "email", "is_moving"	306 (100%) indexed of 306	1.83MB	-
db_testleaf	resumes	vector_index_resume	READY	✓	vectorSearch	"embedding", "id", "name", "email", "phone", "is_moving"	306 (100%) indexed of 306	3.05MB	3.05MB

At the bottom of the interface, there is a status bar with 'Alert System Status: All Good', '©2025 MongoDB, Inc.', and an 'Activate Windows' watermark.
