

Resume Bot - FrontEnd Implementation

Added the FrontEnd Web Instruction [architecture.md](#) file to the existing project and added the prompt

Refer the Frontend web instruction architecture file and implement it phase by phase .Each phase should be implemented after my approval only .Once one phase is implemented give me steps to validate and test the same.After tested,I will give approval to implement the next phase

[STRICT] IMPLEMENT PHASE BY PHASE AND FOLLOWED MY APPROVAL GO FOR NEXT PHASE

Phase Plan

Phase	What	Key Deliverable
Phase 1	Ingestion Frontend Setup	Project init + ingestion folder structure
Phase 2	Resume Upload UI	Drag-drop upload components
Phase 3	Ingestion API Integration	POST /v1/resume/inject wired
Phase 4	Ingestion State Management	Zustand upload store
Phase 5	Ingestion Progress UI	Step-by-step progress flow
Phase 6	Ingestion Result Screen	Success/completion view
Phase 7	Ingestion Validation Handling	File type, size, empty validation
Phase 8	Ingestion Error Handling	All error states
Phase 9	Ingestion Final Validation	E2E ingestion test
Phase 10	Core Infrastructure	Full Tailwind/Shadcn/Router/Axios
Phase 11	Sidebar Module	Search mode, weights, controls
Phase 12	Chat Interface	Message thread, input bar
Phase 13	Search & Results Module	API wired, result cards
Phase 14	Candidate Profile Modal	Full profile modal
Phase 15	Layout Integration	Full app assembly

```
"c:\\Users\\hp\\Desktop\";
npm create vite@latest
recruitbot-web -- --tem
```

Implemented Phase 1:
Ingestion Frontend Setup

Validating Phase 1 in PostMan

Test 1 — Dev server starts

Test 2 — Folder structure

Test 3 — TypeScript clean

Test 4 — Verify folder structure in VS Code

Implementing Phase 2: Resume Upload UI

Validating

Test 1 — Upload UI renders correctly

Test 2 — Drag and drop works

Test 3 — Browse file button

Test 4 — PDF validation errors

Test 5 — Empty upload guard

Implementation Phase 3 - Ingestion API Integration

Validating Phase 3

Test 1 — Successful end-to-end ingestion

Test 2 — Duplicate resume (409 error)

Proceeding for Phase 4

Phase 4: Ingestion State Management

1. Start the frontend: `cd recruitbot-web && npm run dev`
2. Open `http://localhost:5173` — page should load exactly as before (no visual change; this phase is internal state wiring)
3. Drop a PDF — upload flow should work end-to-end
4. Open browser DevTools > React DevTools > Zustand panel (if extension installed) and confirm store state updates through the steps

Phase 5

Phase 6

Validation

Phase 7 is done

Validating

Dropped .txt file and thrown an error

Phase 9

Validating

Phase 10: Core Infrastructure (React Router, layout shell).

Validating

Phase 11: Sidebar Module.

Validating

Proceed to **Phase 12: Chat Interface Module.**

Validating

Phase 13: Search & Results Module.

Validating

Vector Search

BM25 Search

Hybrid Search

Phase 14 : Candidate Profile Modal
