

MCP Home Assignment

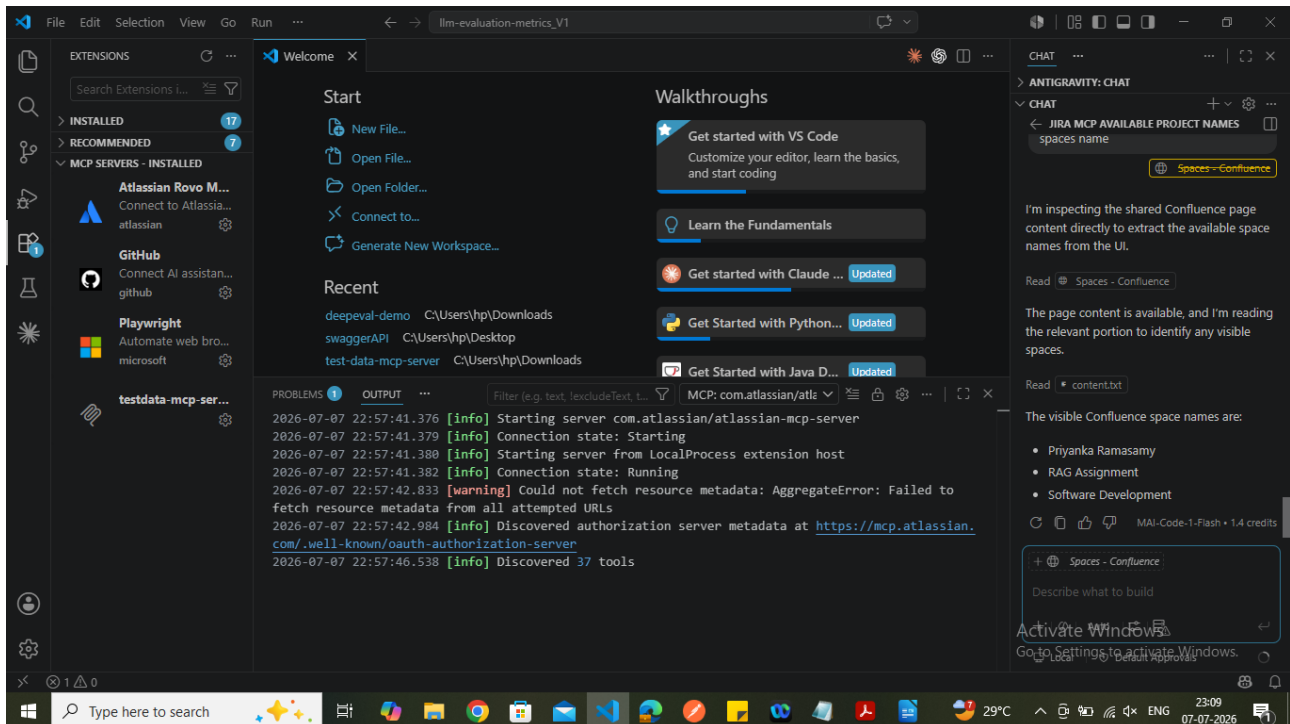

@Atlassian MCP

Installed the Atlassian MCP and started the server

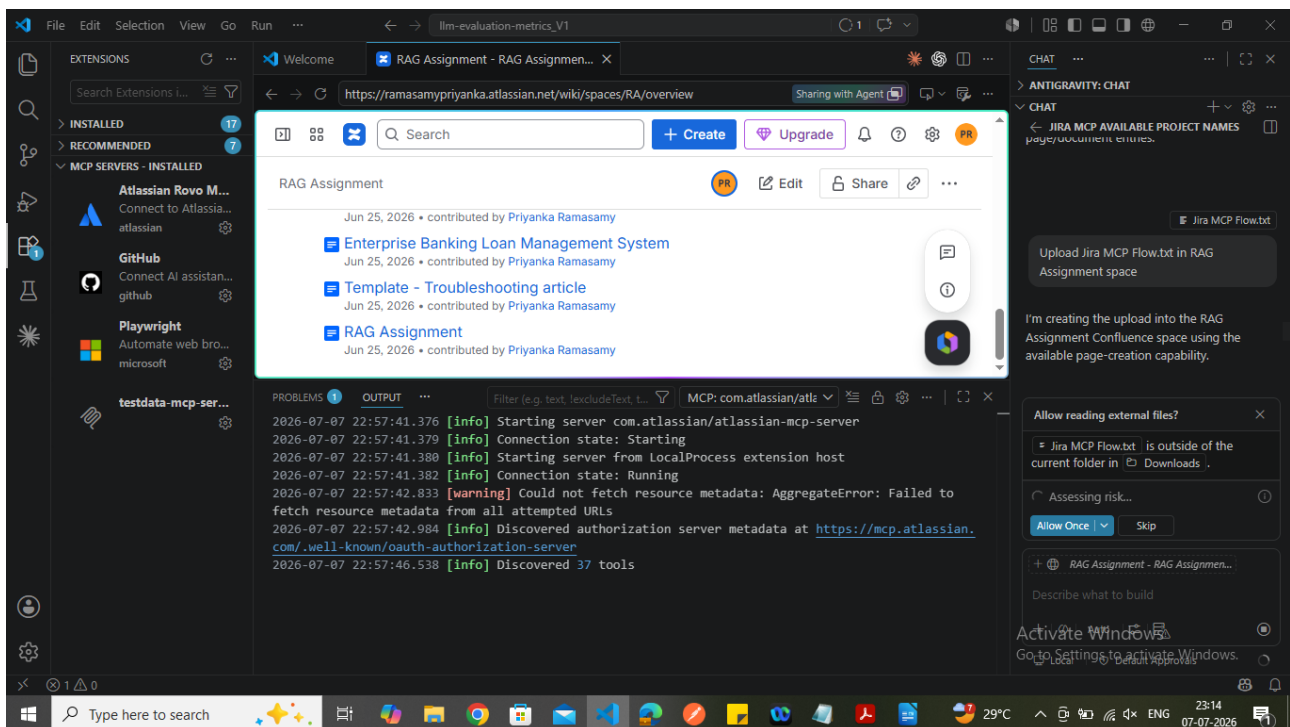

Query : Use Confluence Mcp and provide me the spaces name

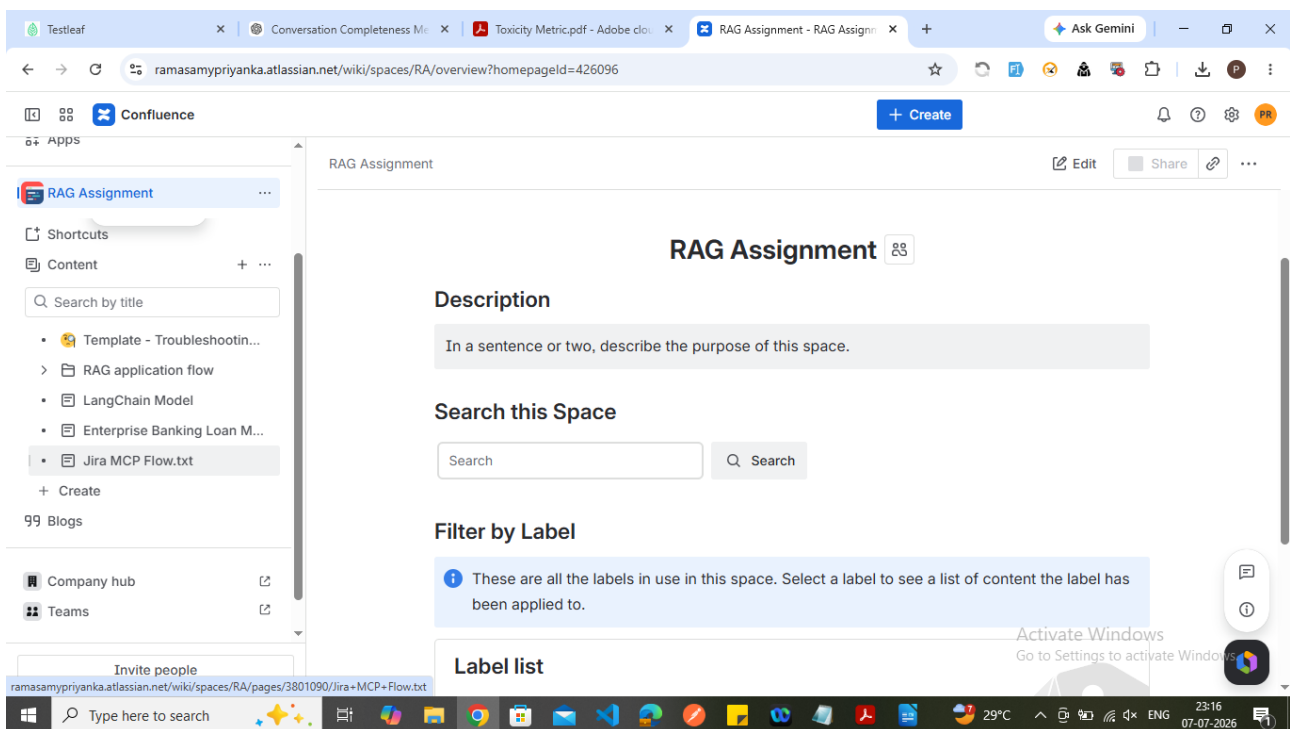

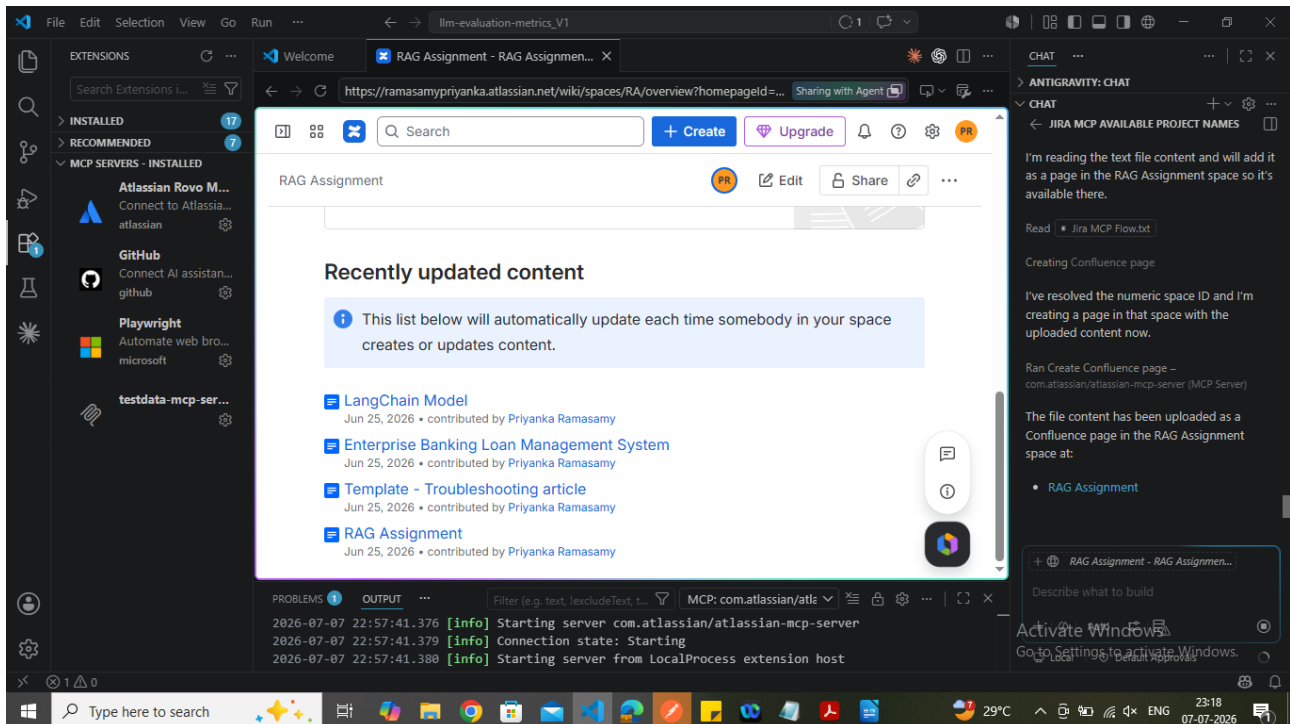

Provided the spaces name

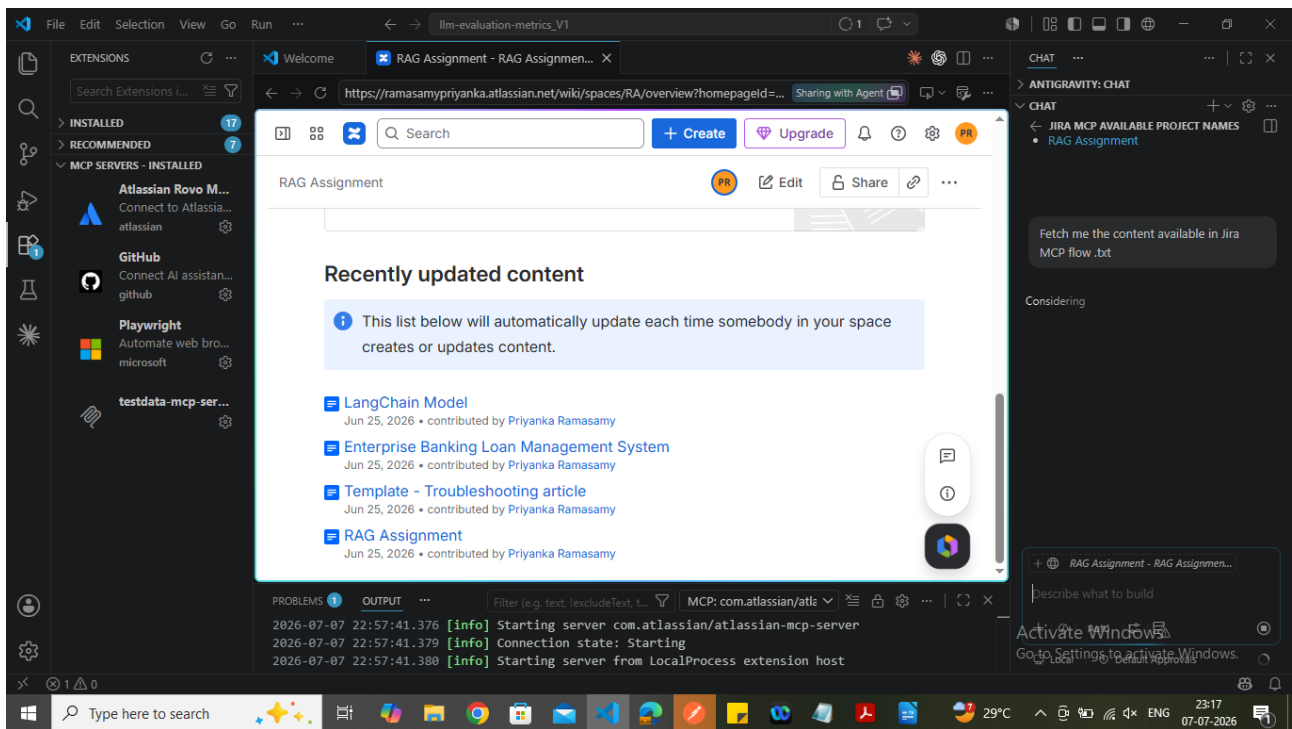

Asked to upload the document in Space

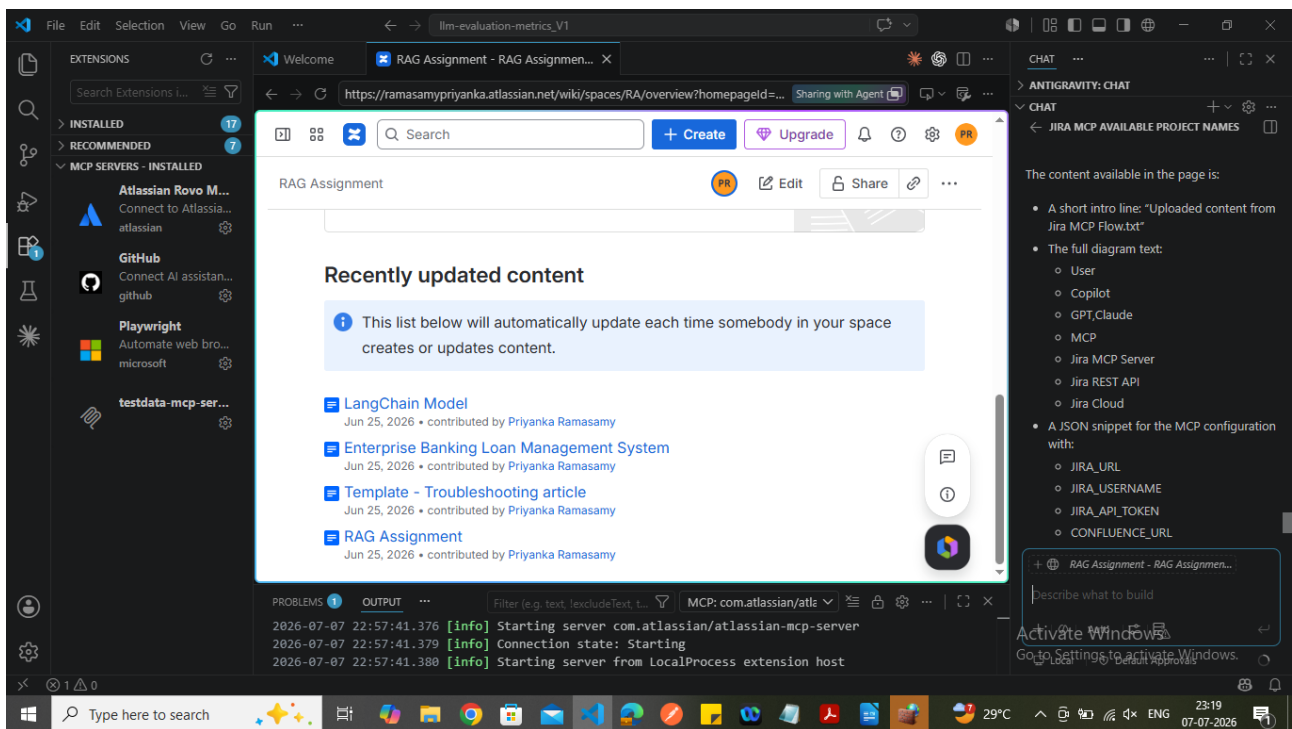

Document JIRA MCP Flow .txt is added to confluence page

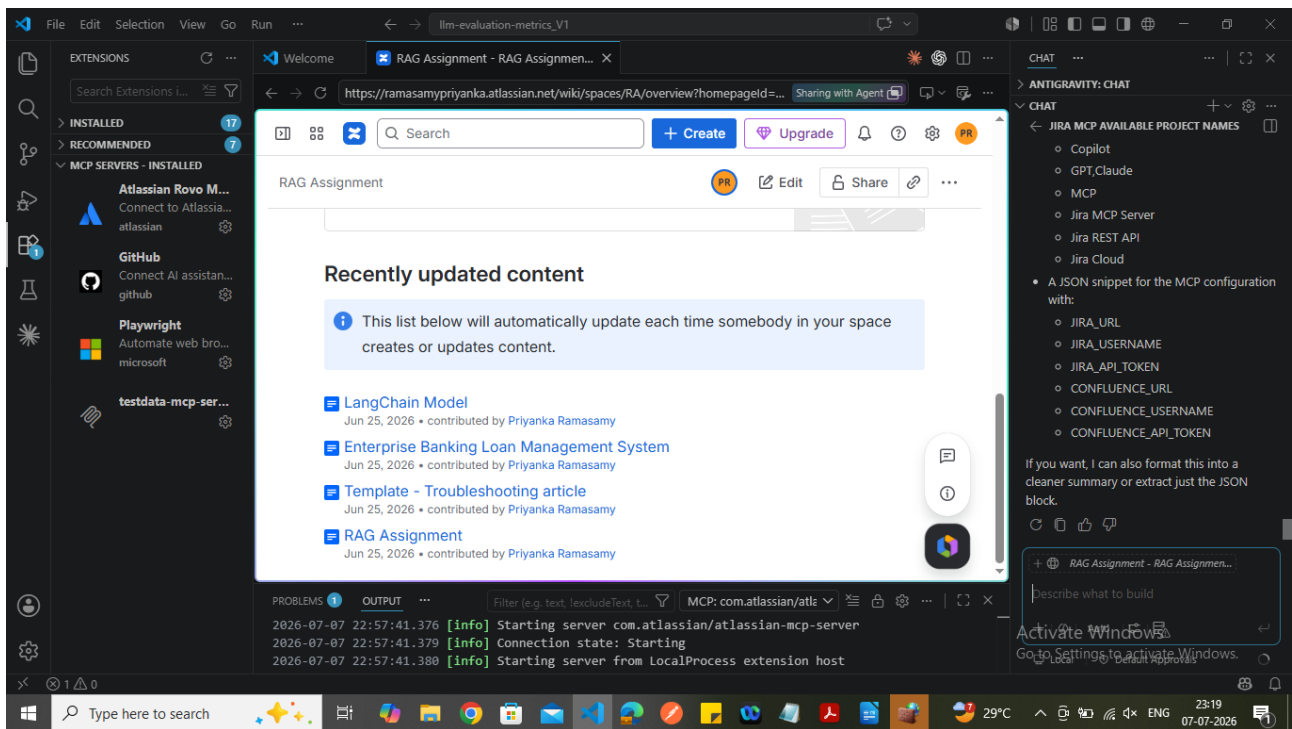

Asked to fetch the content from the file

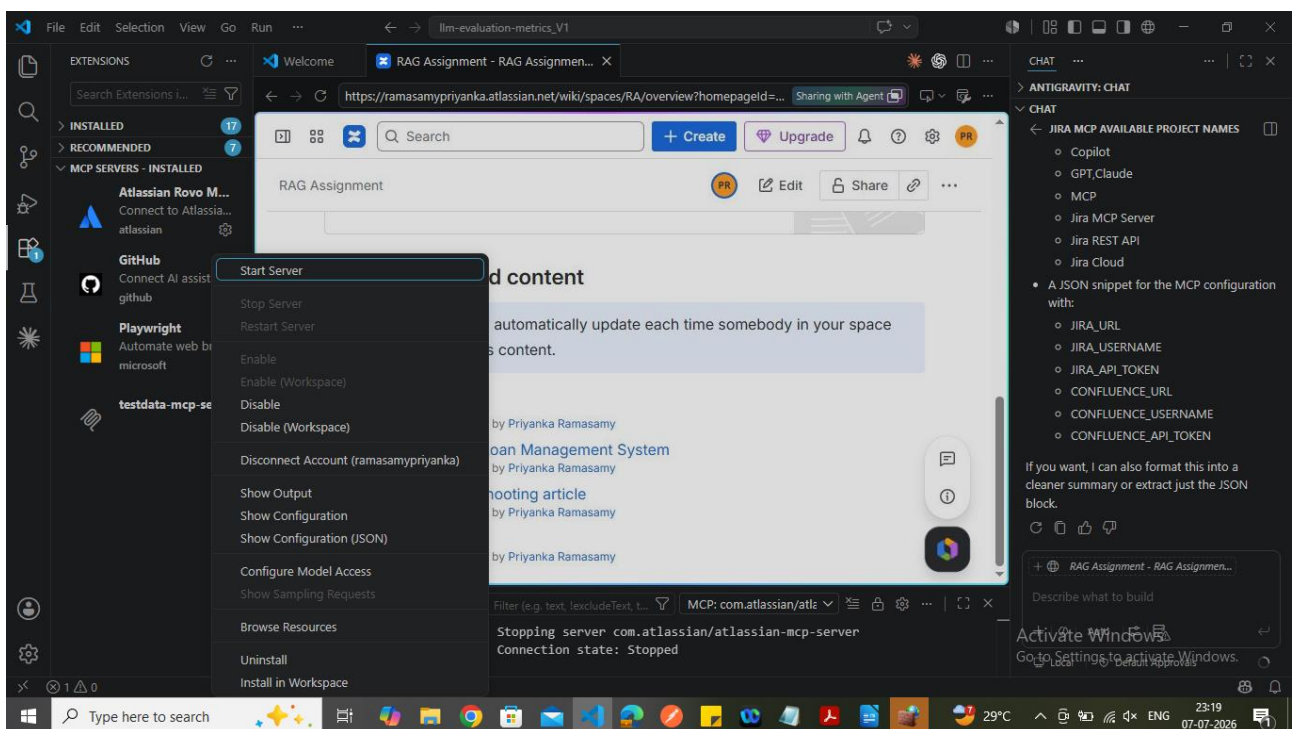

Content were displayed in chat

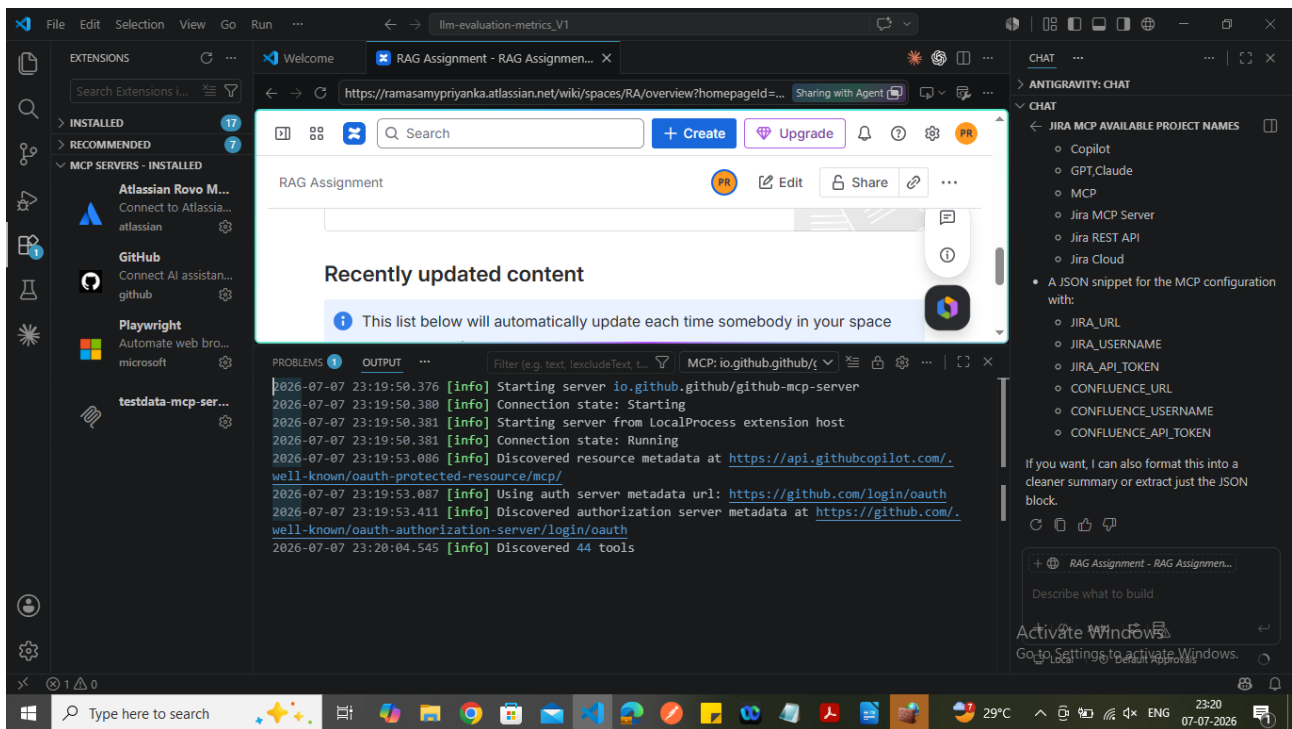

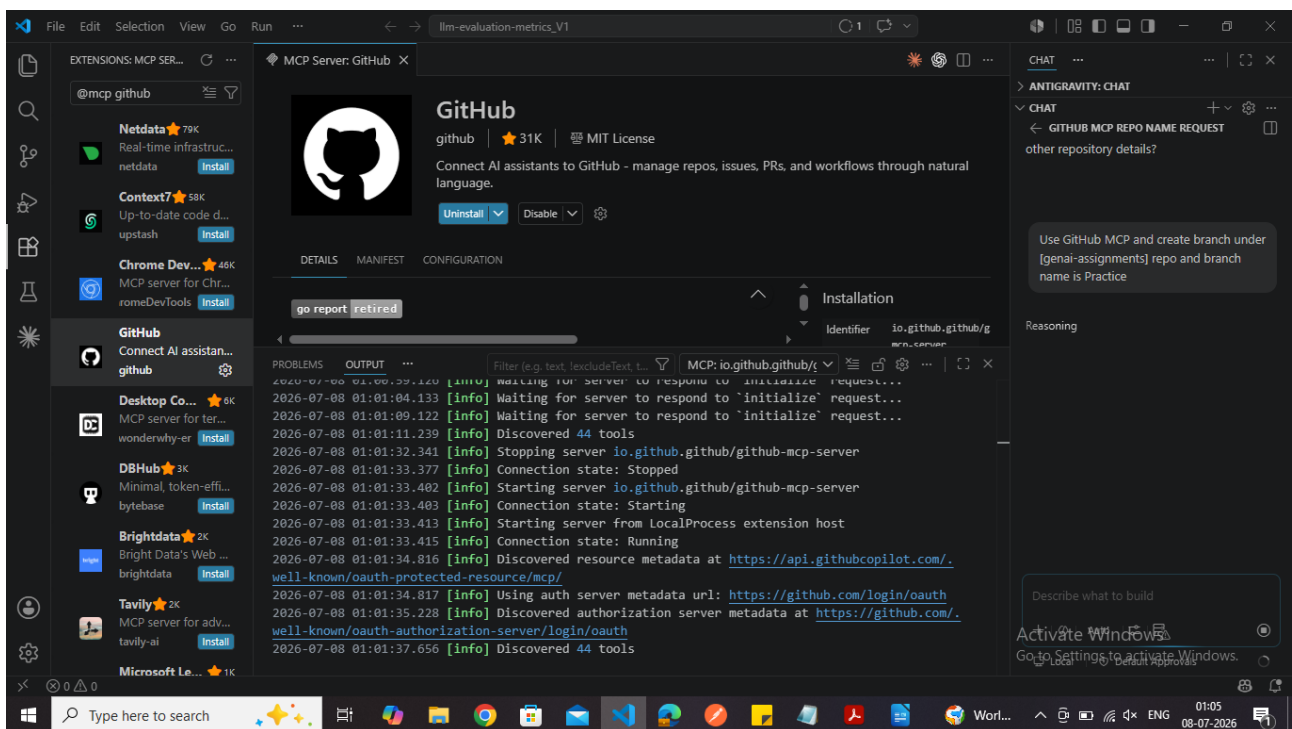

Starting the GitHub Server

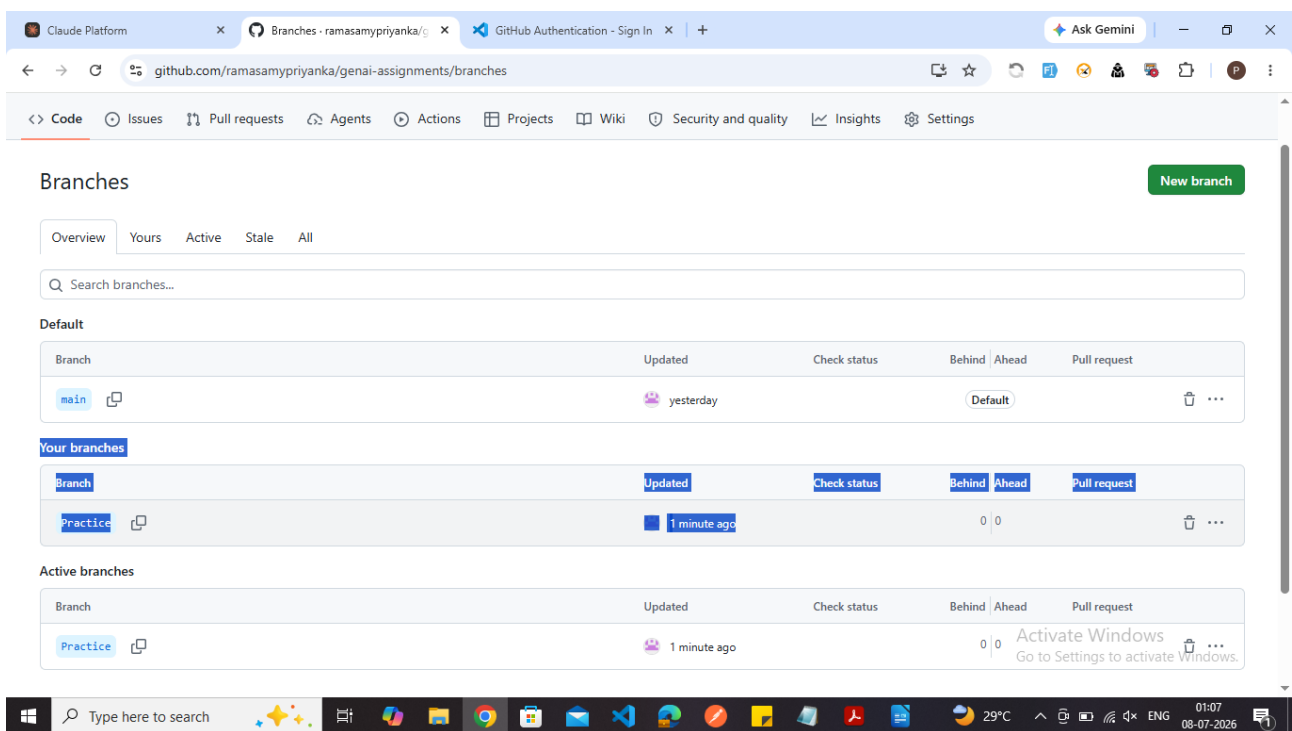

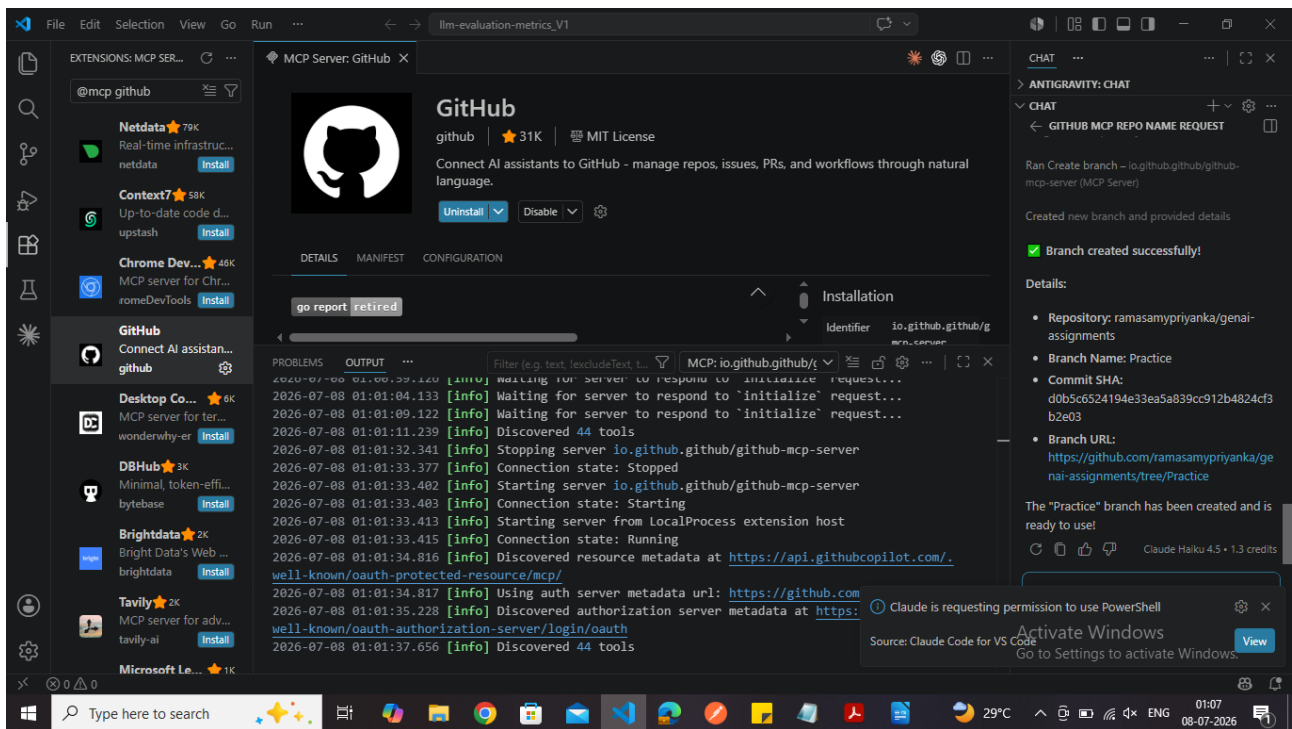

server had started

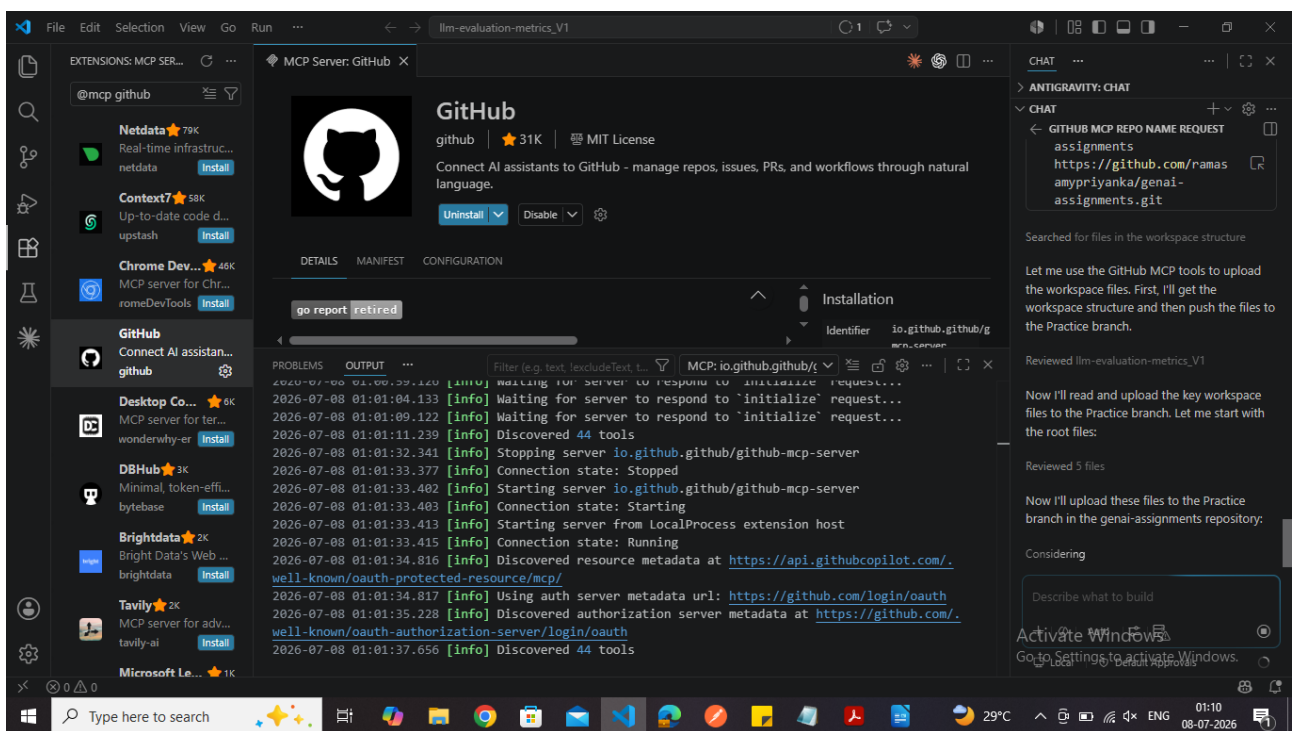

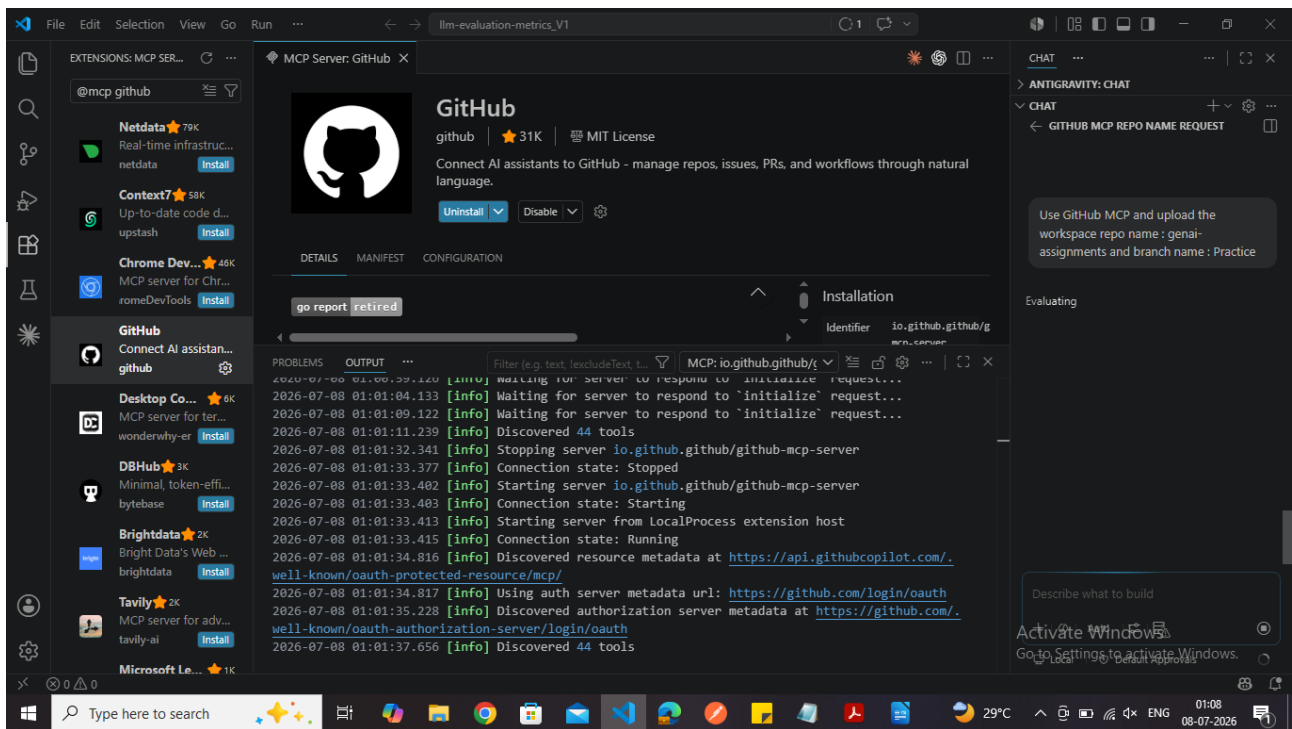

GitHub MCP

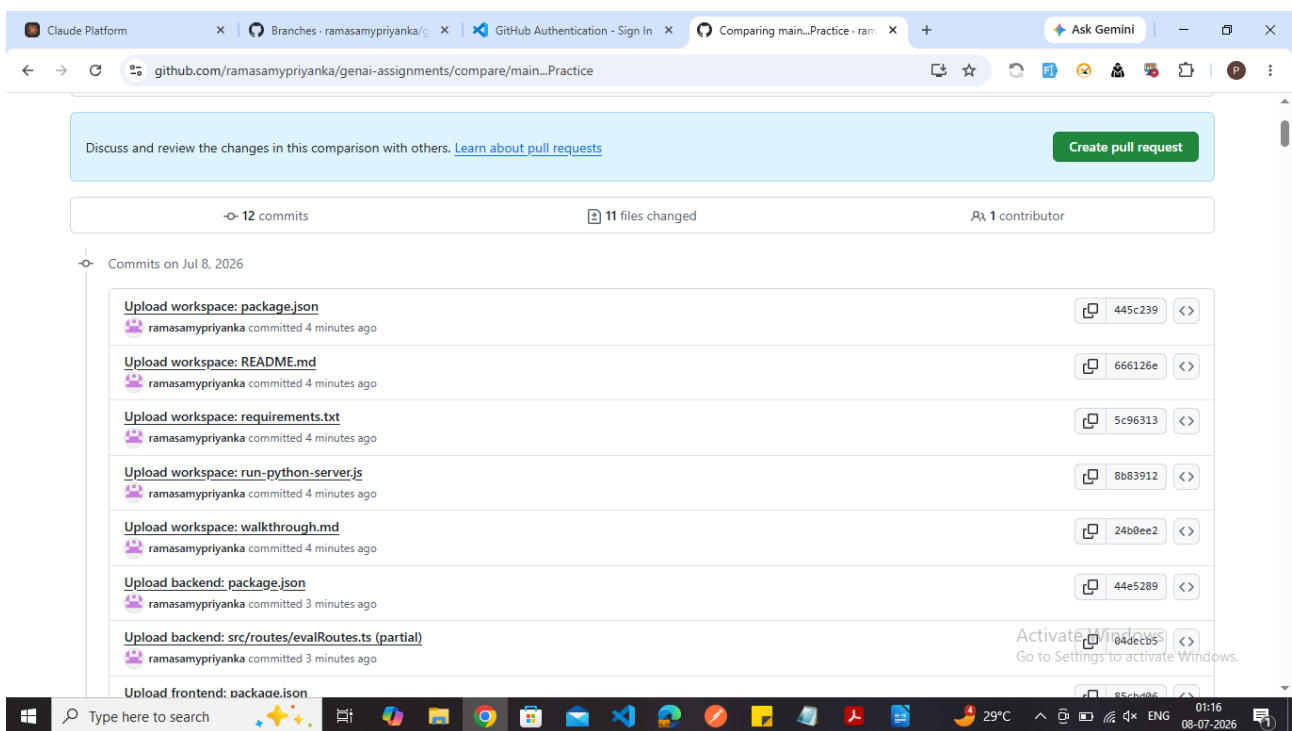

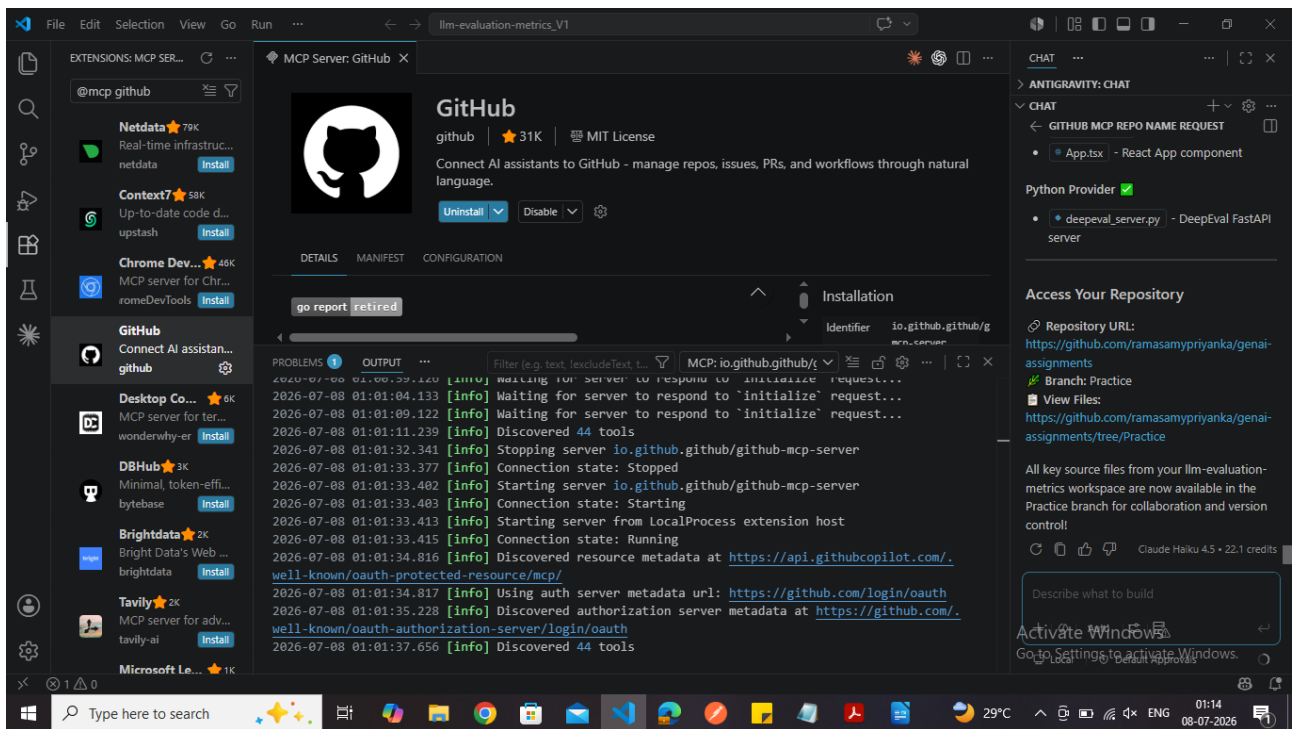

branch had been created

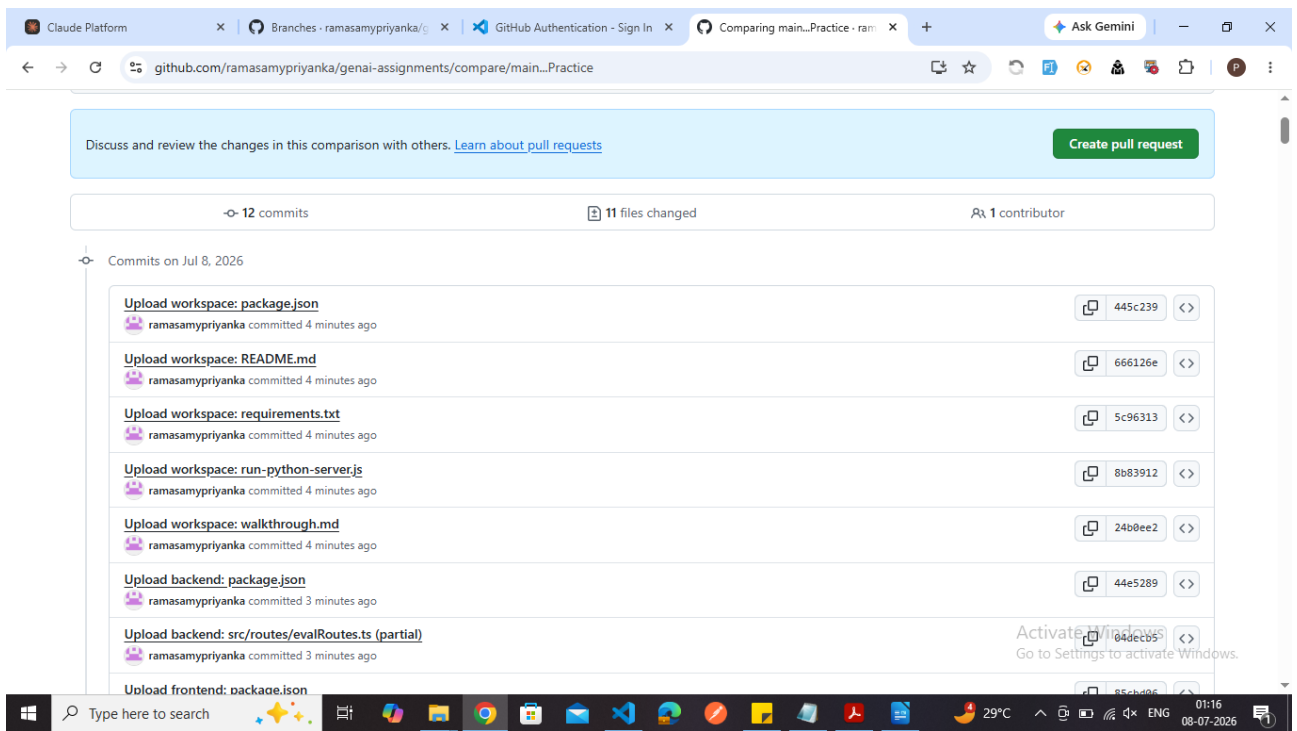

Upload the project to Practice branch

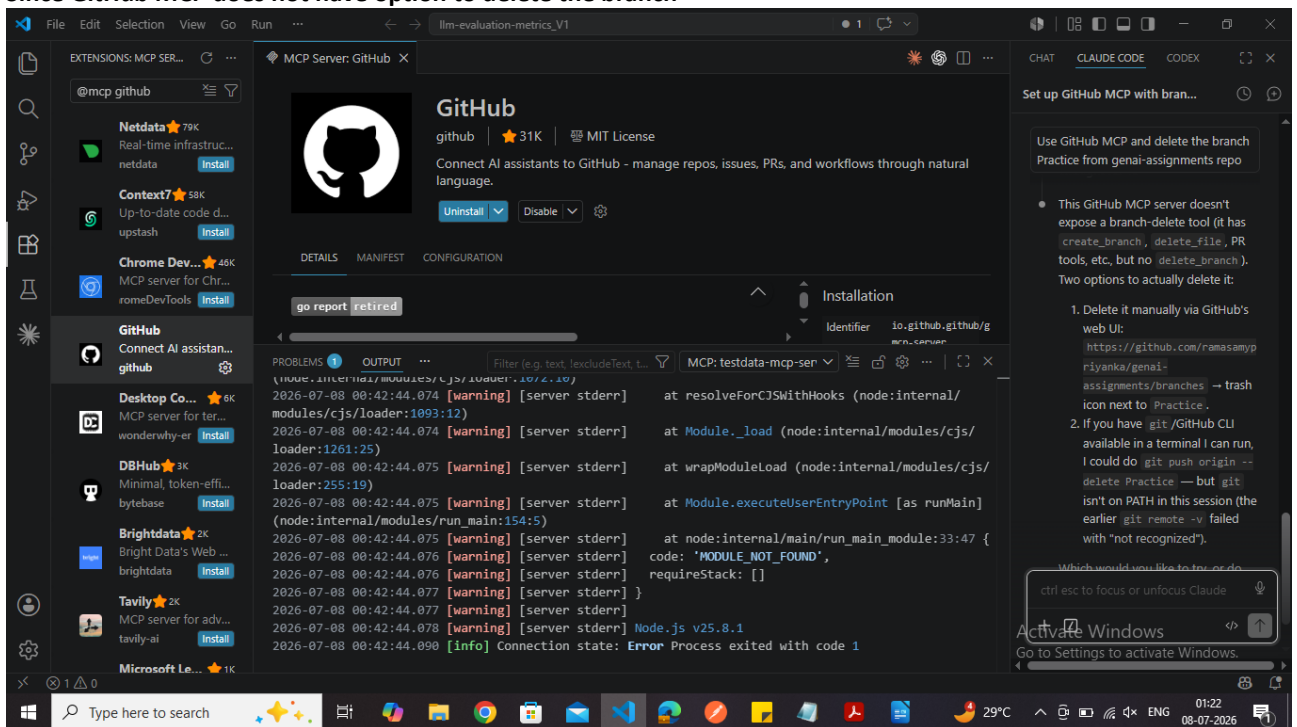

workspace uploaded successfully

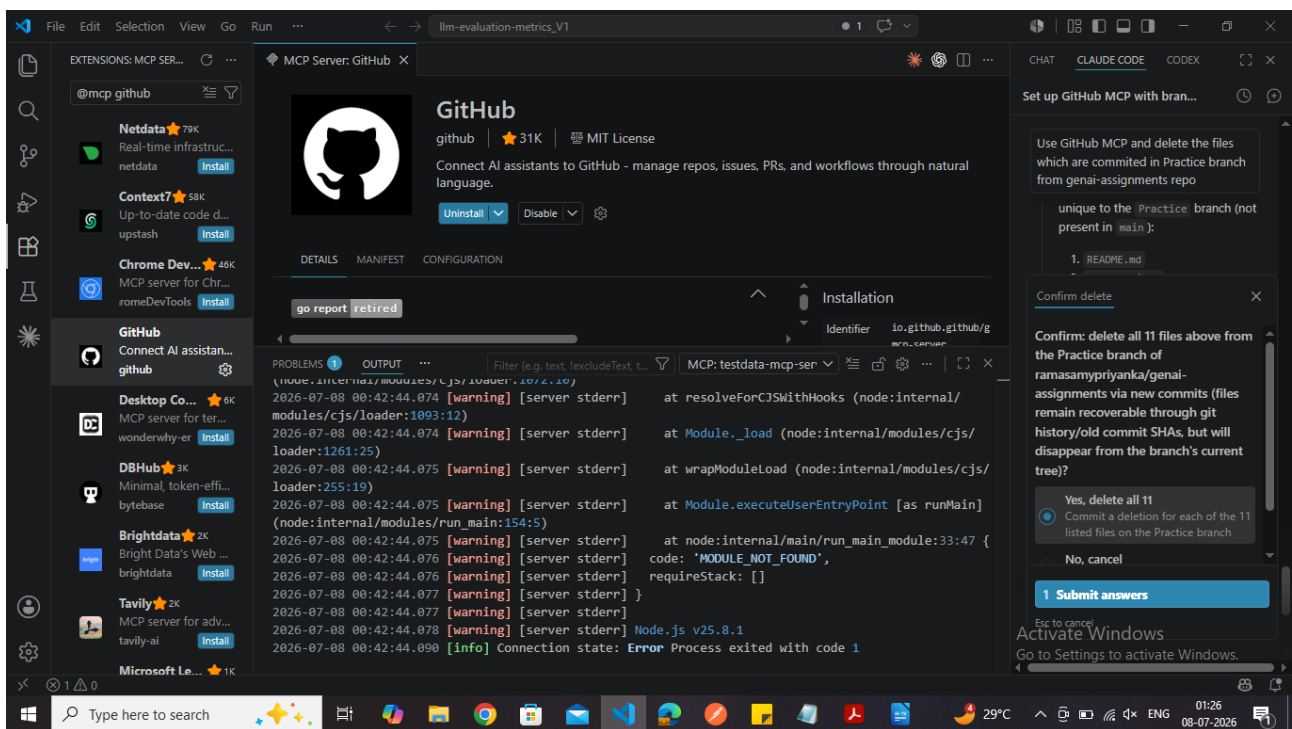

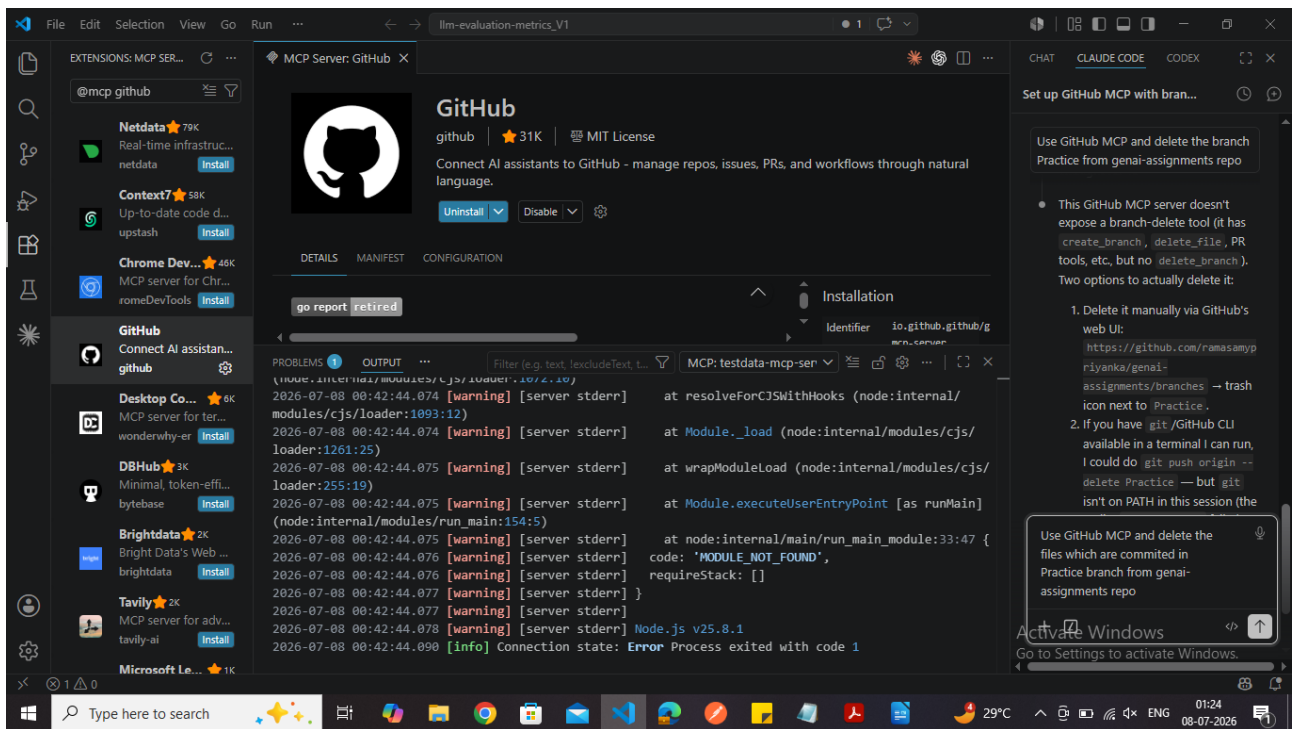

Deleting the created branch

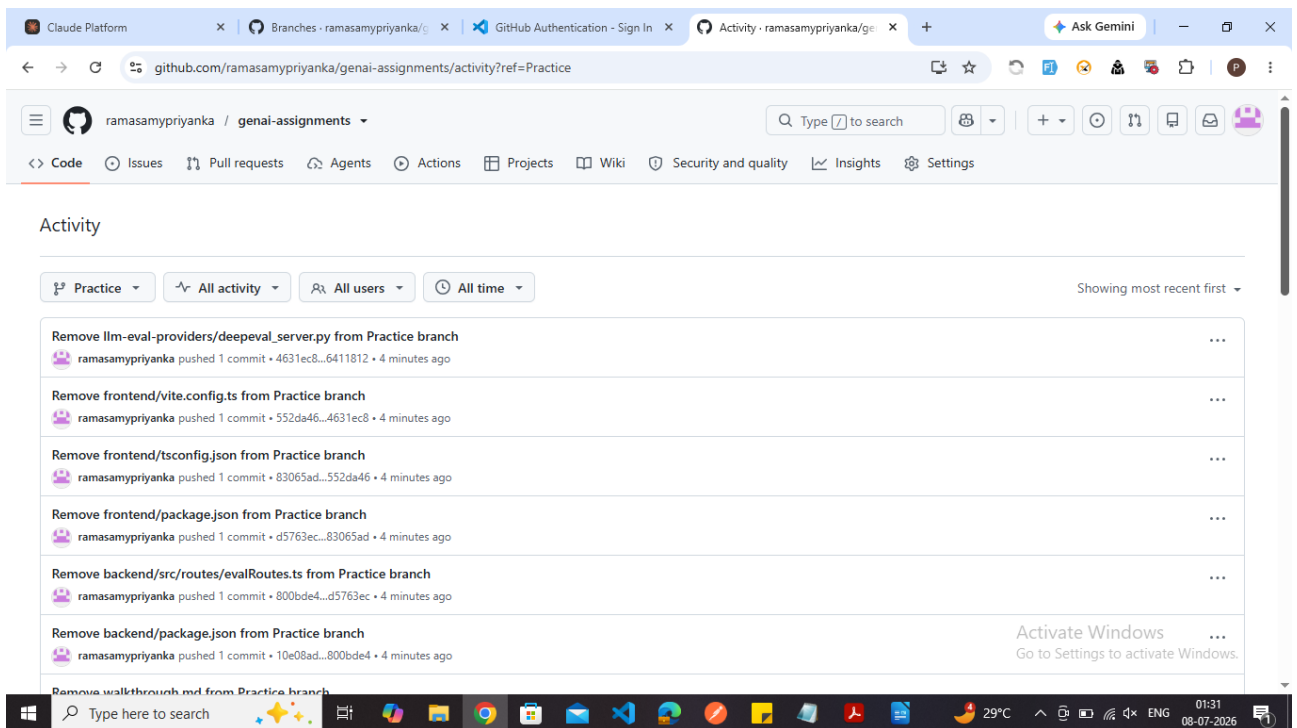

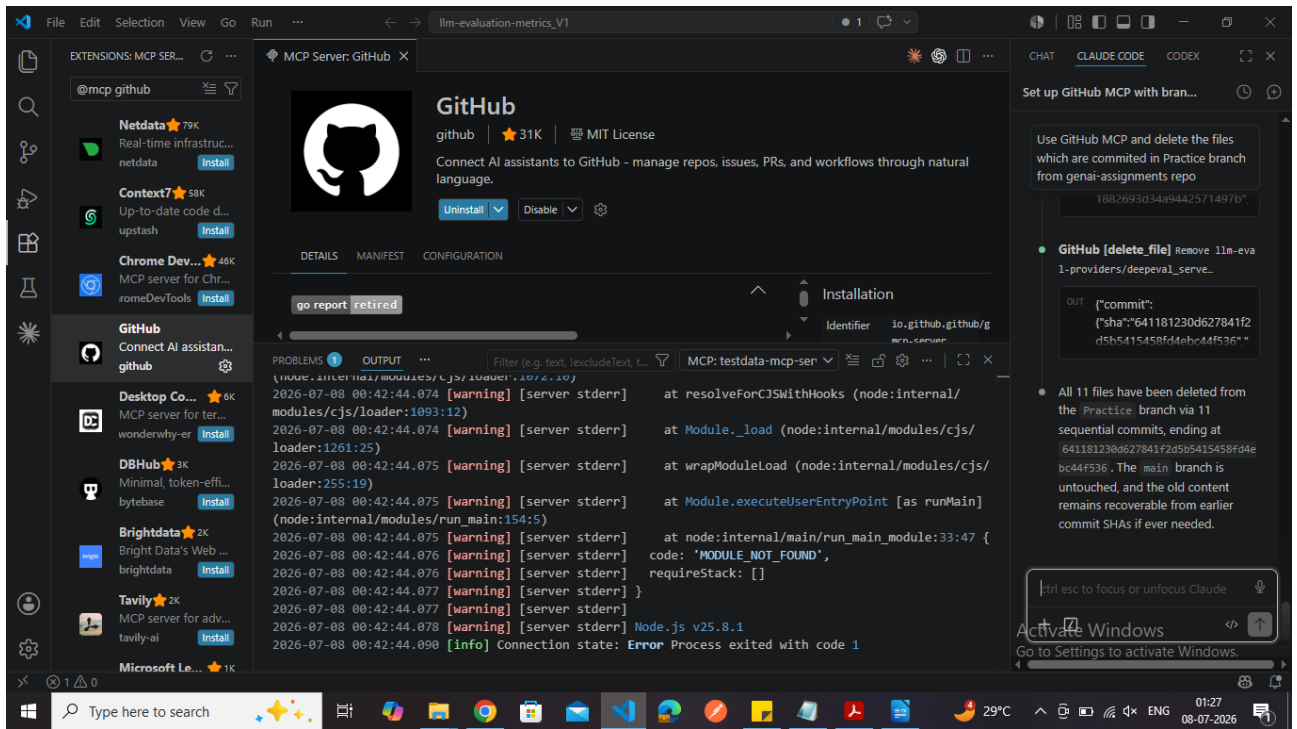

Since GitHub MCP does not have option to delete the branch

Now delete the files uploaded in Practice branch

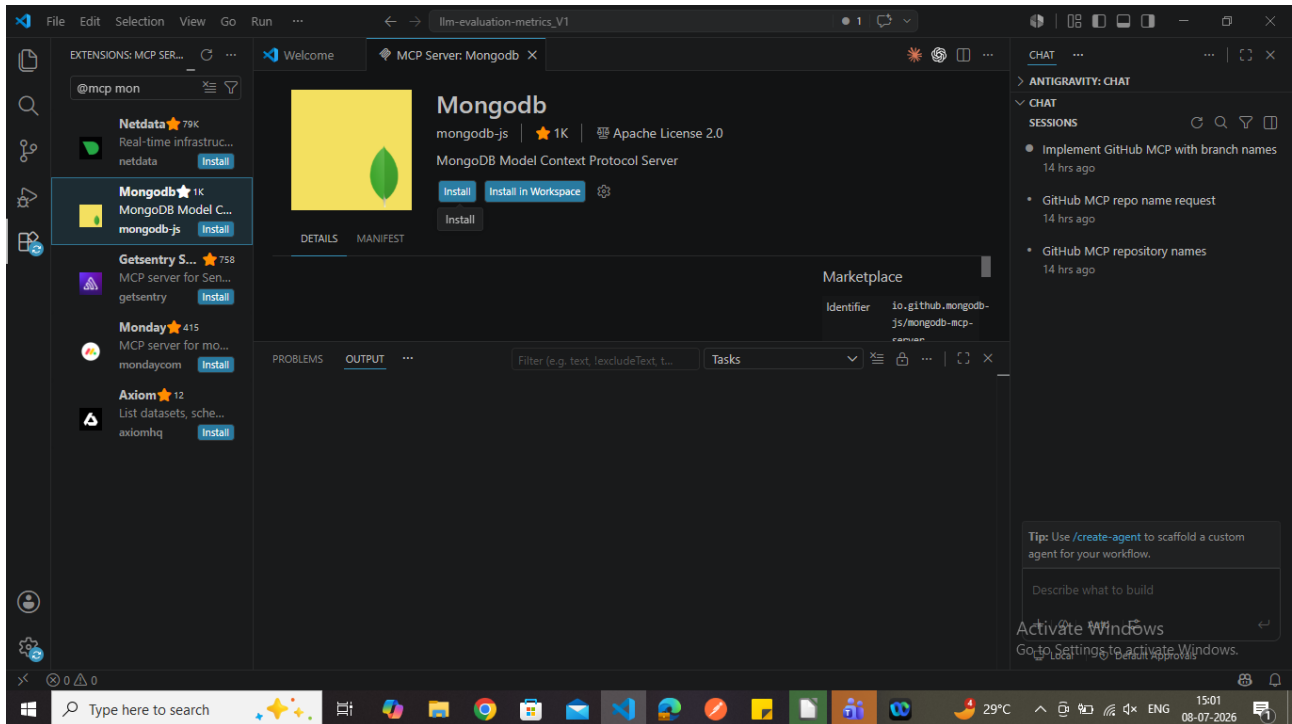

Files which are committed were deleted

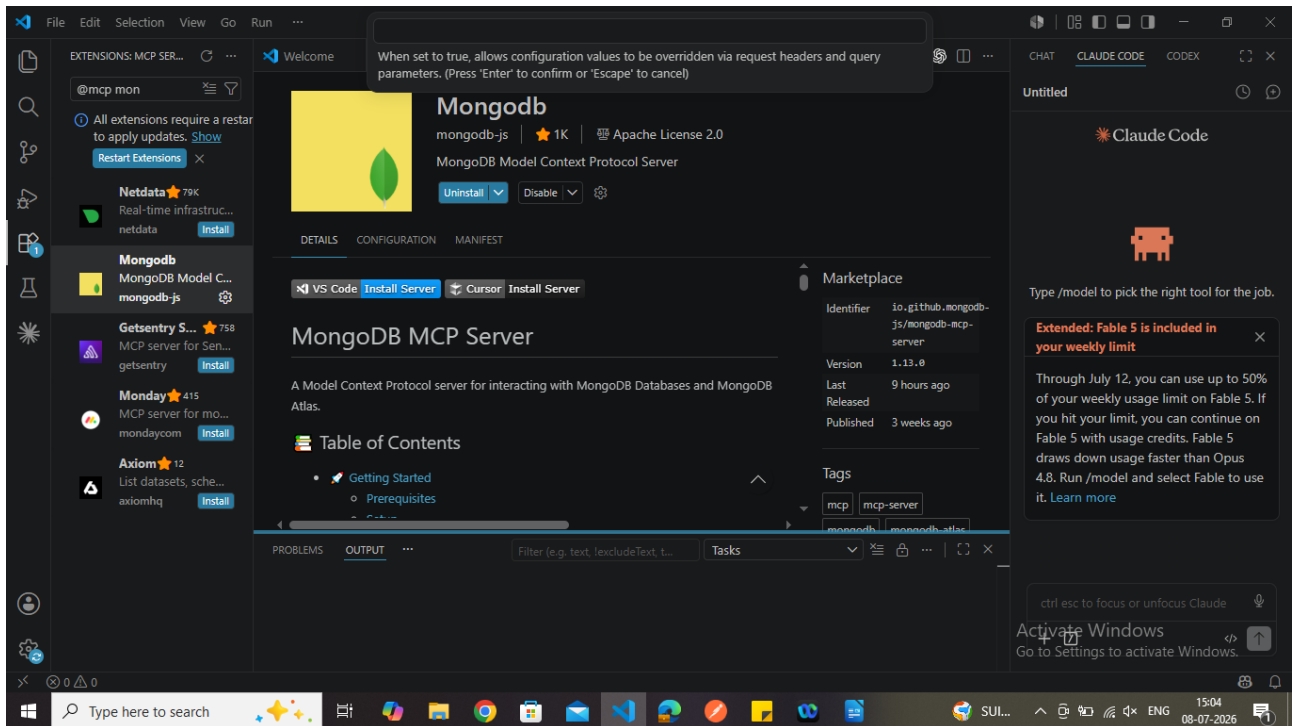

@MCP Mongo DB

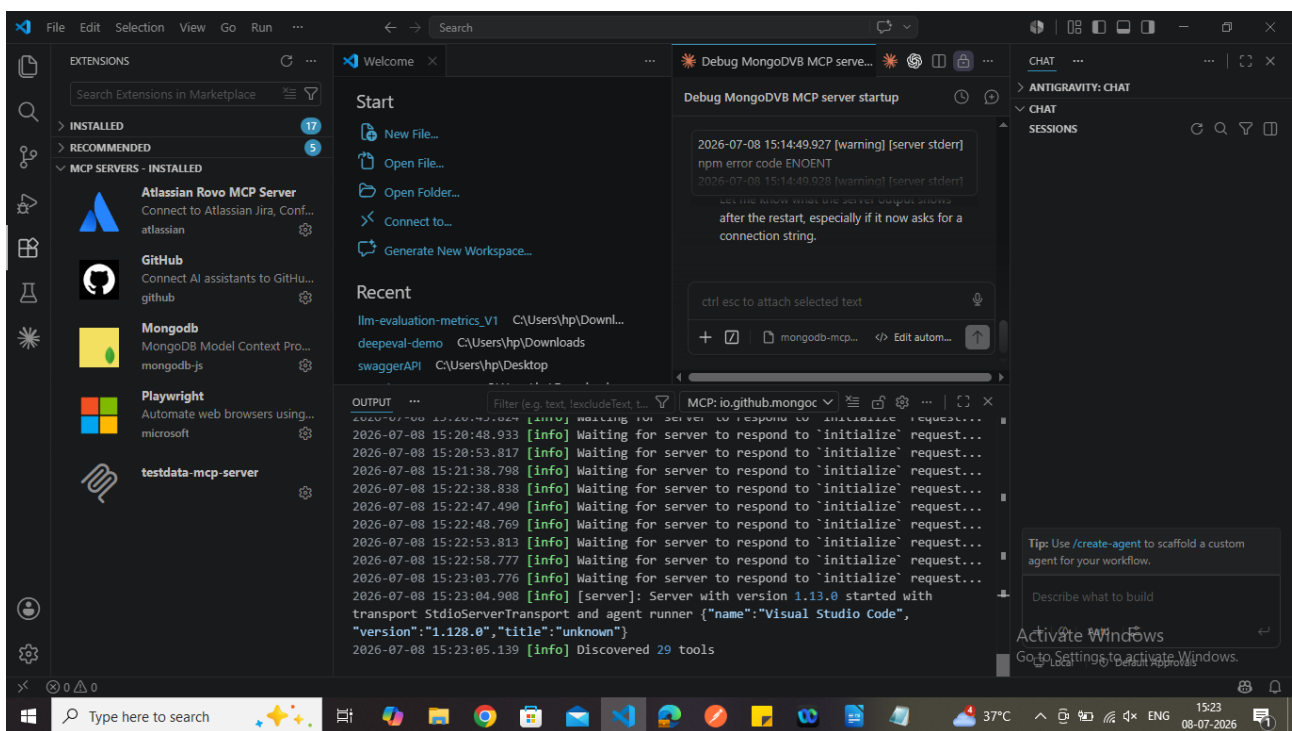

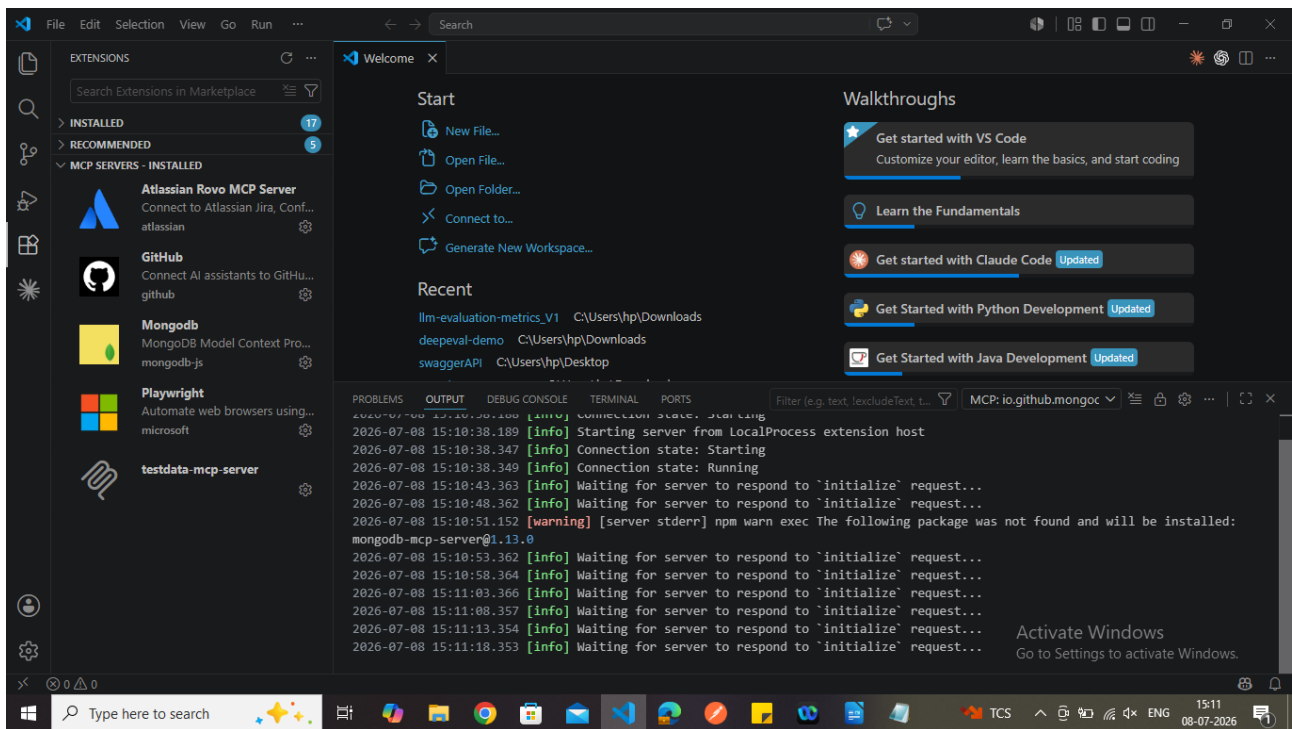

Installing the MCP MongoDB

Installed the Mongo DB MCP

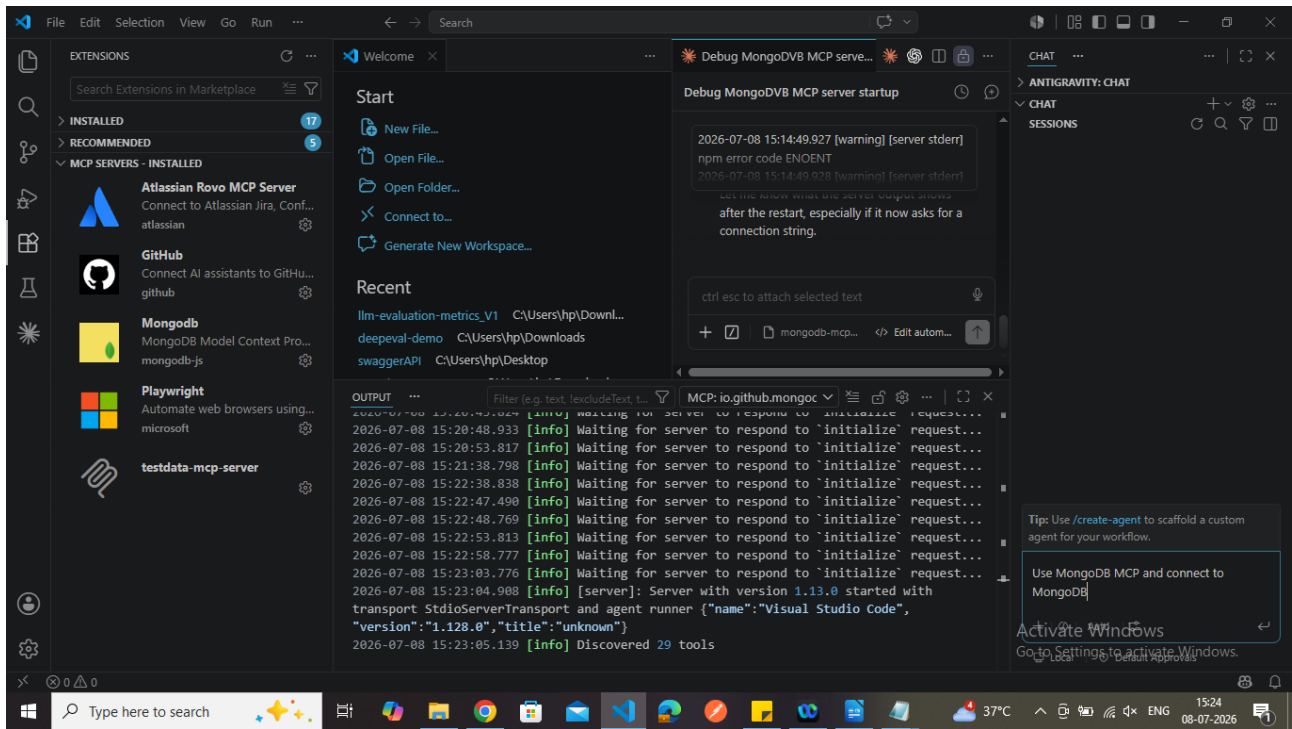

Started the MongoDB MCP server

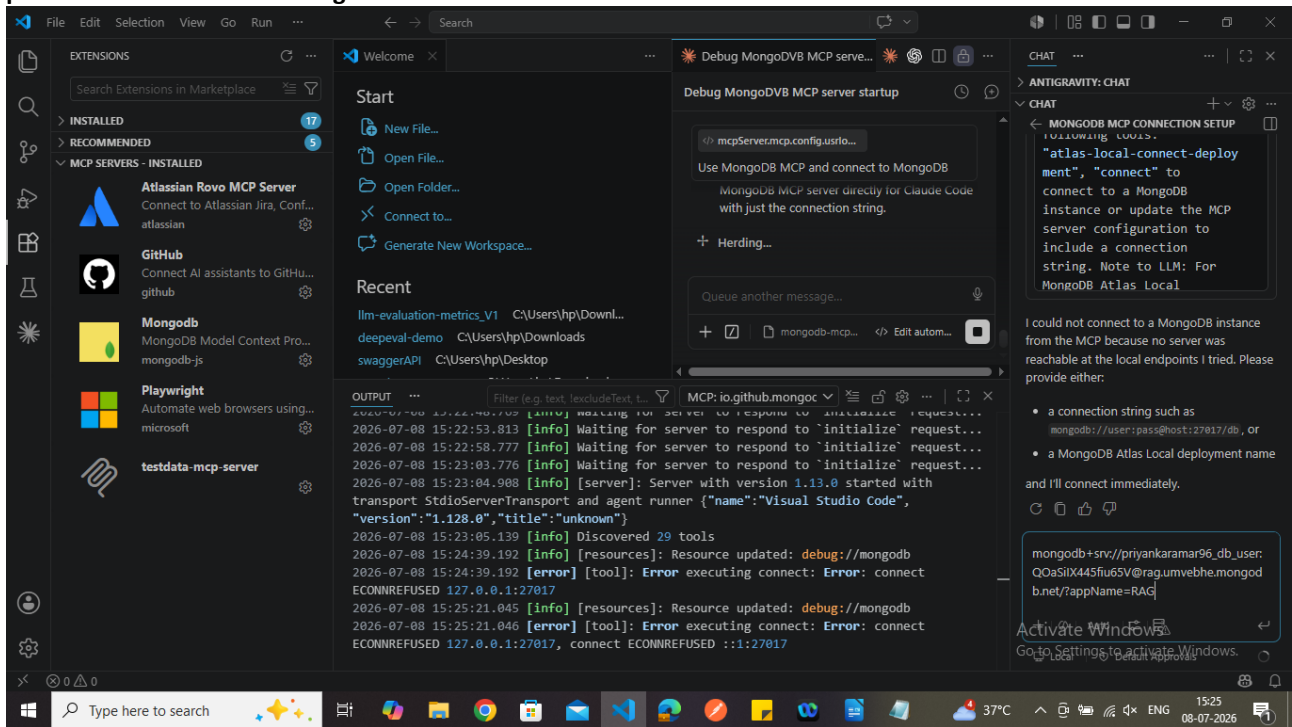

Connect to MongoDB

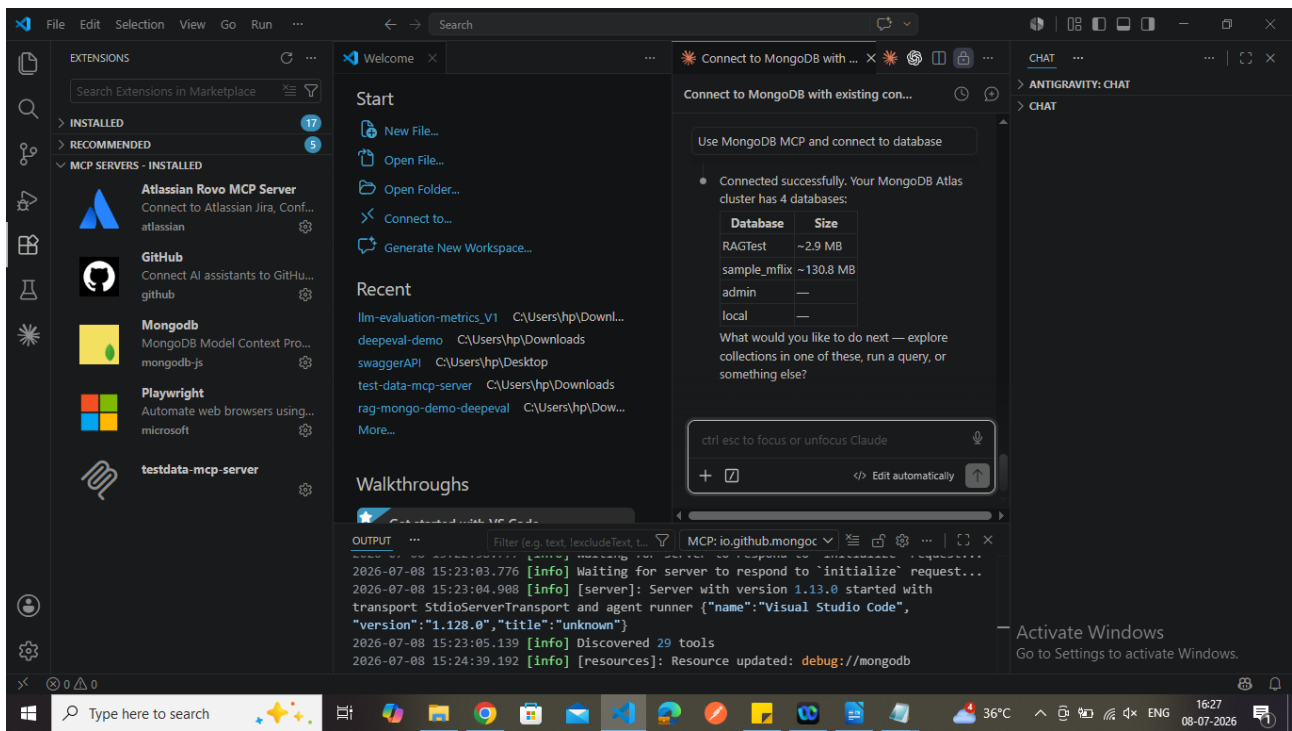

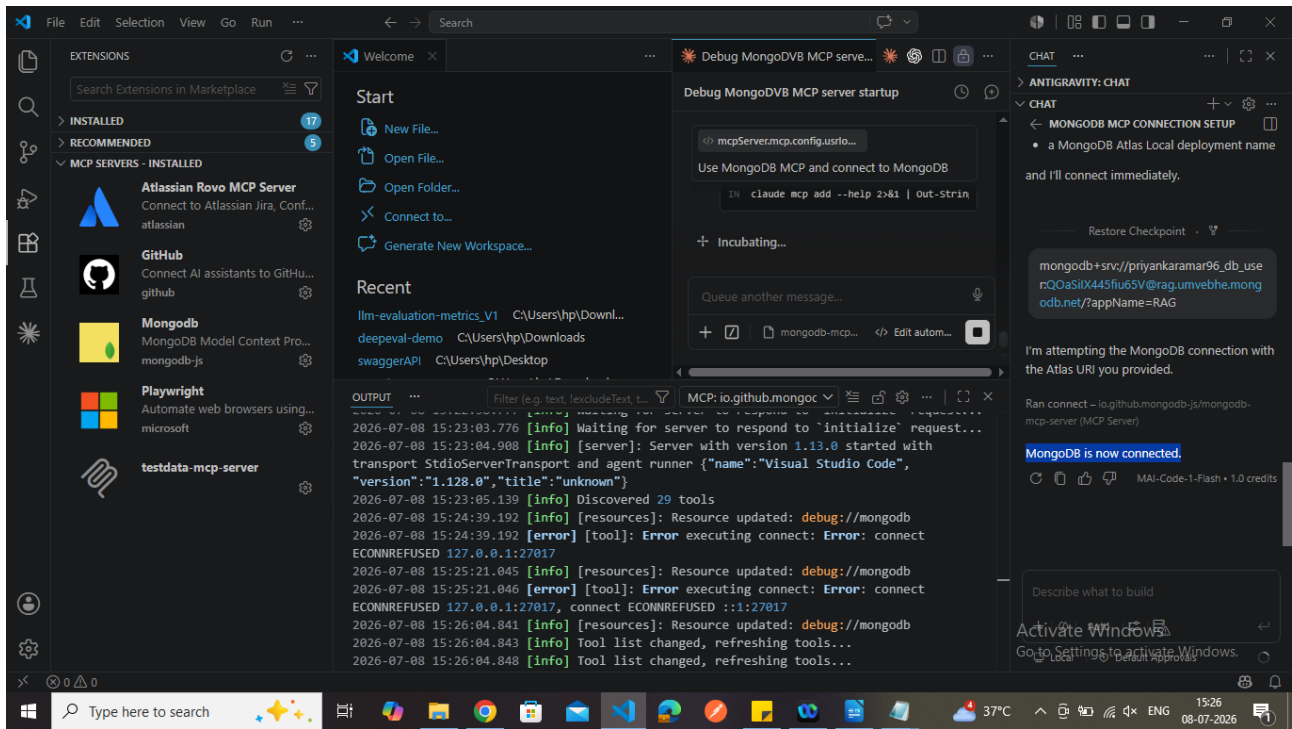

Query: Use MongoDB MCP and connect to database

provided the connection string

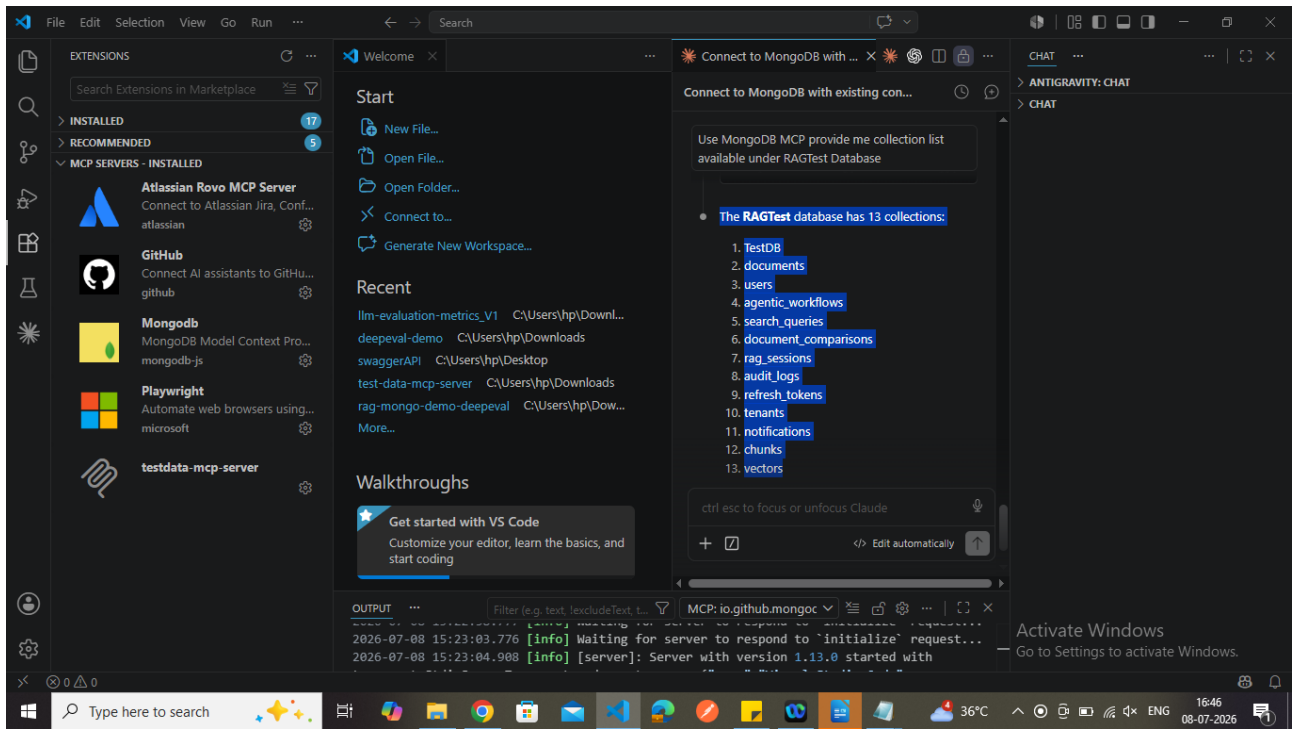

MongoDB is connected

2) List of collection

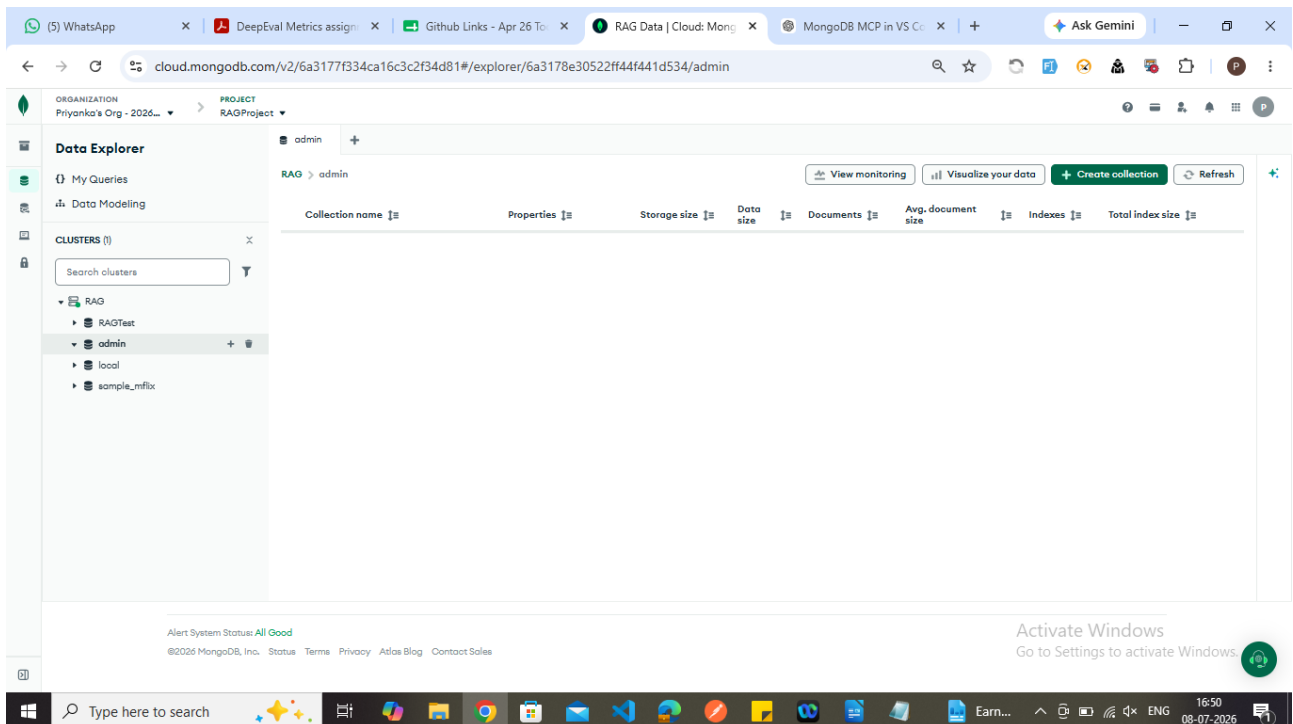

Query : Use MongoDB MCP provide me collection list available under RAGTest Database

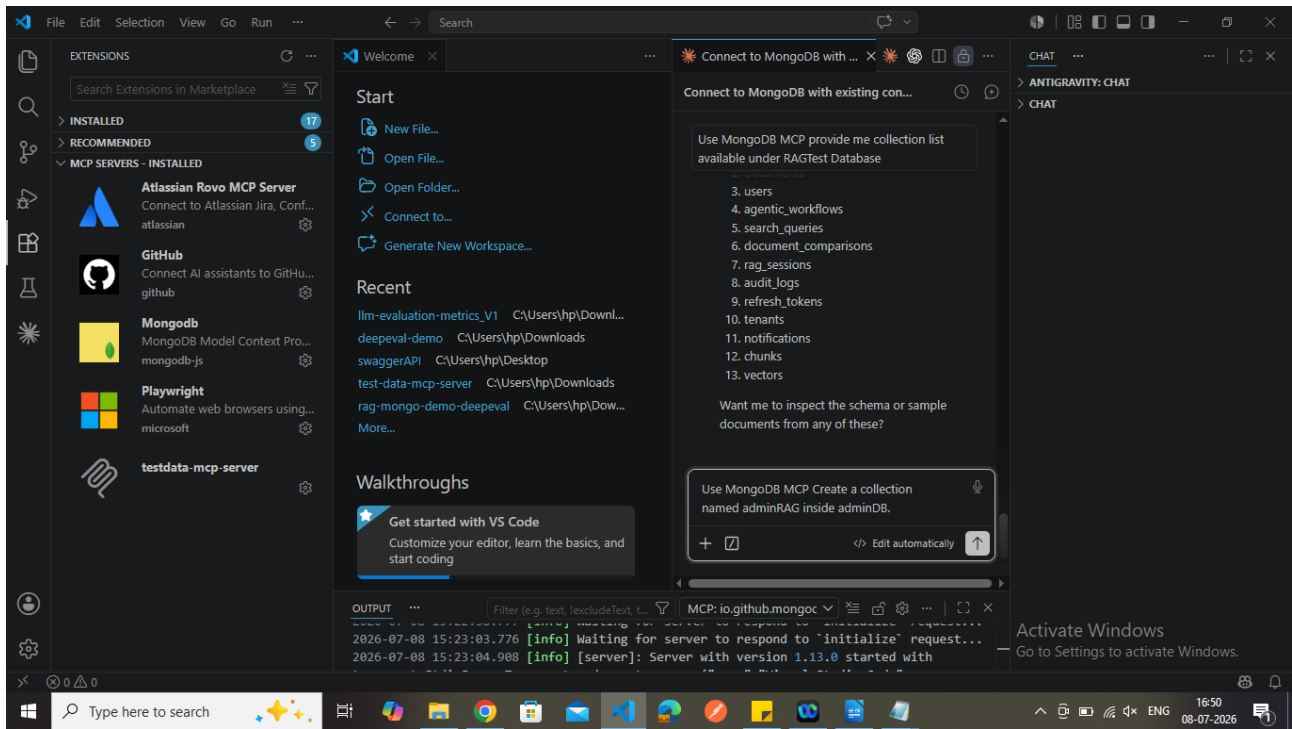

3) Create collection

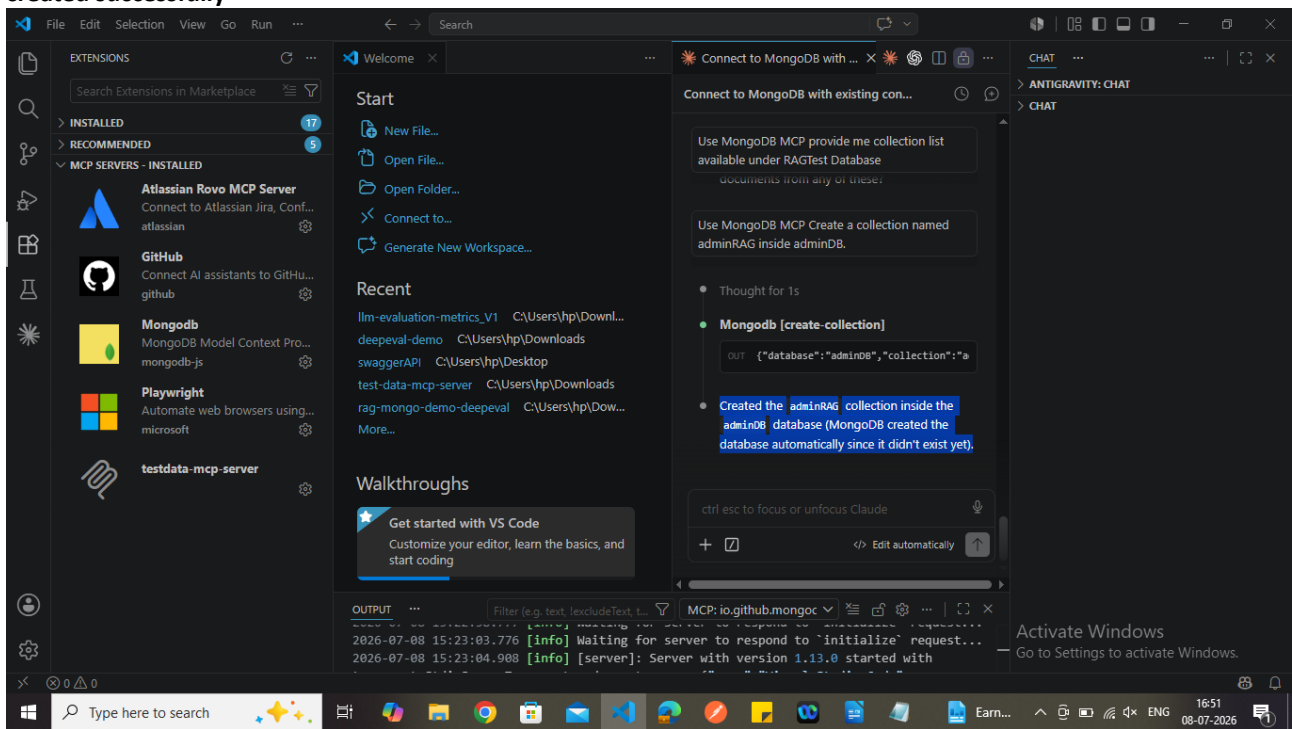

Query :Use MongoDB MCP Create a collection named adminRAG inside adminDB.

Created the adminDB database and collection called adminRAG

created successfully

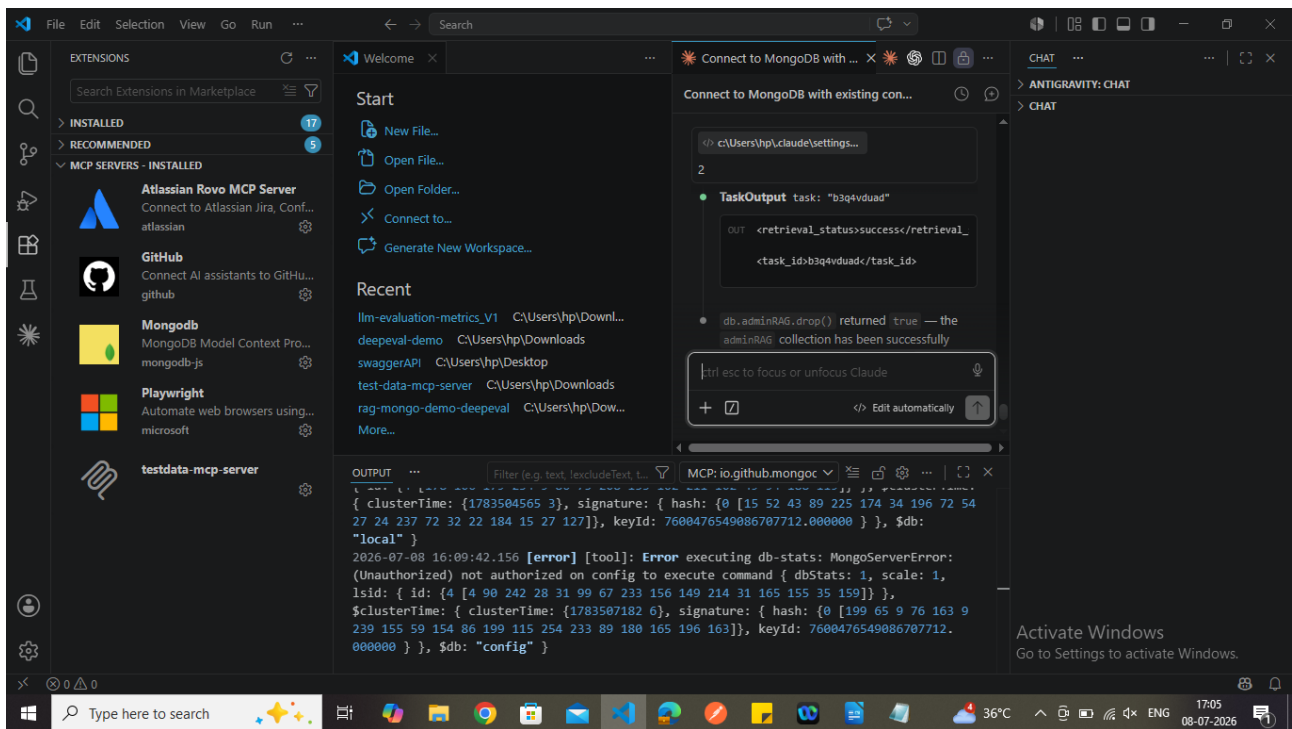

Screenshot of the MongoDB Cloud Portal interface. The browser tabs include WhatsApp, DeepEval Metrics assign, Github Links - Apr 26 To, RAG Data | Cloud: Mong, MongoDB MCP in VS Co, and Ask Gemini. The URL is cloud.mongodb.com/v2/6a3177f334ca16c3c2f34d81#/explorer/6a3178e30522ff44f441d534/adminDB/adminRAG/find. The interface shows the 'Data Explorer' on the left with a tree view of clusters including RAG, admin, adminDB, and adminRAG. The main panel displays 'This collection has no data' with a message: 'It only takes a few seconds to import data from a JSON or CSV file.' The bottom status bar shows 'Alert System Status: All Good' and 'Activate Windows'.

4) Drop the collection

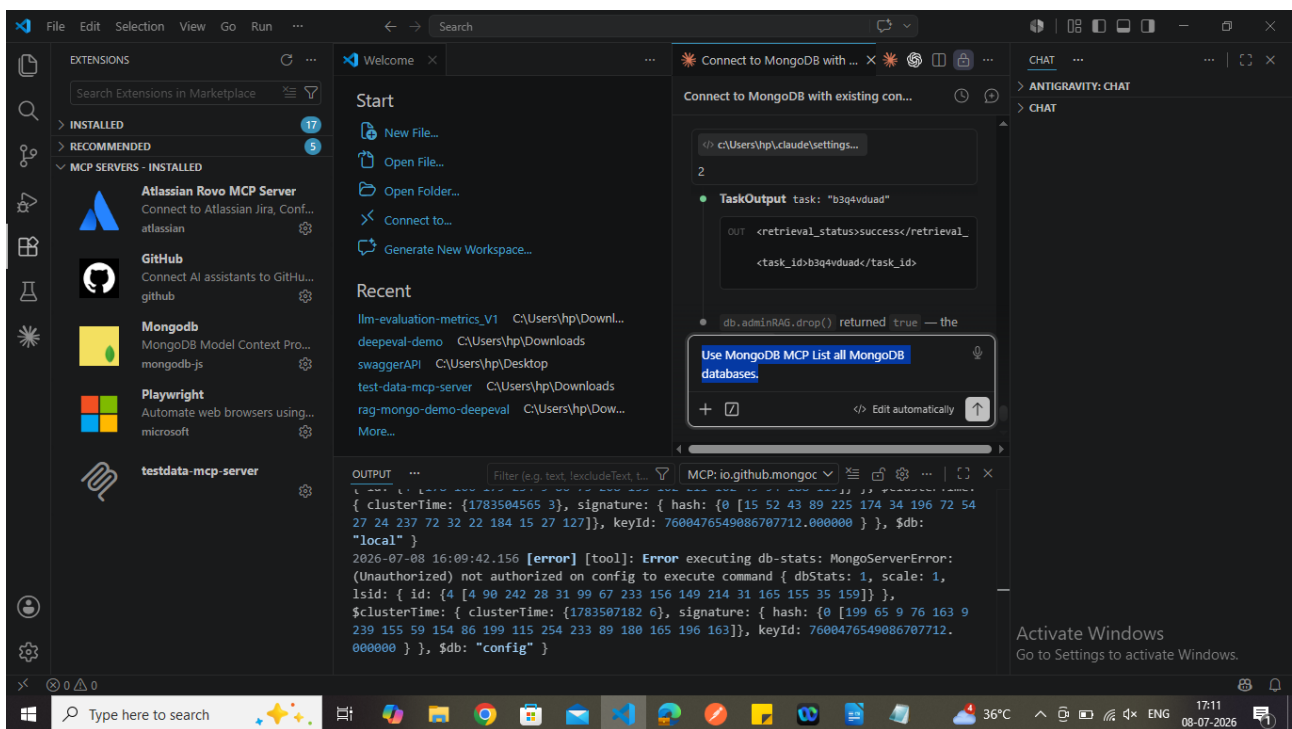

Query : Use MongoDB MCP ,Drop collection adminRAG from adminDB.

Screenshot of the MongoDB Cloud Portal interface, identical to the one above, showing the 'Data Explorer' and the 'This collection has no data' message. The browser tabs and URL are the same. The bottom status bar shows 'Alert System Status: All Good' and 'Activate Windows'.

5) List of database

Query : Use MongoDB MCP List all MongoDB databases.

Use MongoDB MCP List all MongoDB databases.

Current databases on your MongoDB cluster:

Database	Size
RACTest	~2.9 MB
sample_mflix	~130.8 MB
admin	—
local	—

Note admin08 no longer appears — since we dropped its only collection (adminRAG), MongoDB removed the now-empty database automatically.
