

Swagger API Implementation

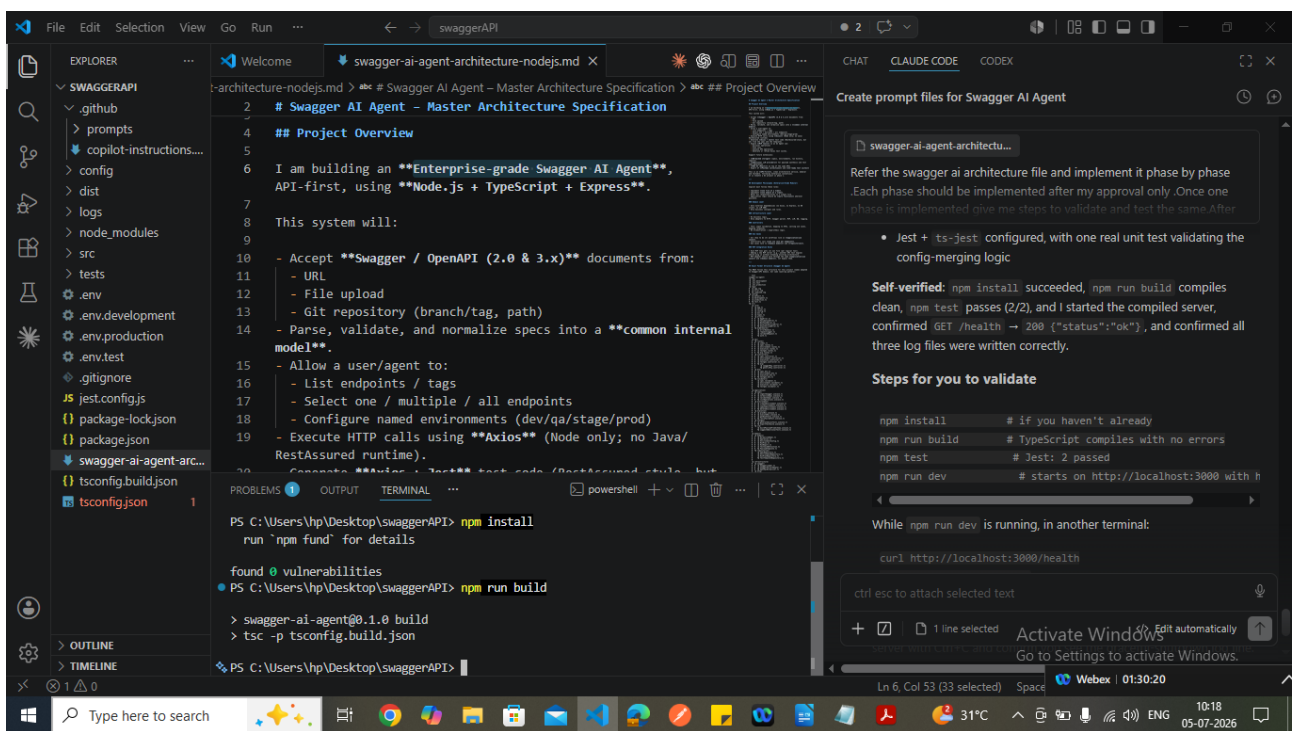

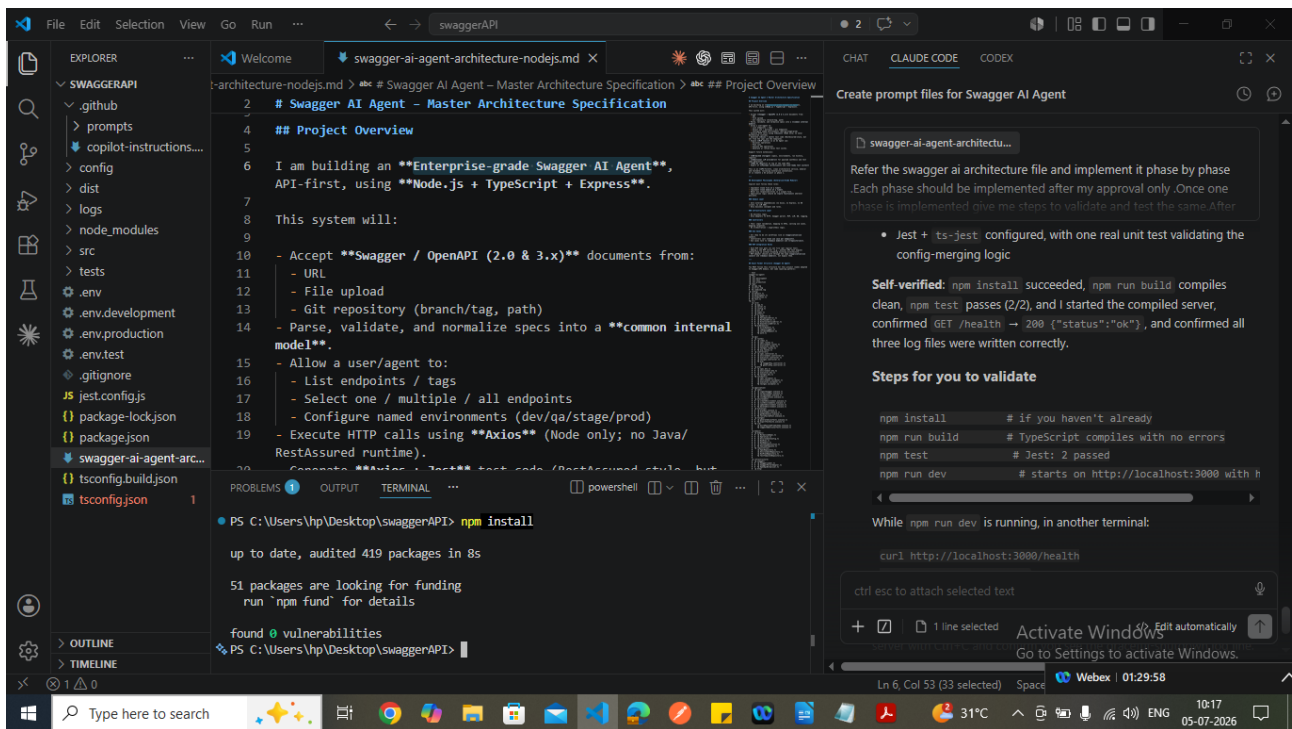

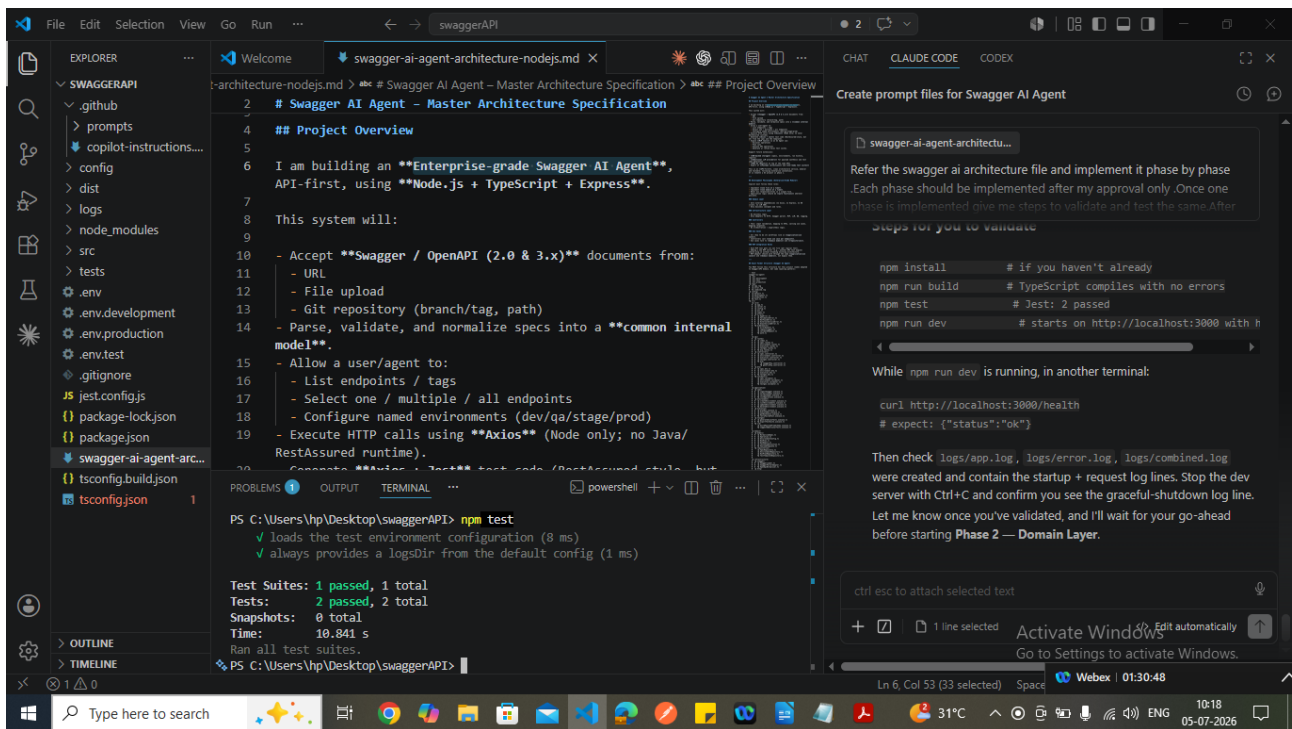

Phase 1 – Project Setup implementation is done

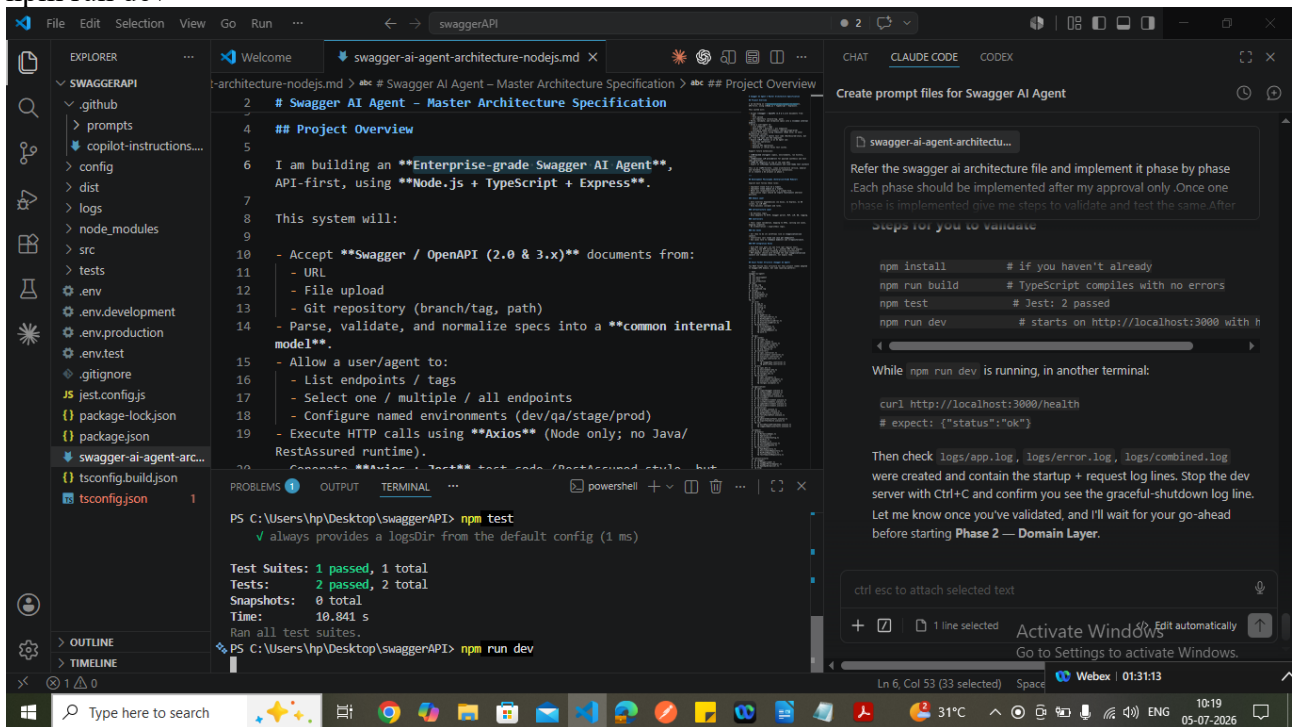

validating Phase 1

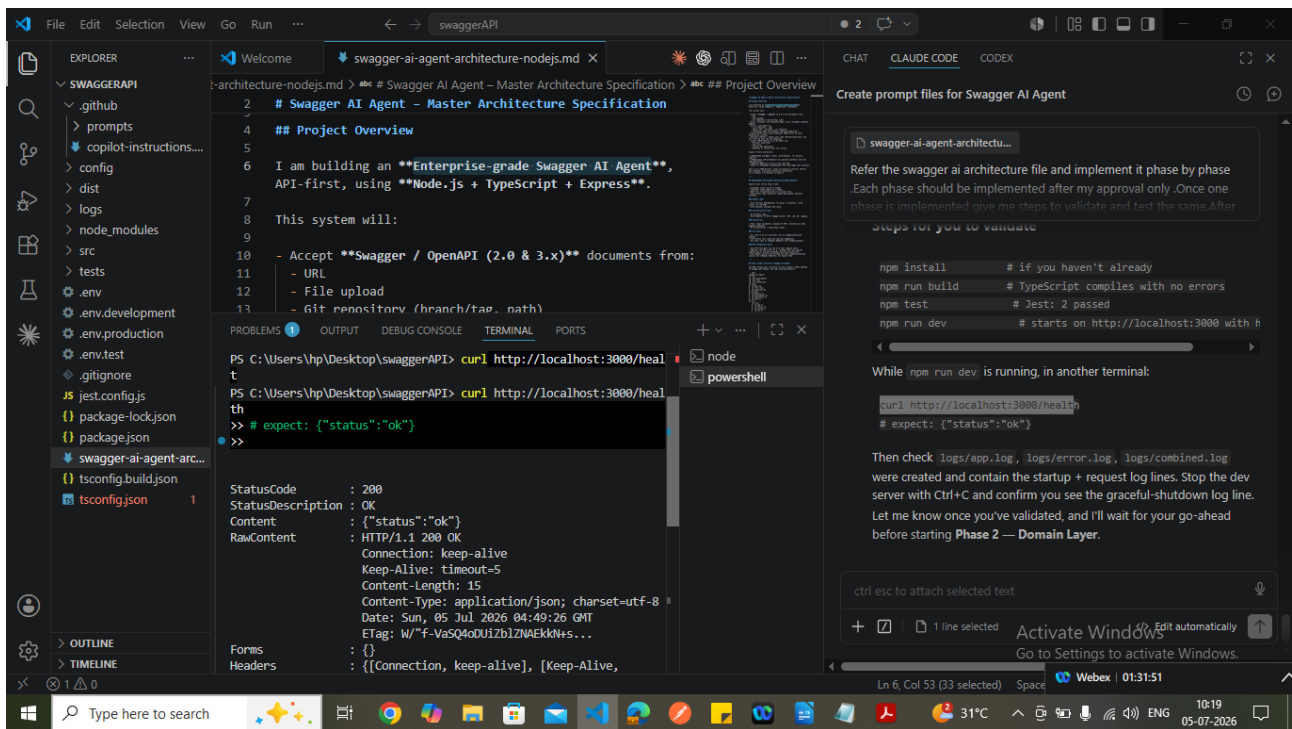

npm test

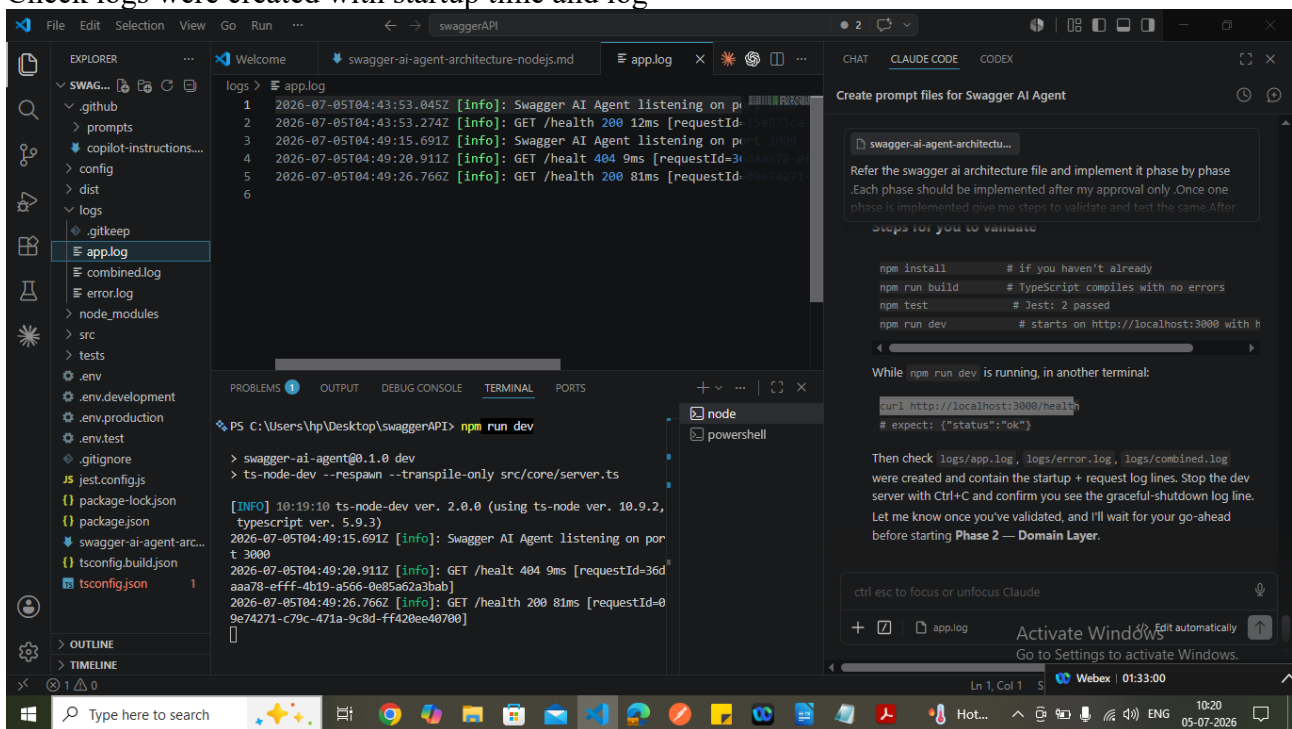

npm run dev

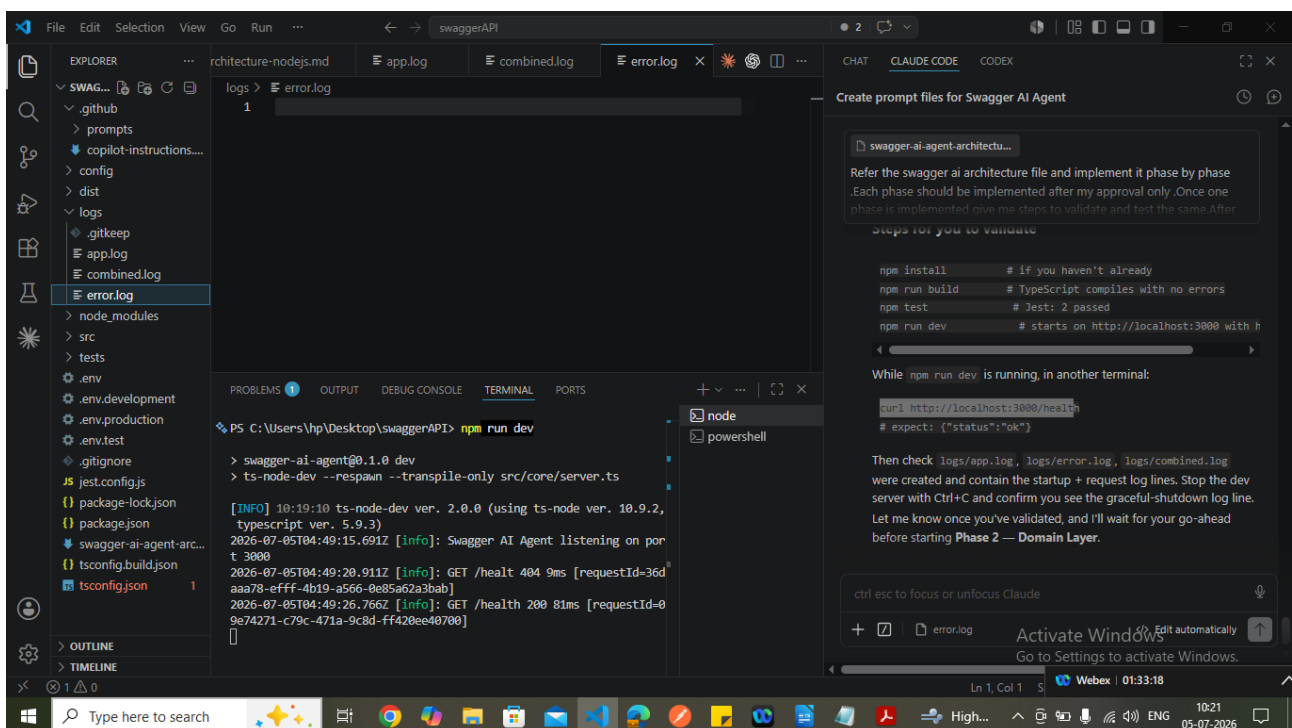

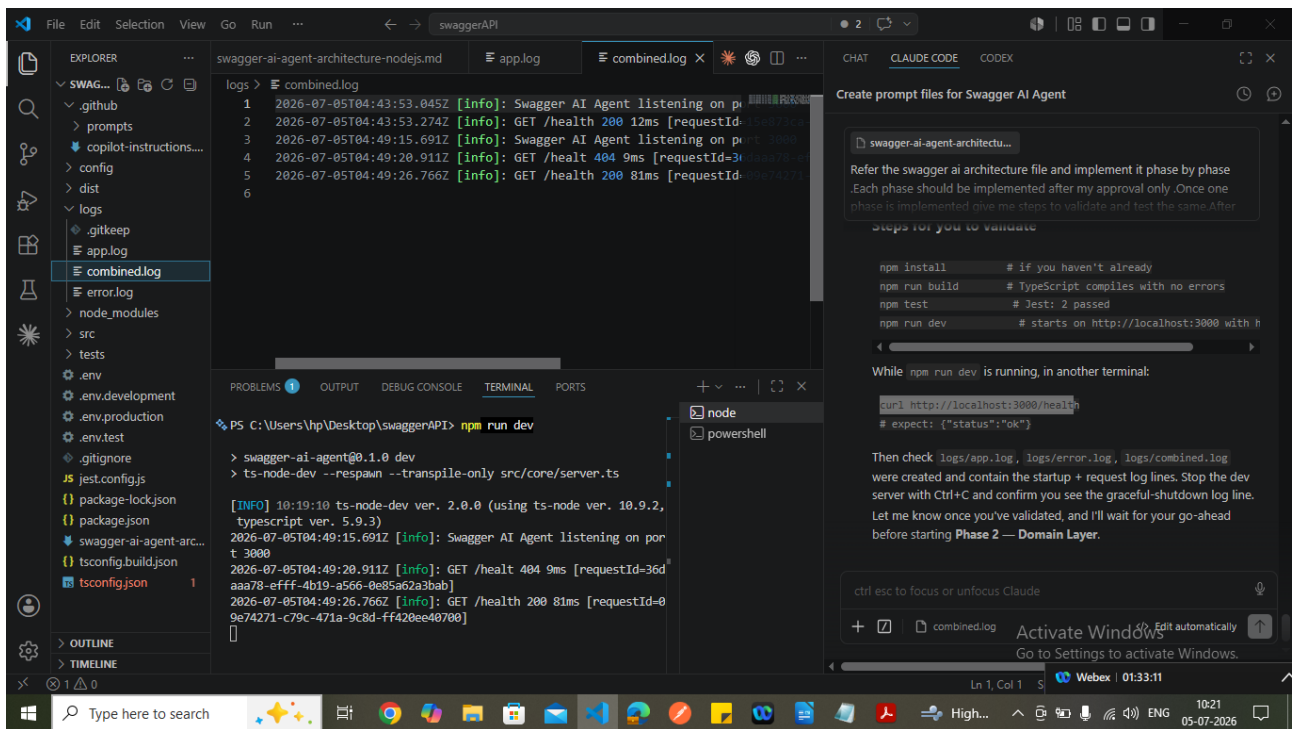

open another terminal and except status as ok

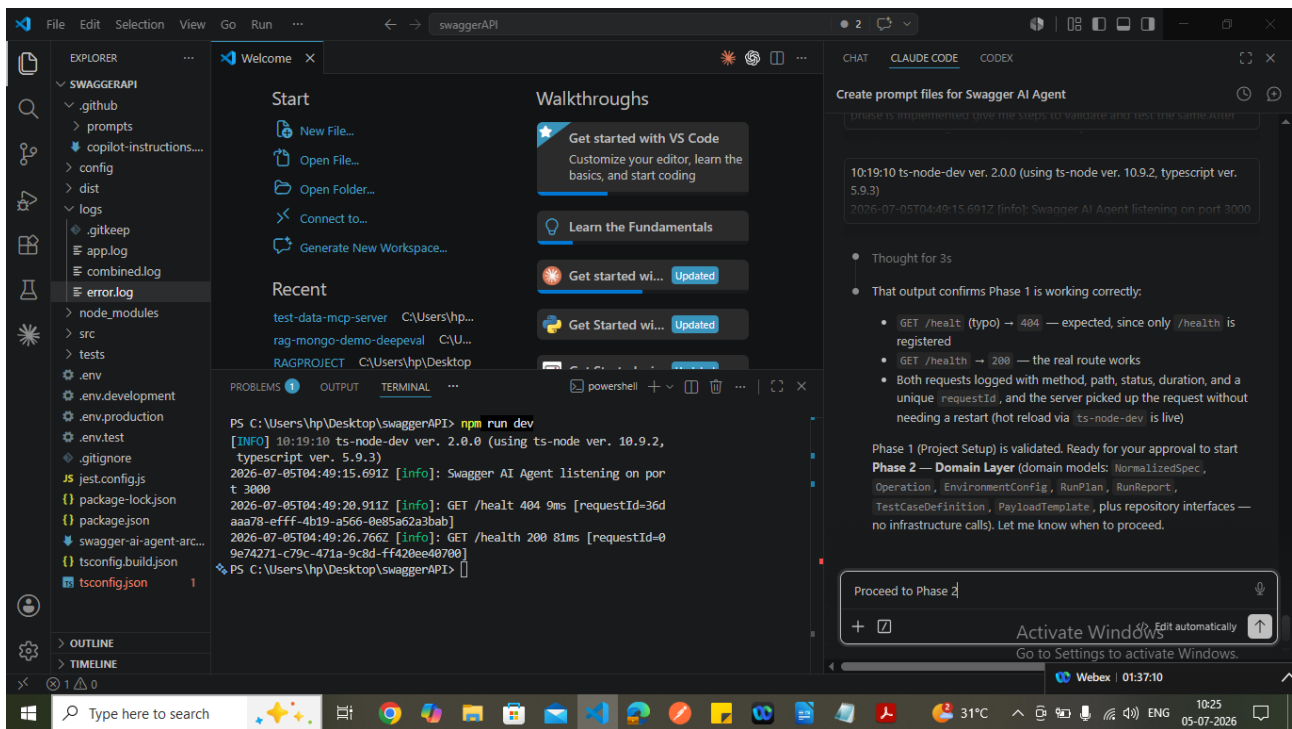

Check logs were created with startup time and log

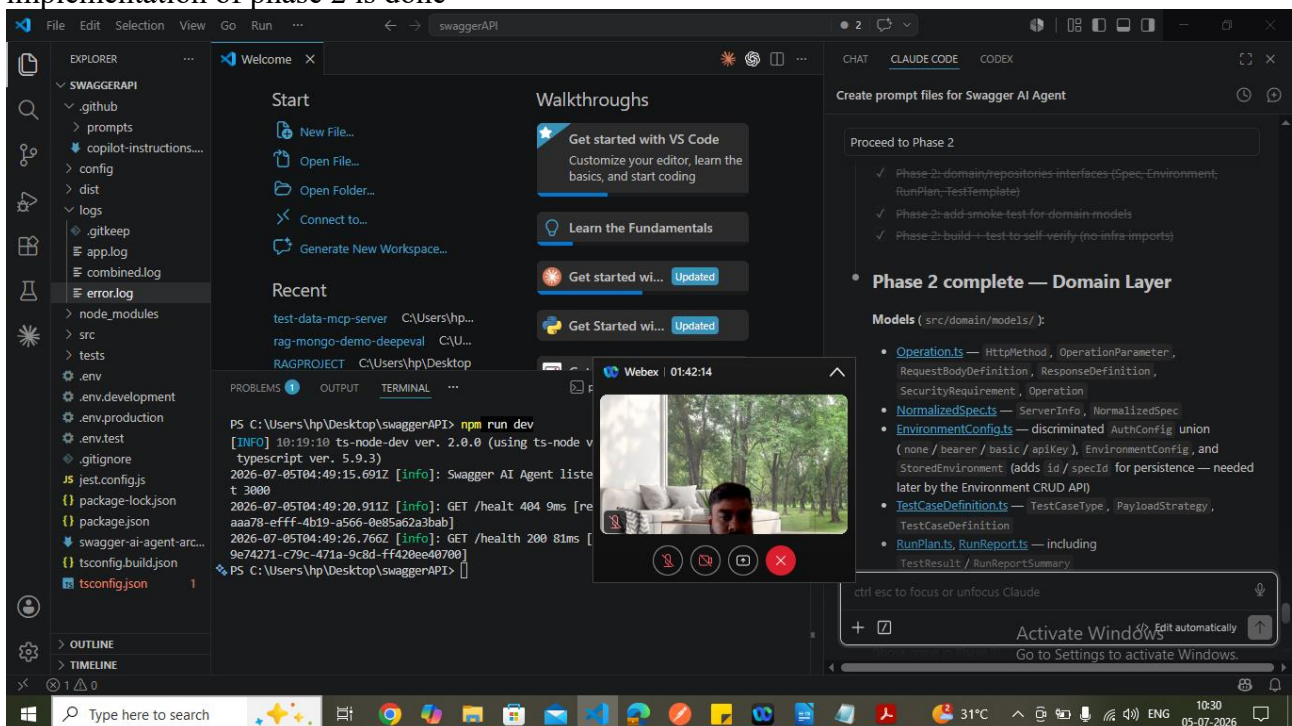

Proceeding to Phase 2 – Domain Layer implementation

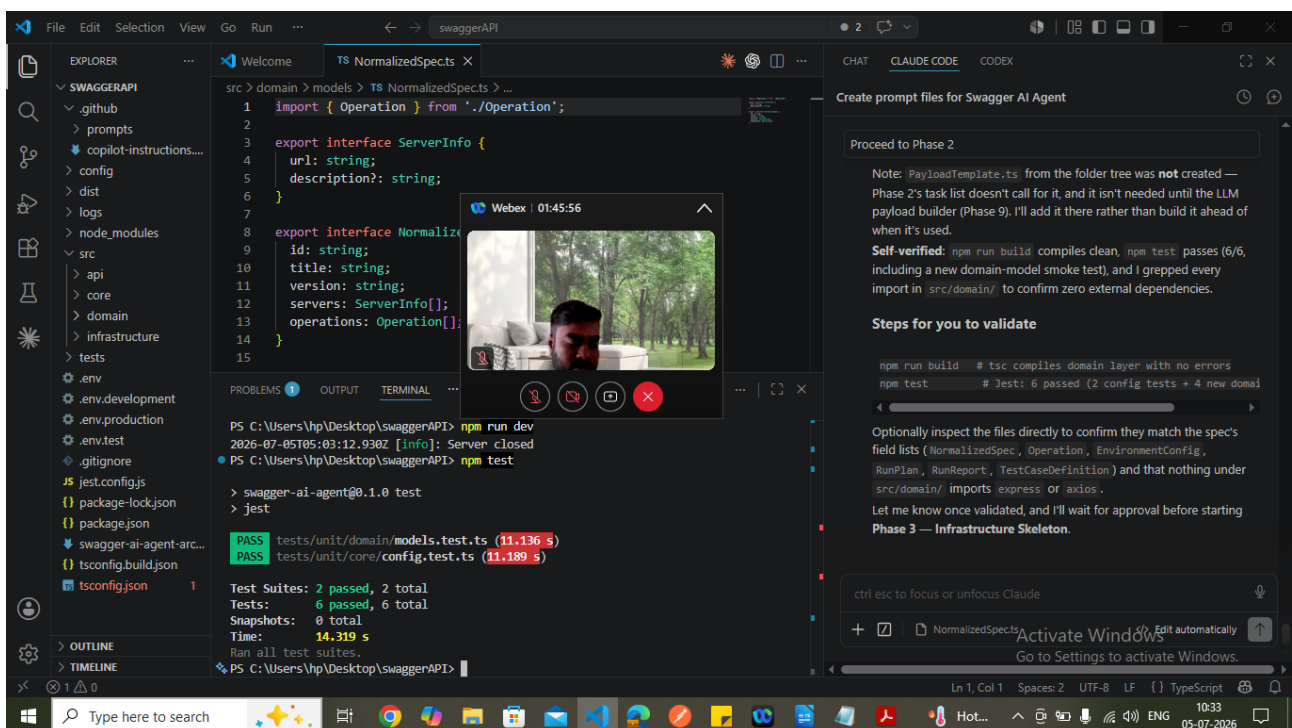

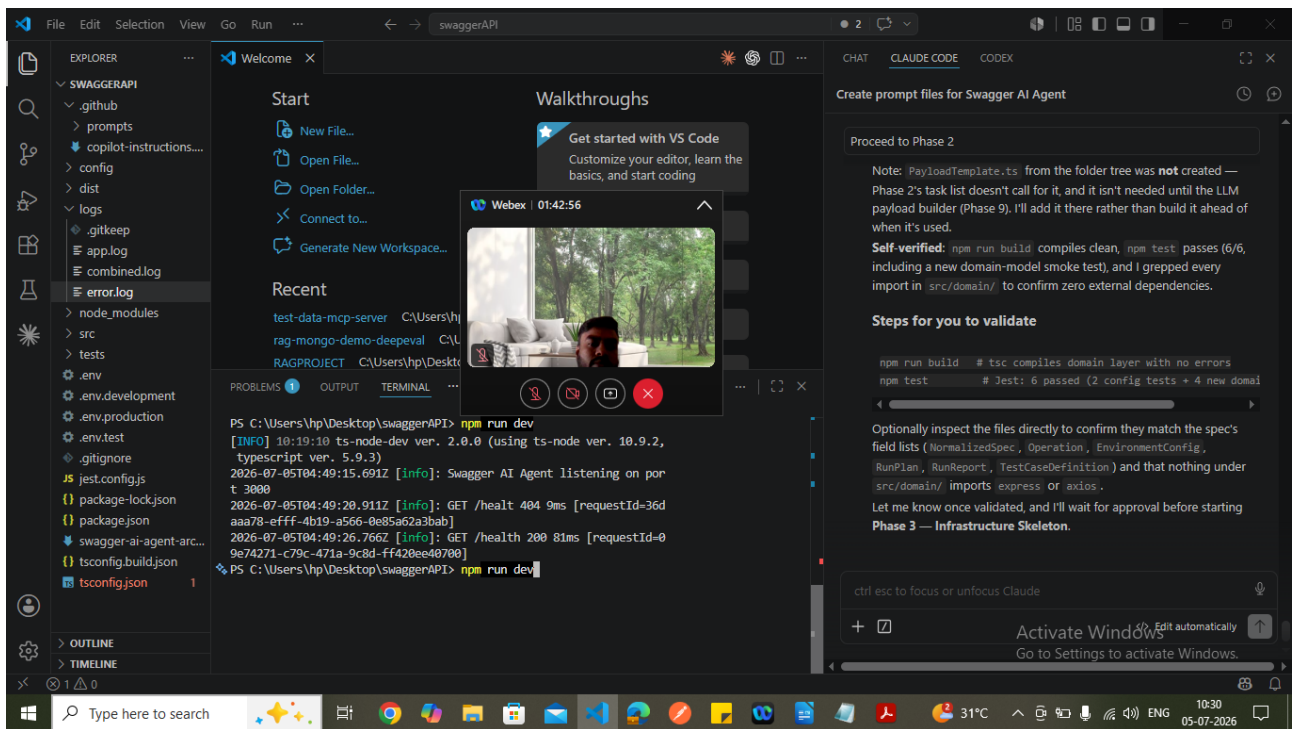

implementation of phase 2 is done

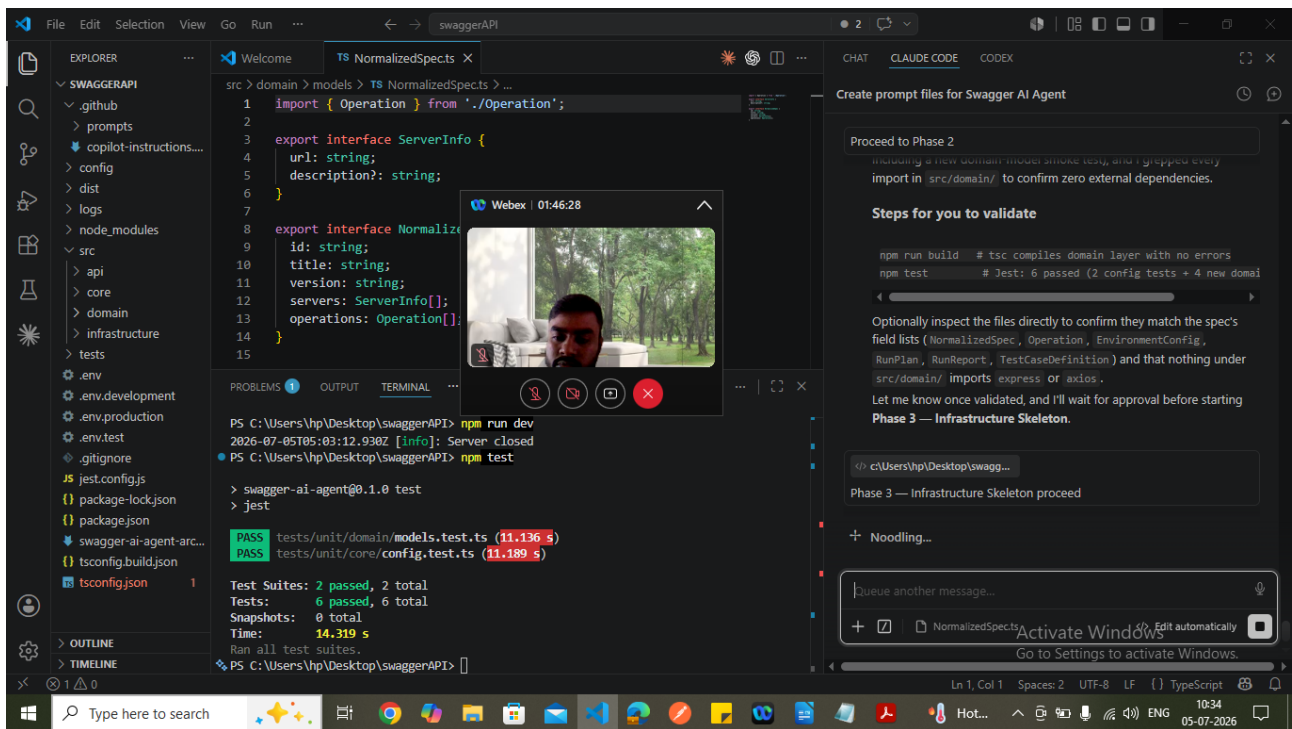

validating phase 2

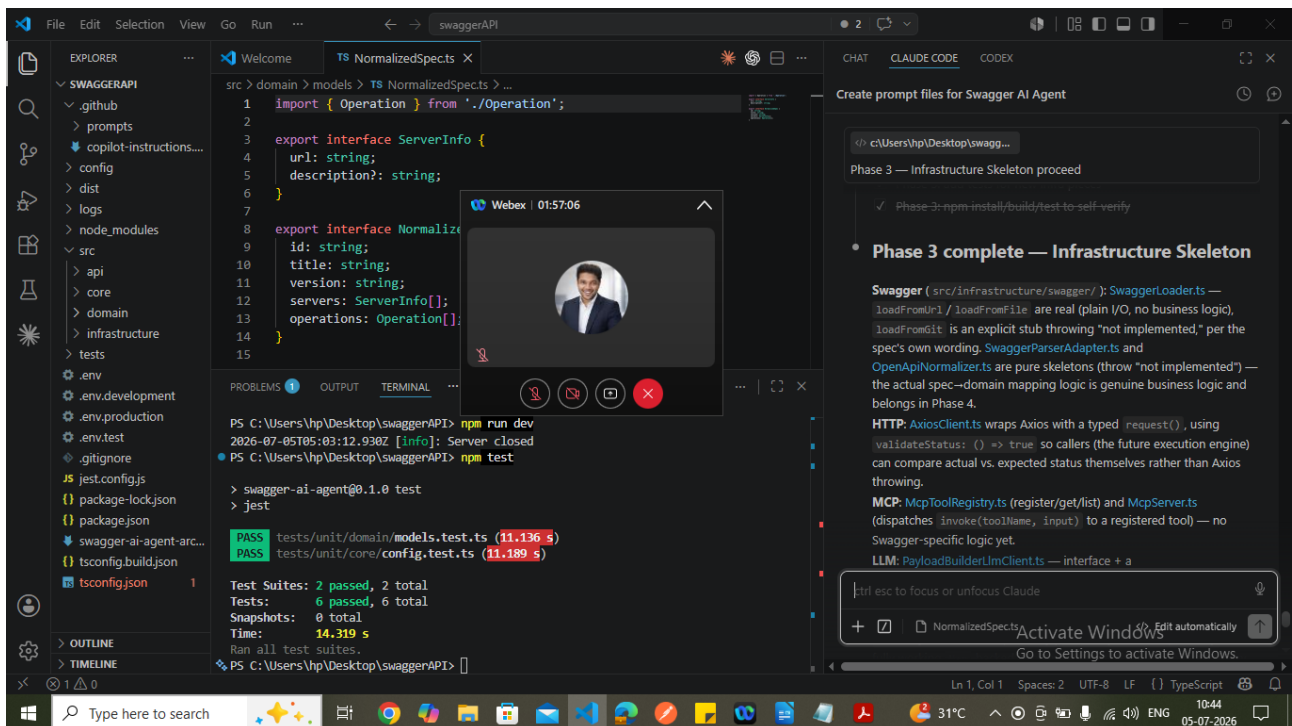

running npm run dev to check no errors

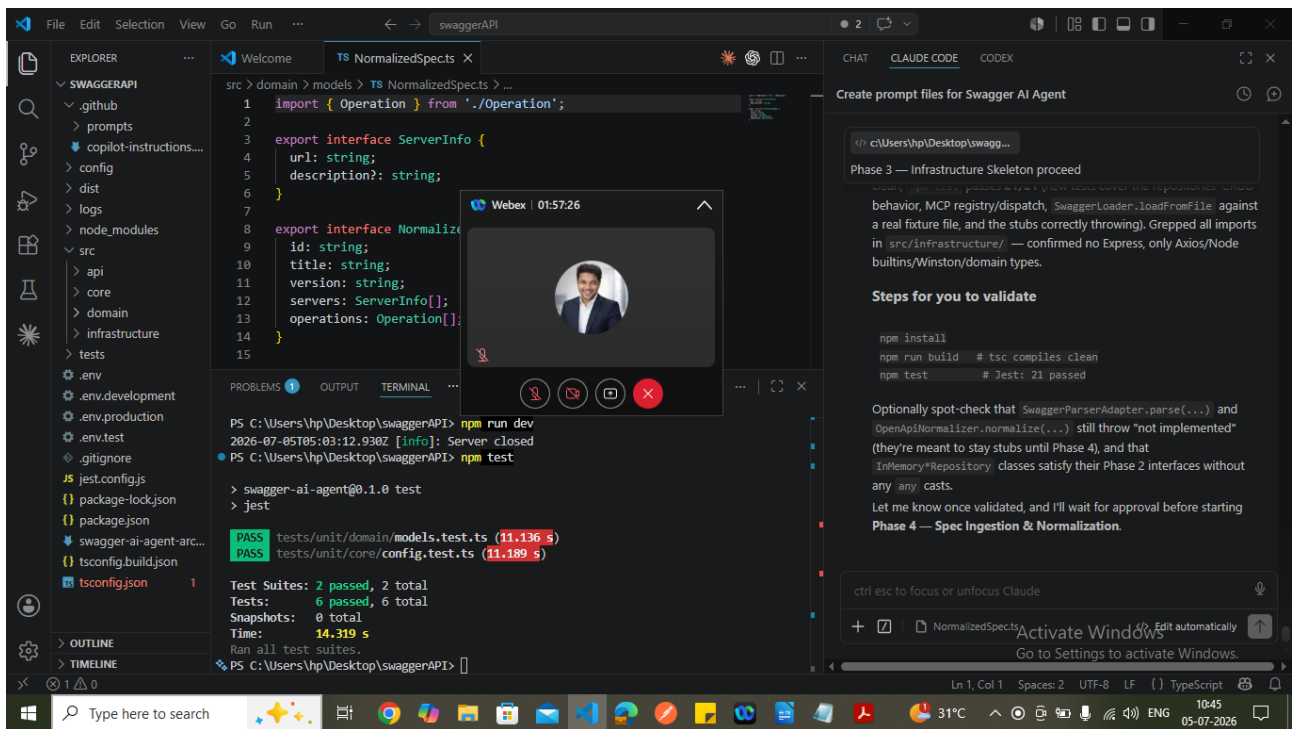

Proceed to implement Phase 3 — Infrastructure Skeleton

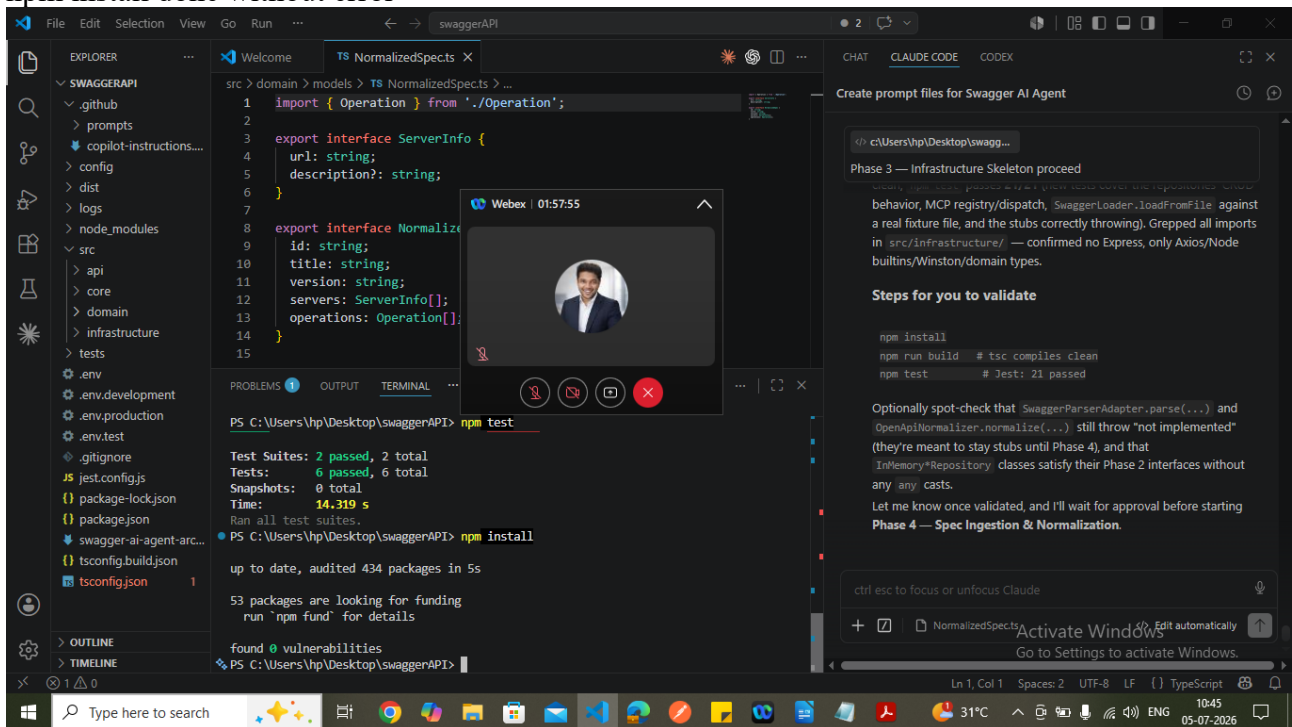

implementation of Phase 3 is done

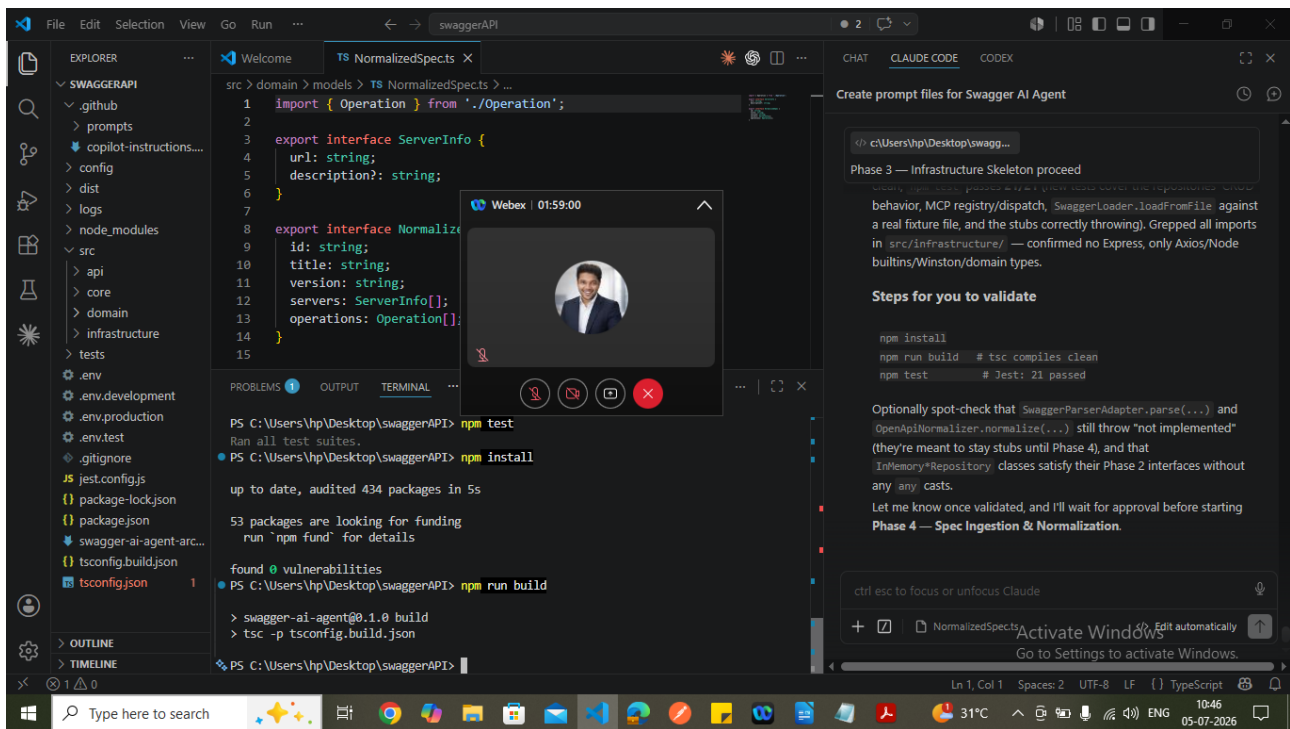

validating Phase 3

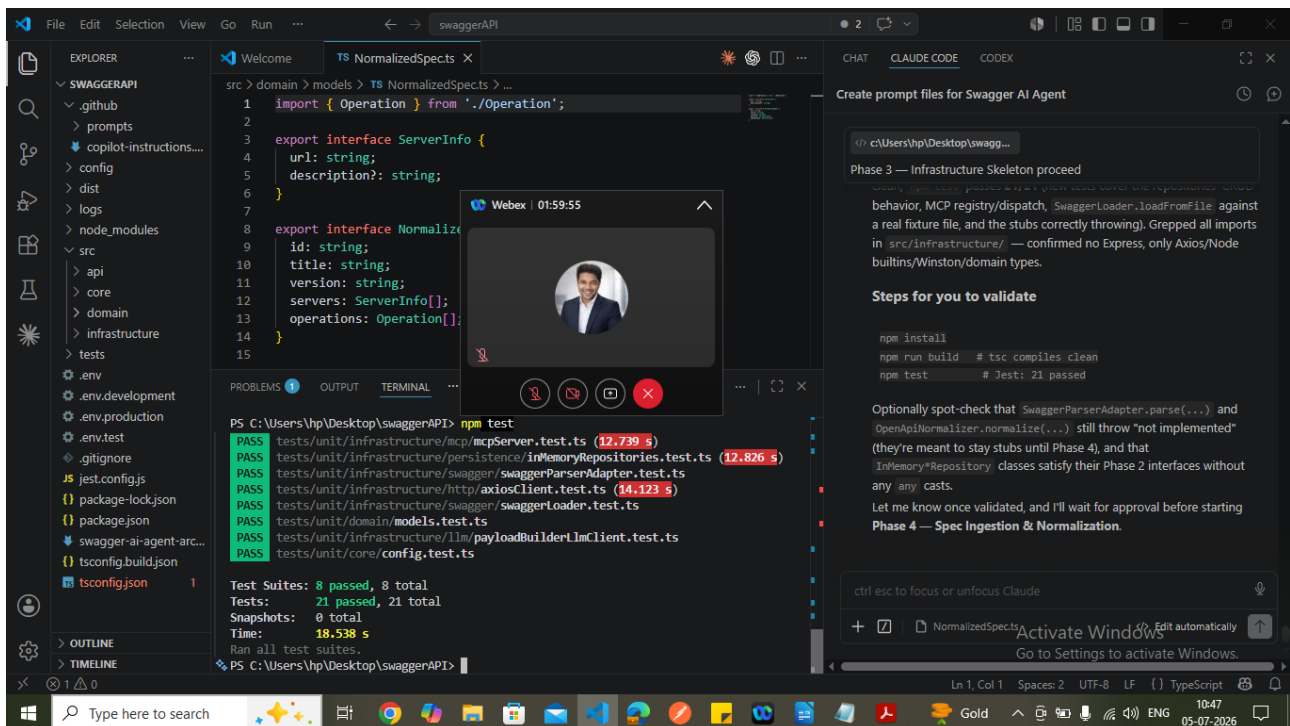

npm install done without error

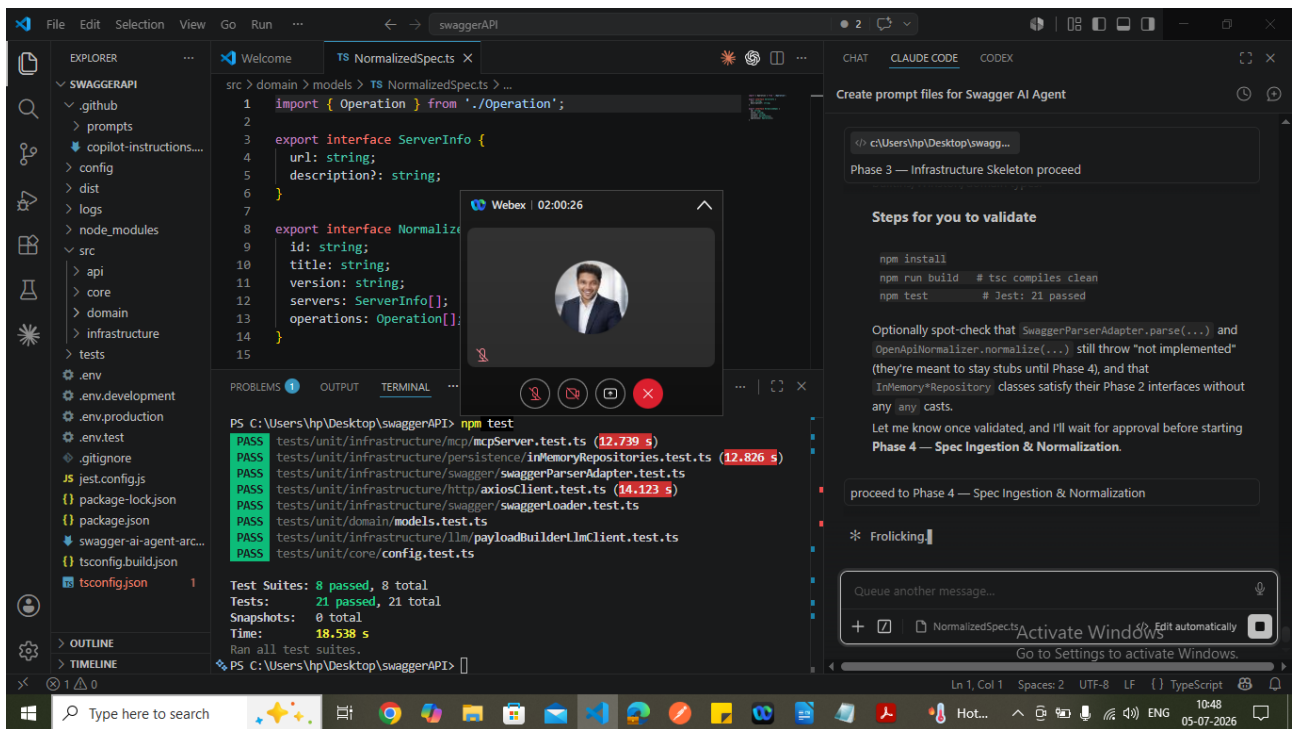

npm run build with no compile errors

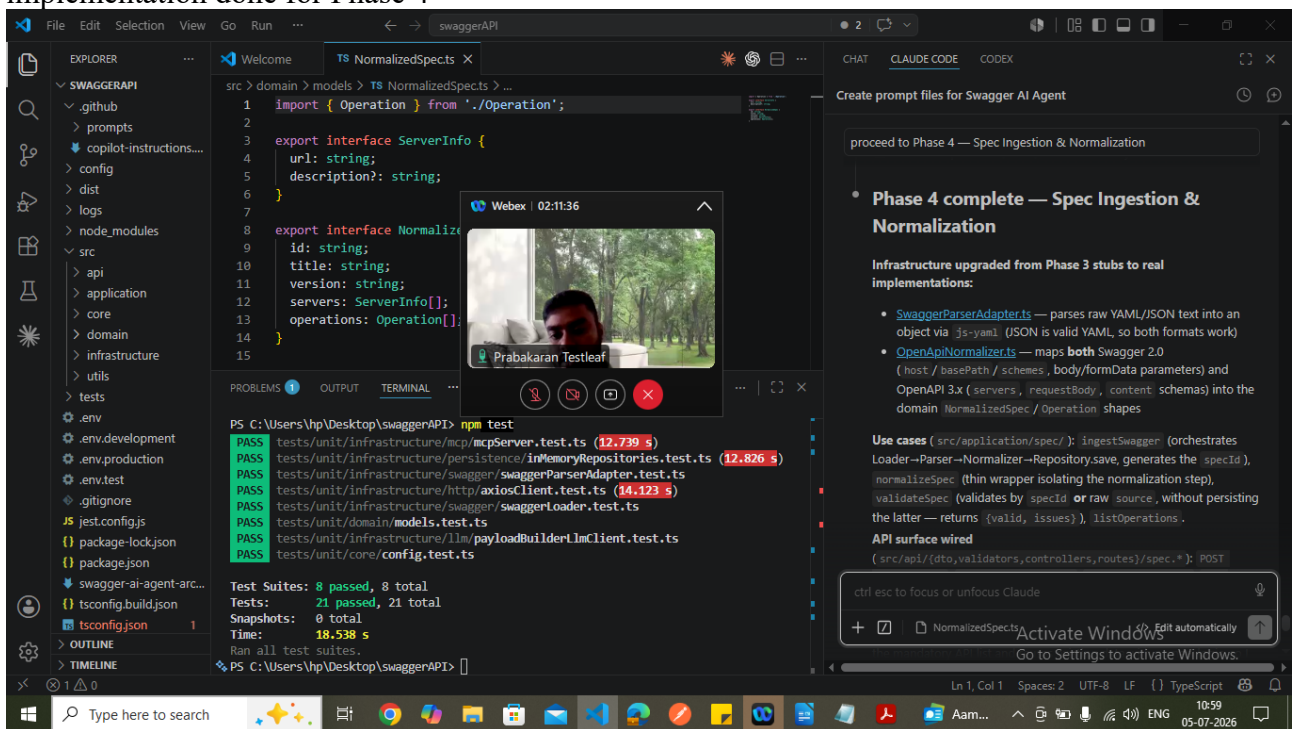

npm test to get 21 passes status

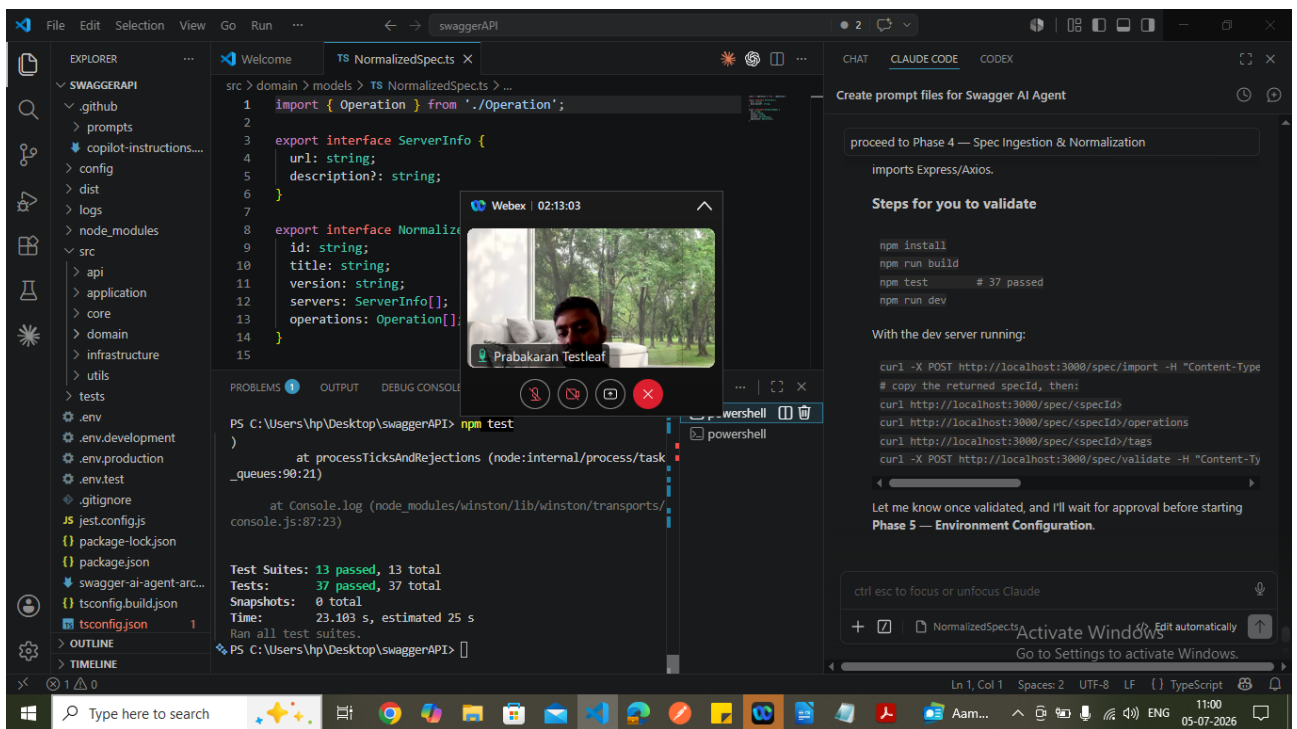

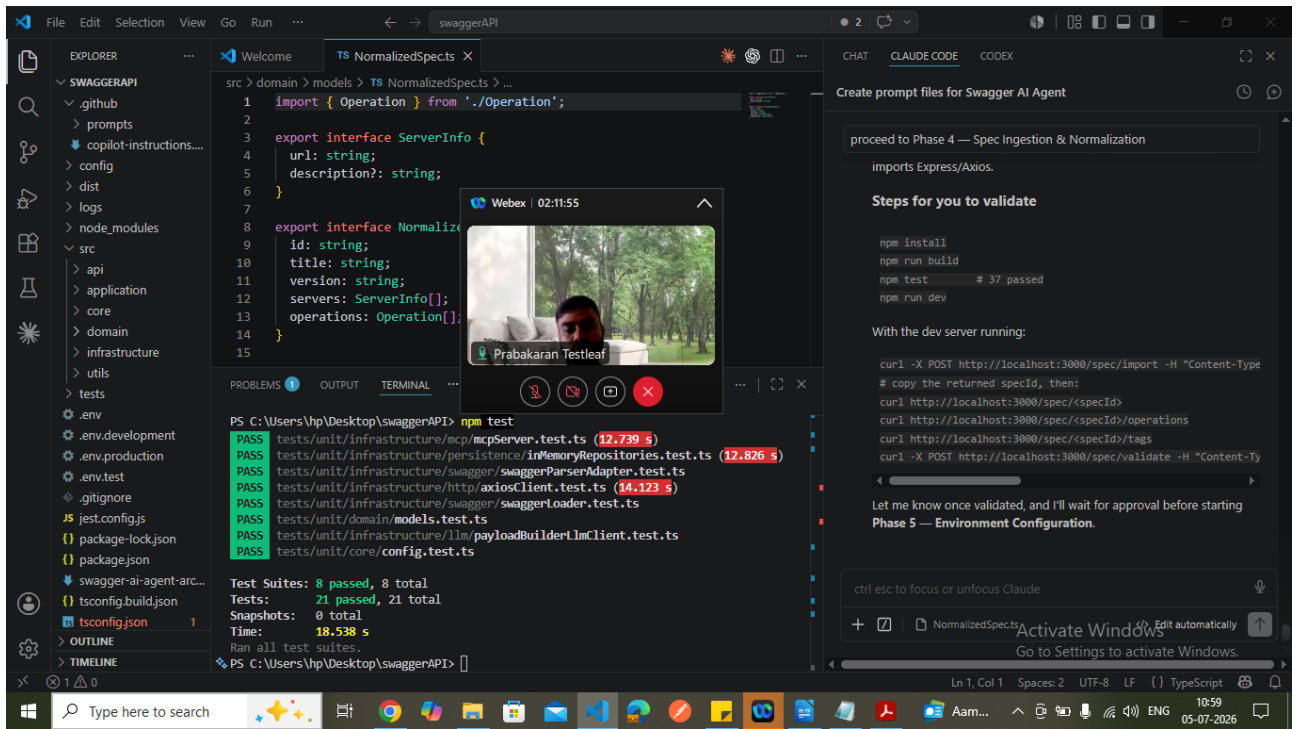

proceeding to implement Phase 4 — Spec Ingestion & Normalization

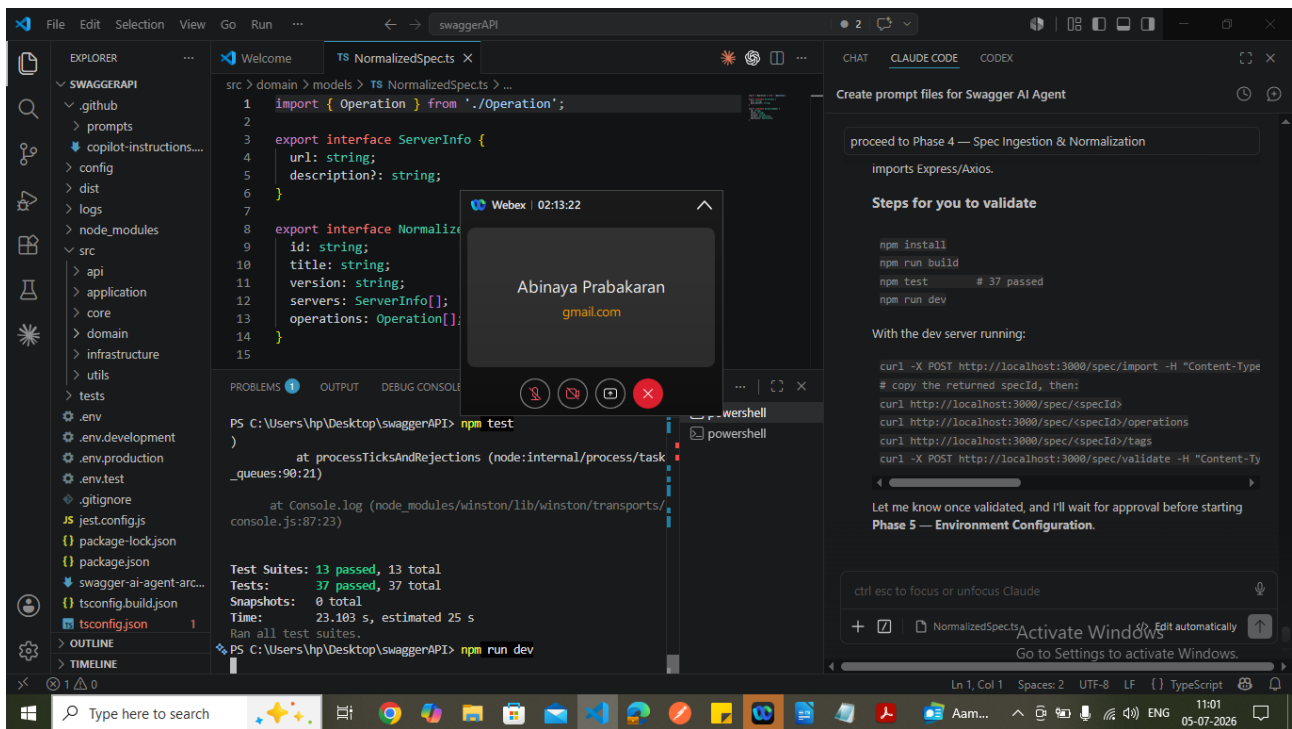

implementation done for Phase 4

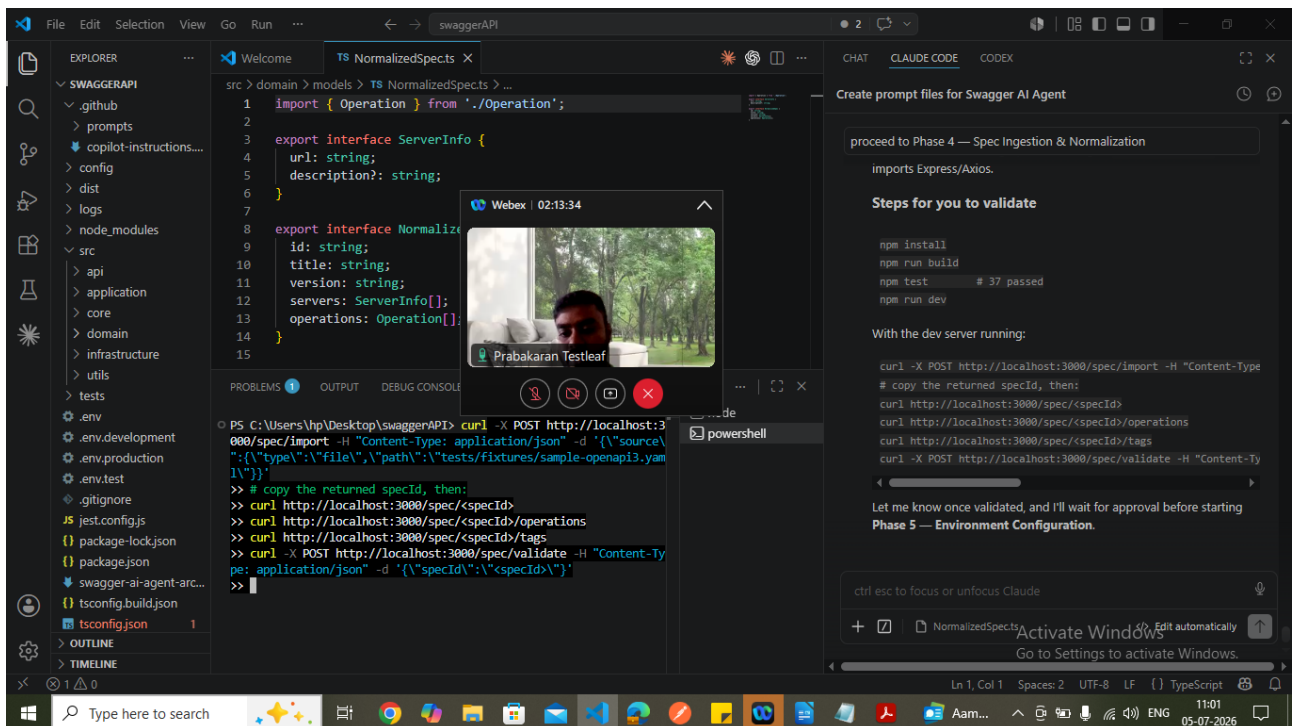

validating Phase 4

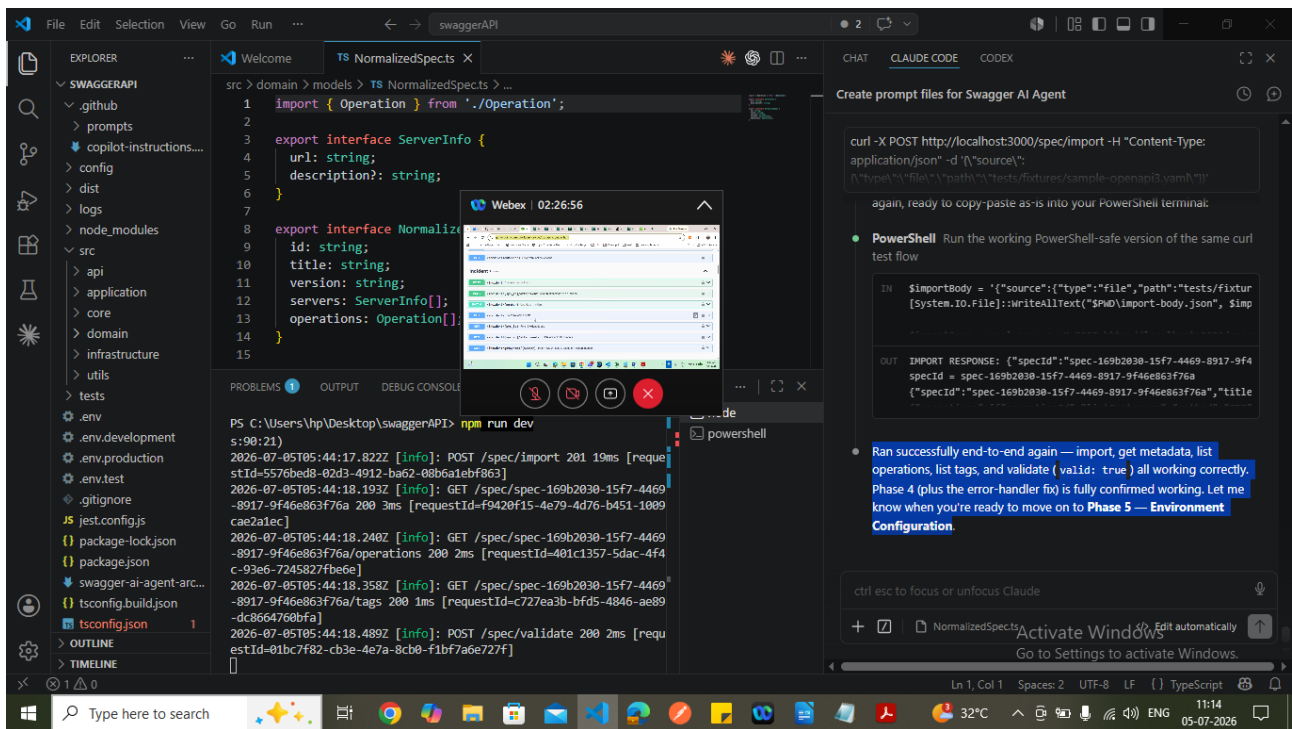

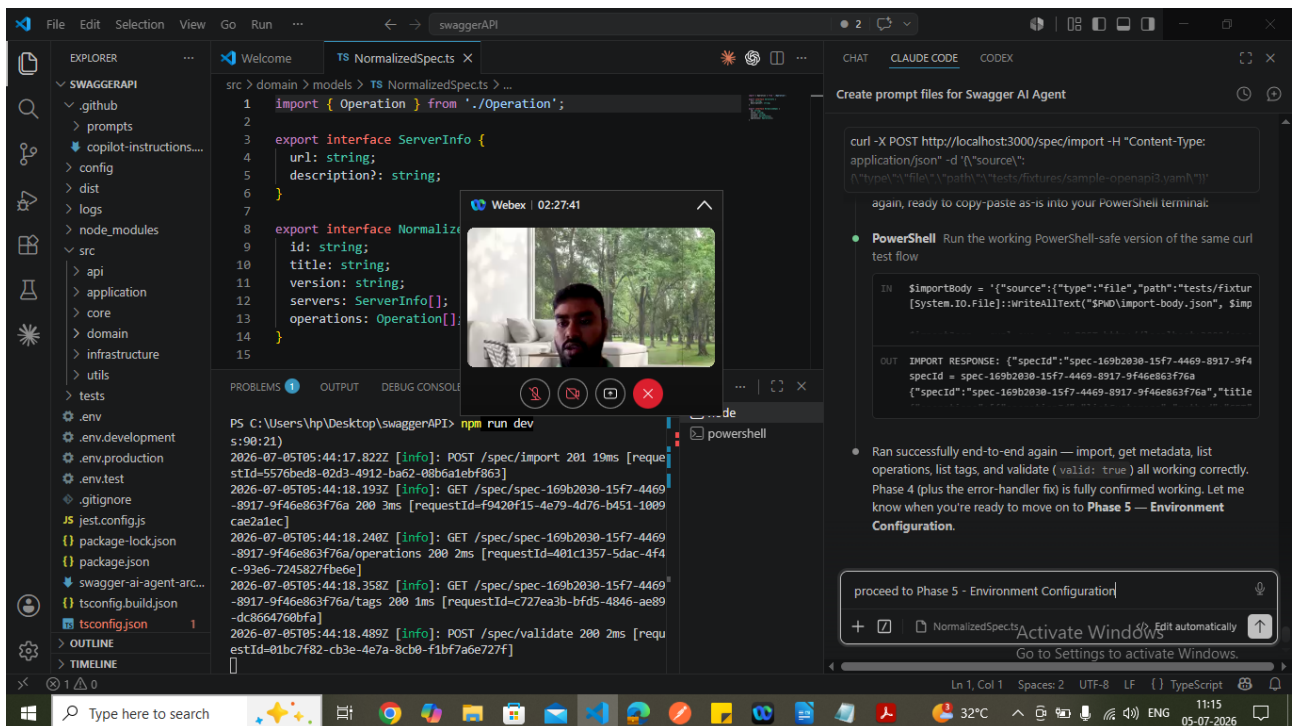

ran npm run dev and run the command

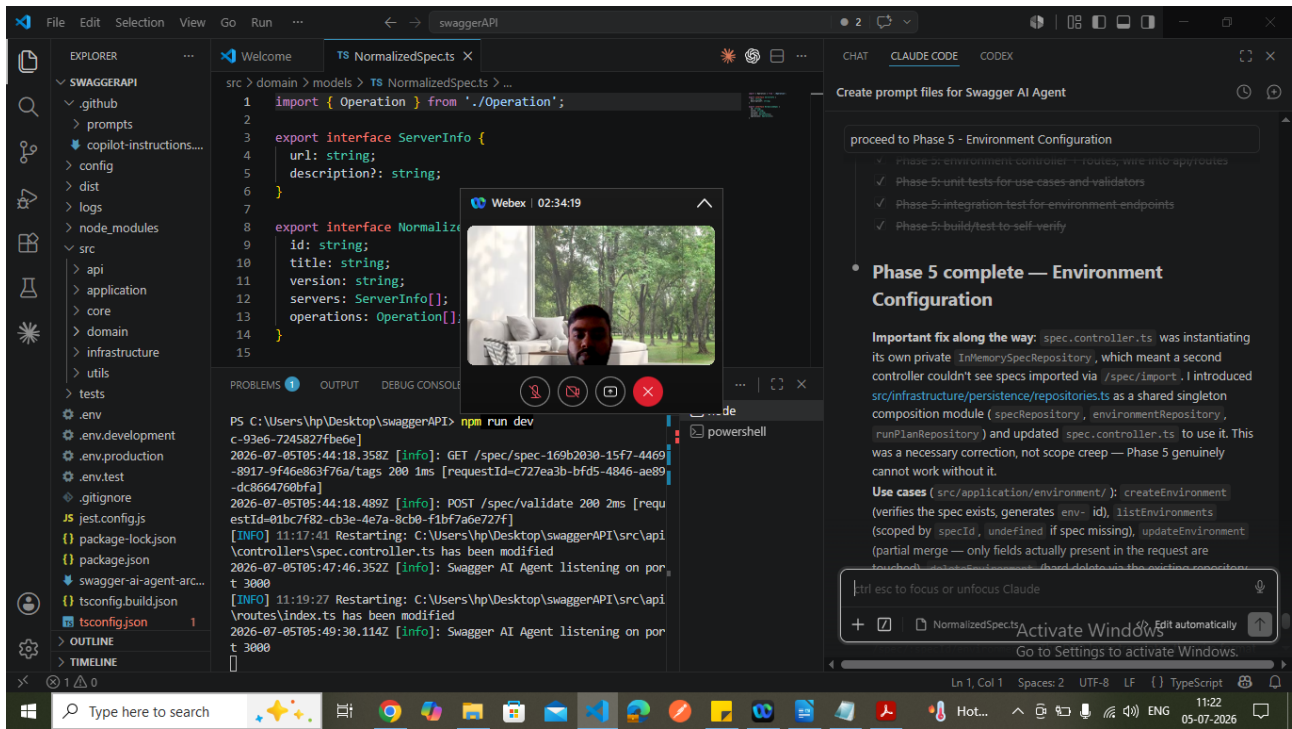

Validation is done

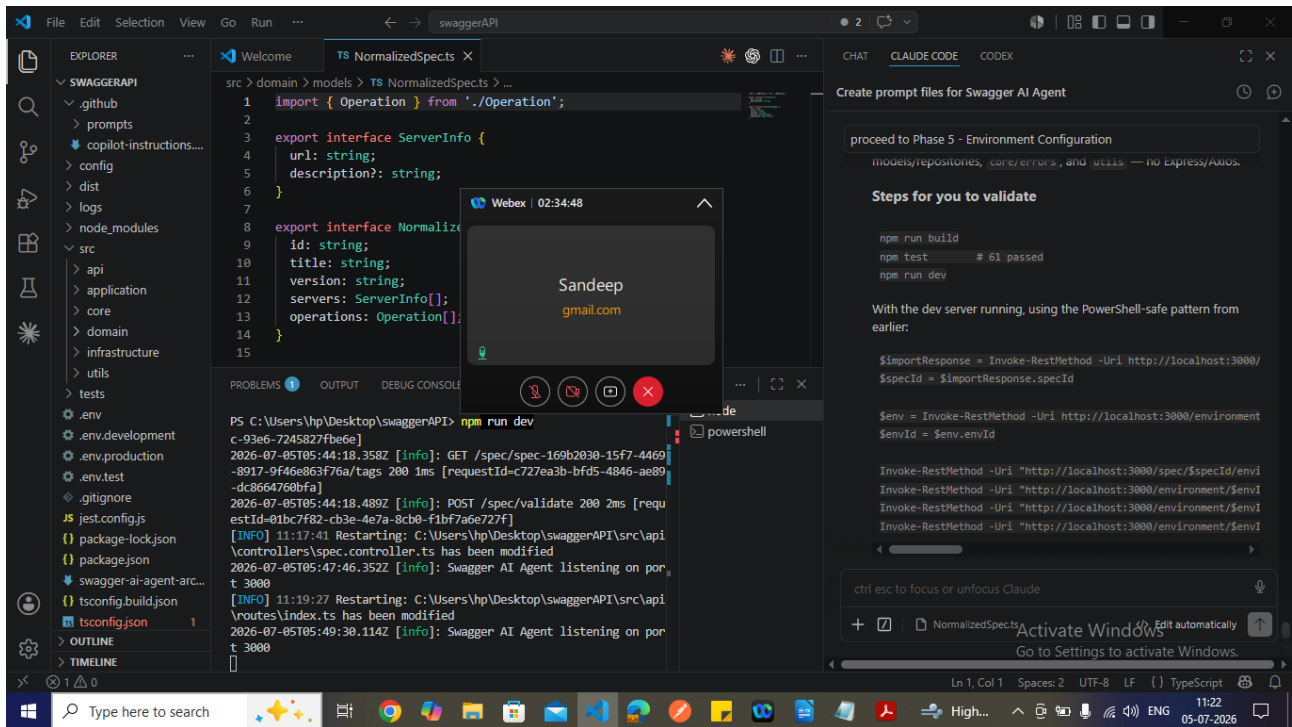

proceeding to Phase 5 — Environment Configuration

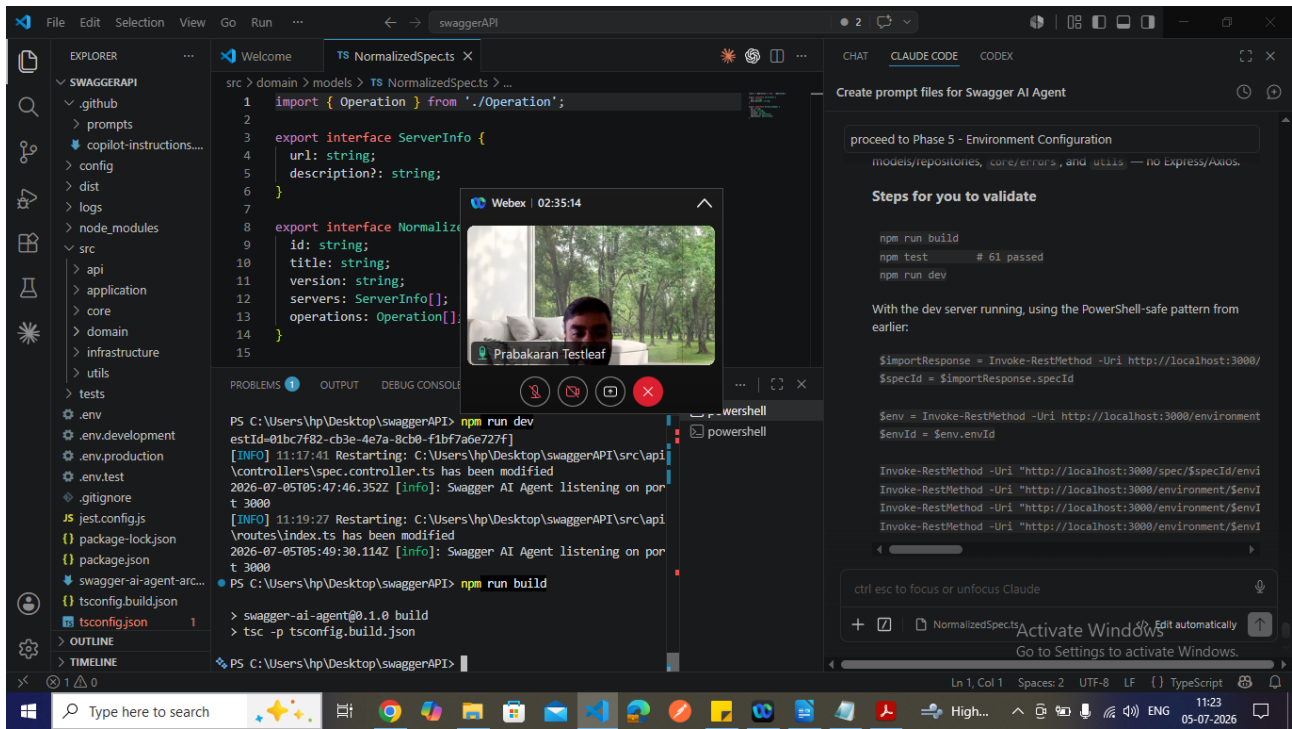

implementation of Phase 5 is completed

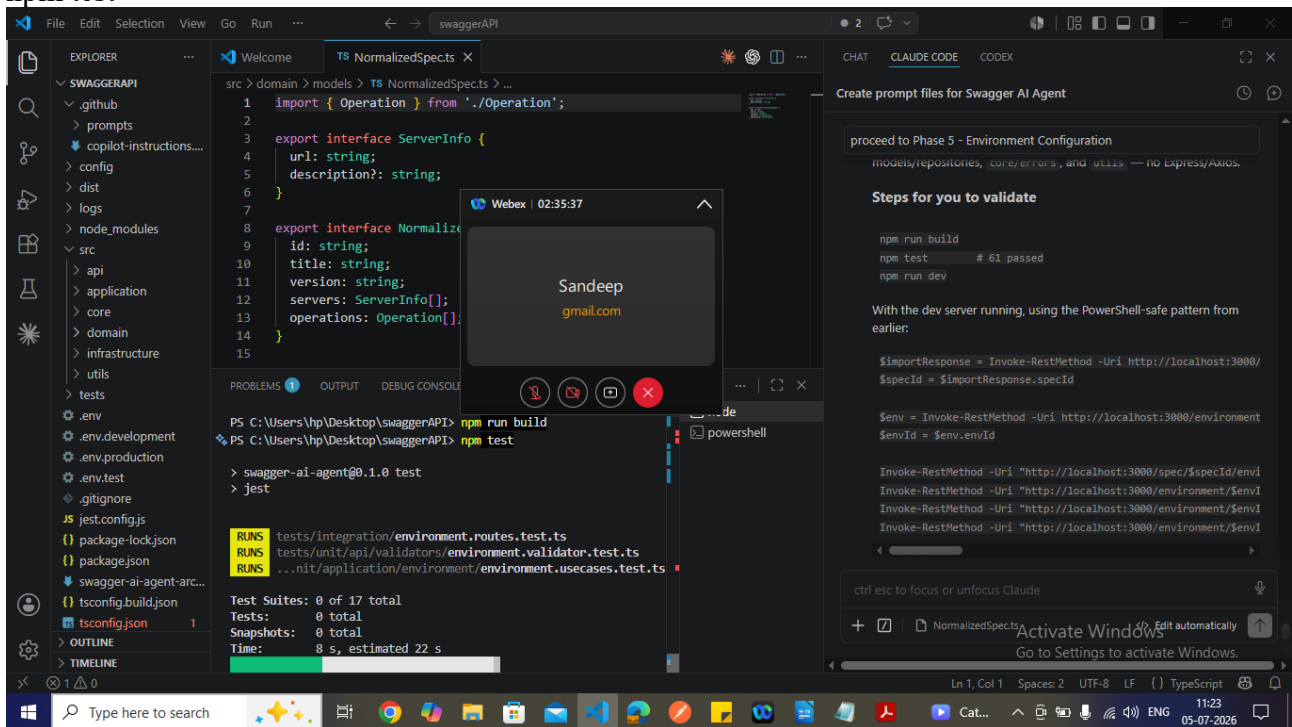

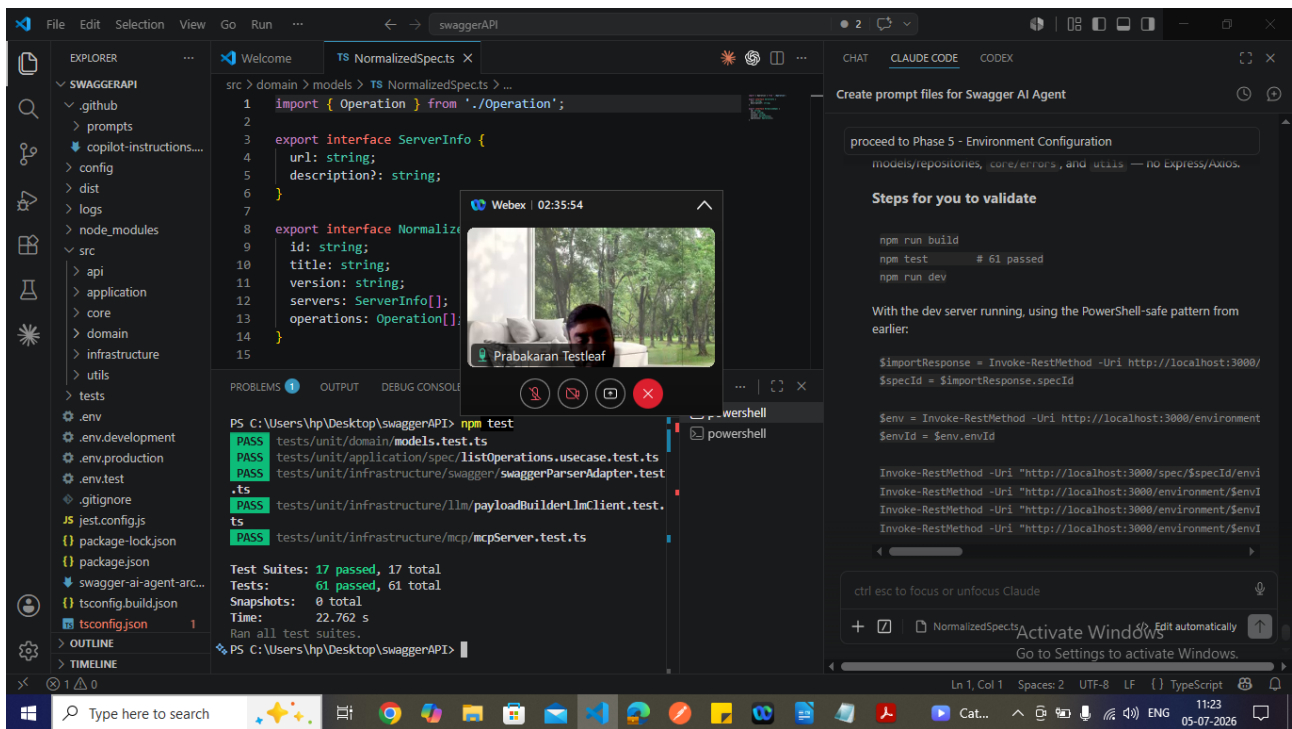

validate Phase 5

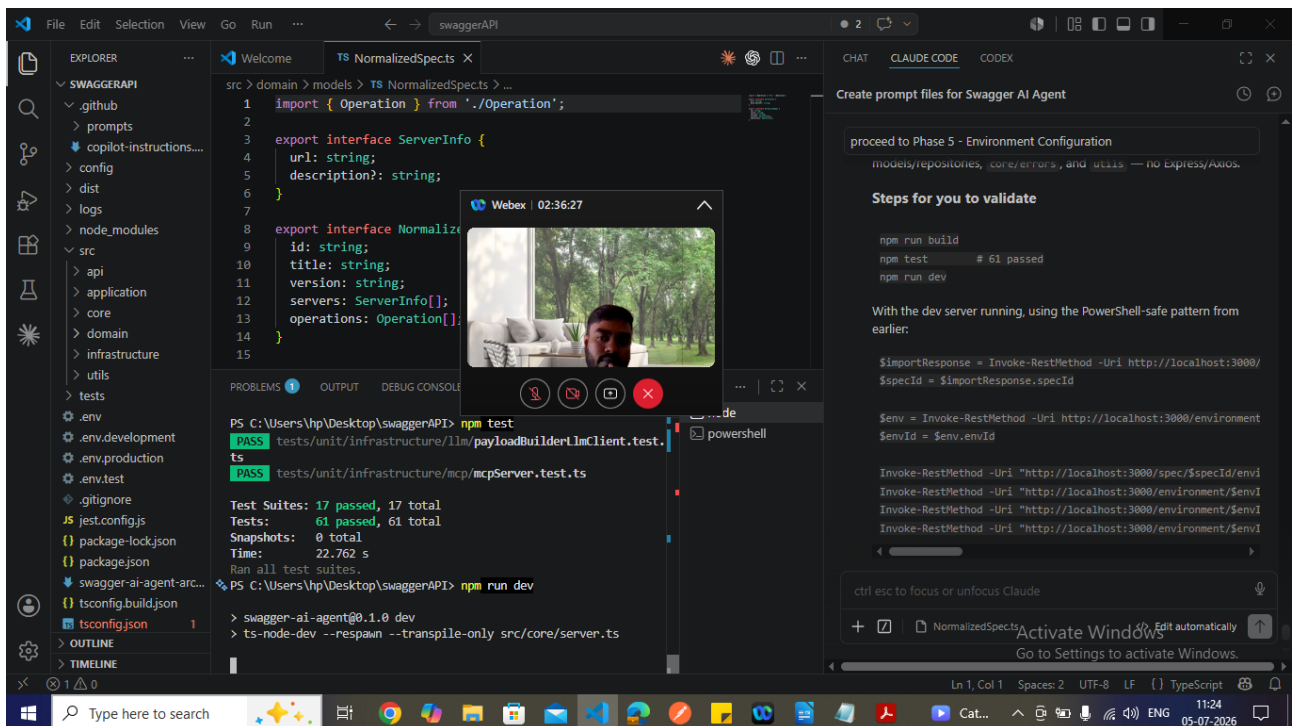

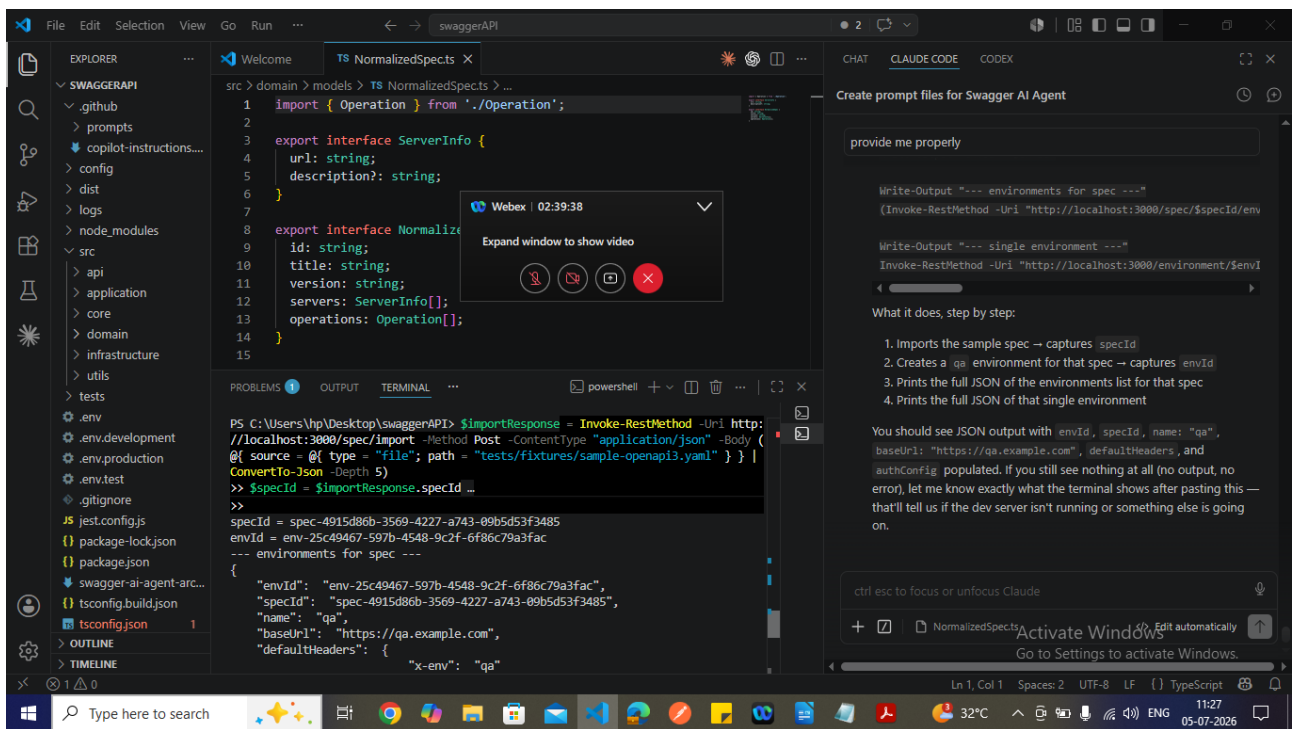

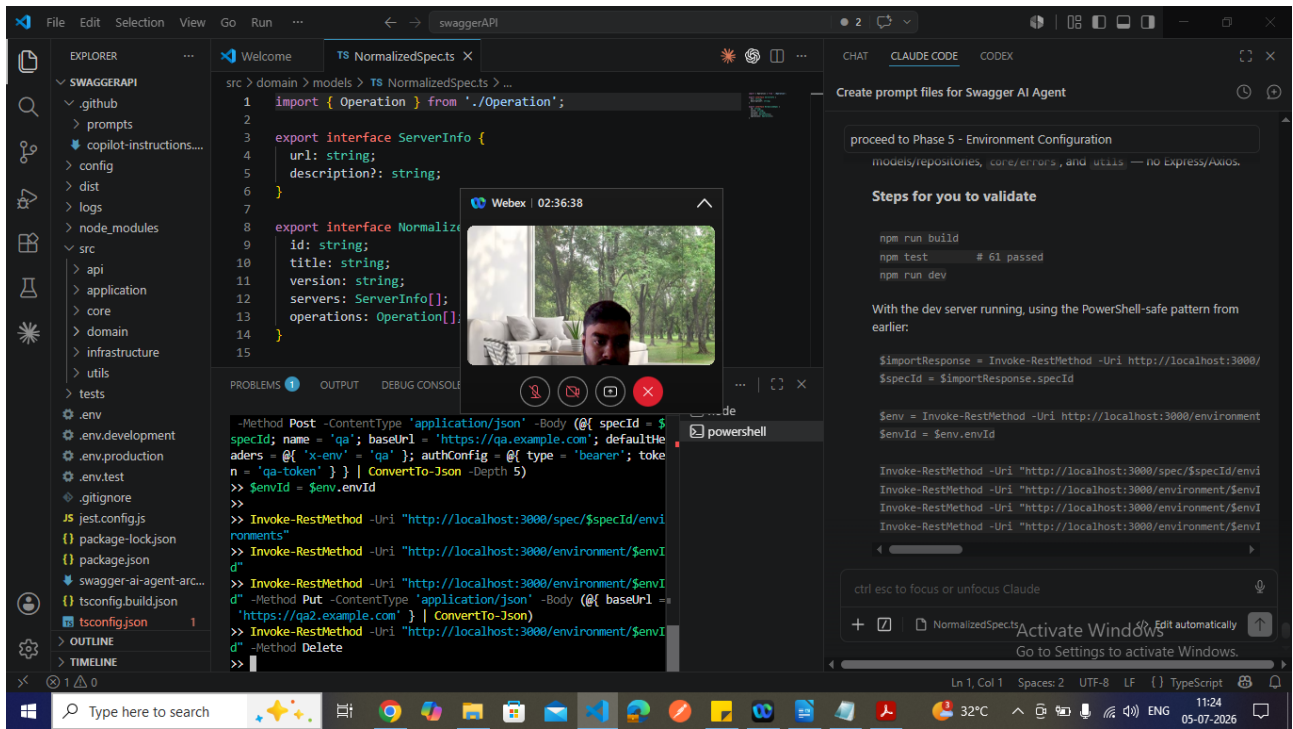

npm test

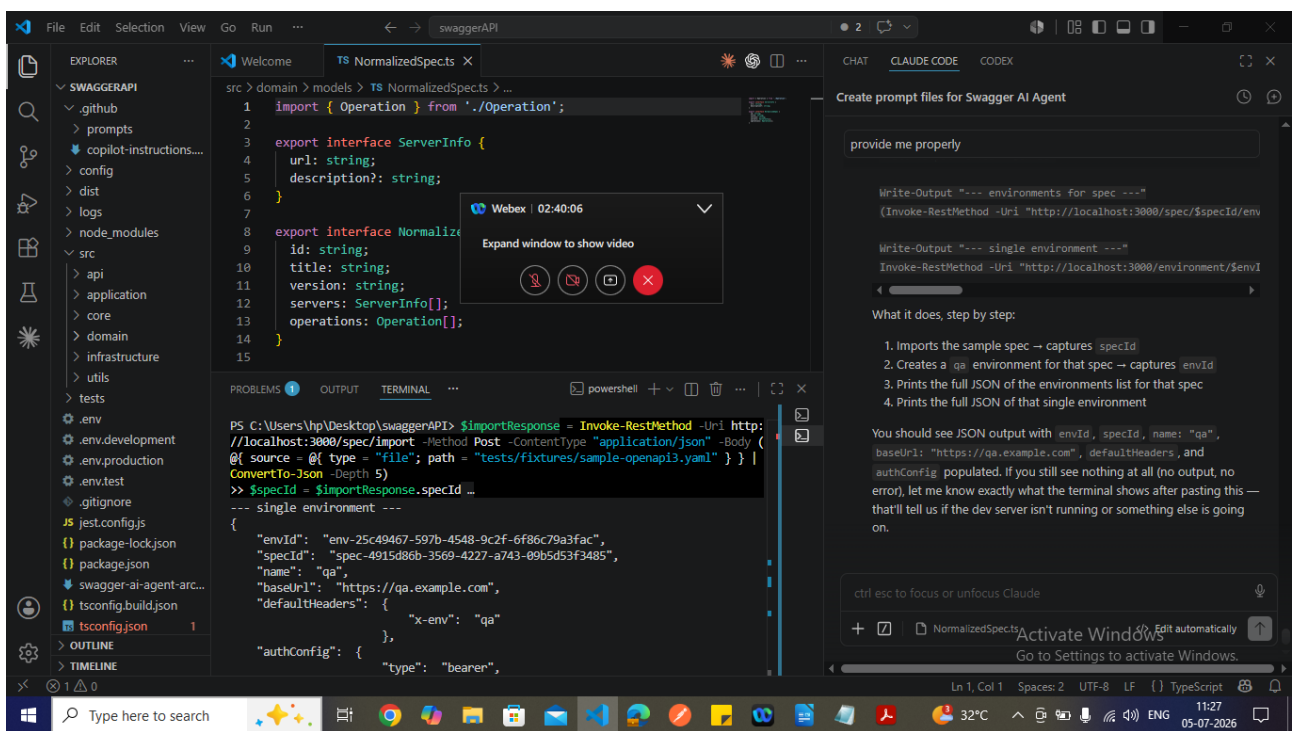

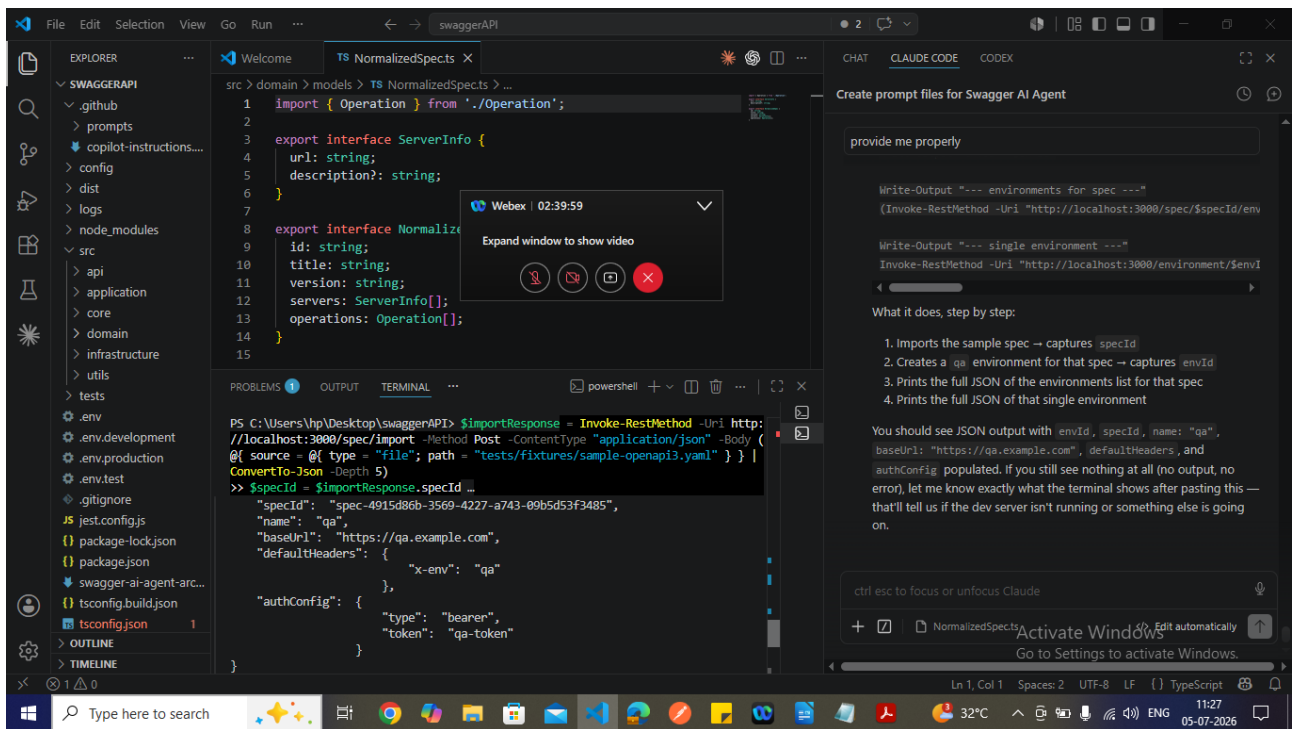

run npm run dev and run validation in another terminal

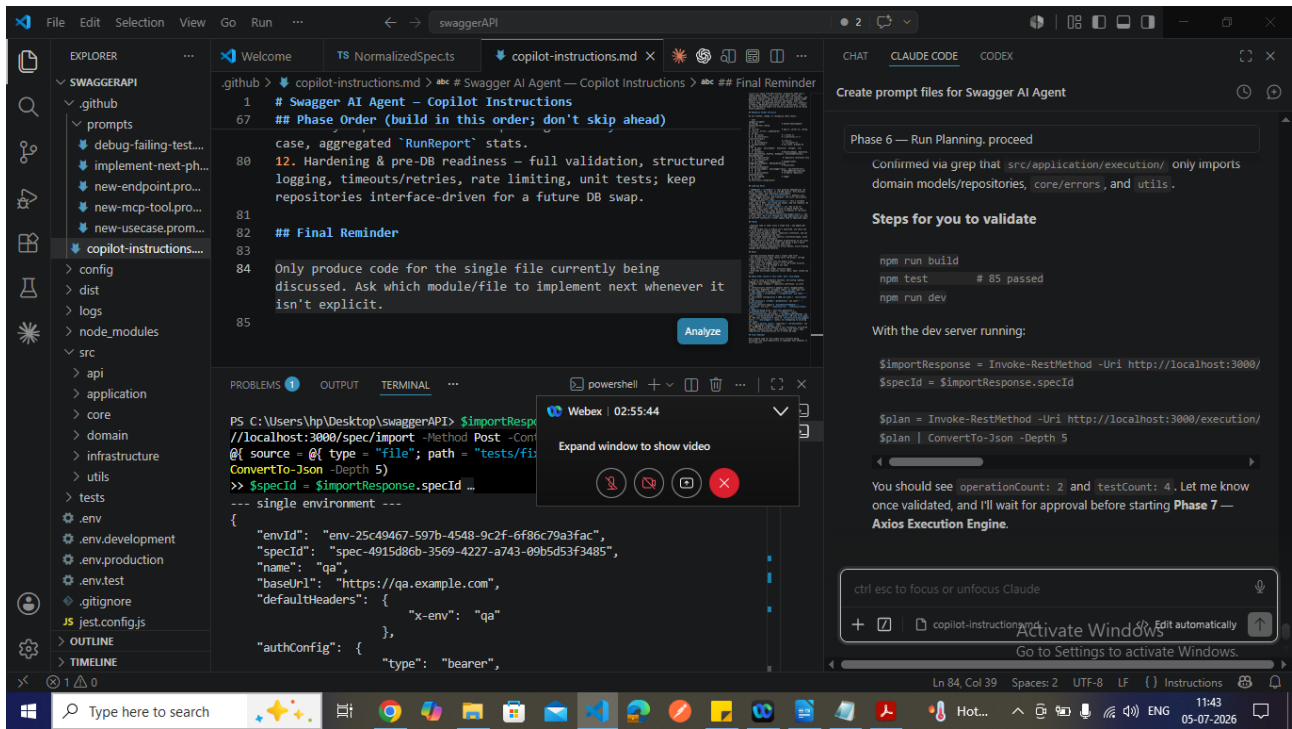

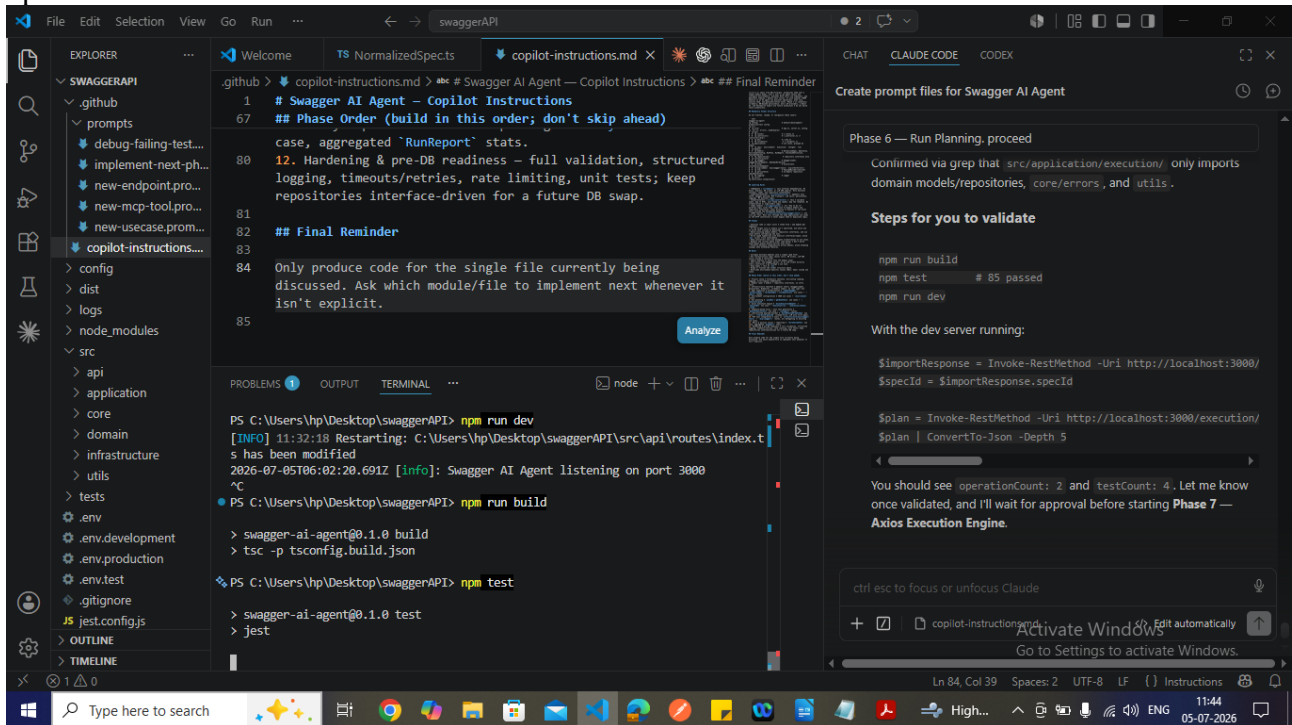

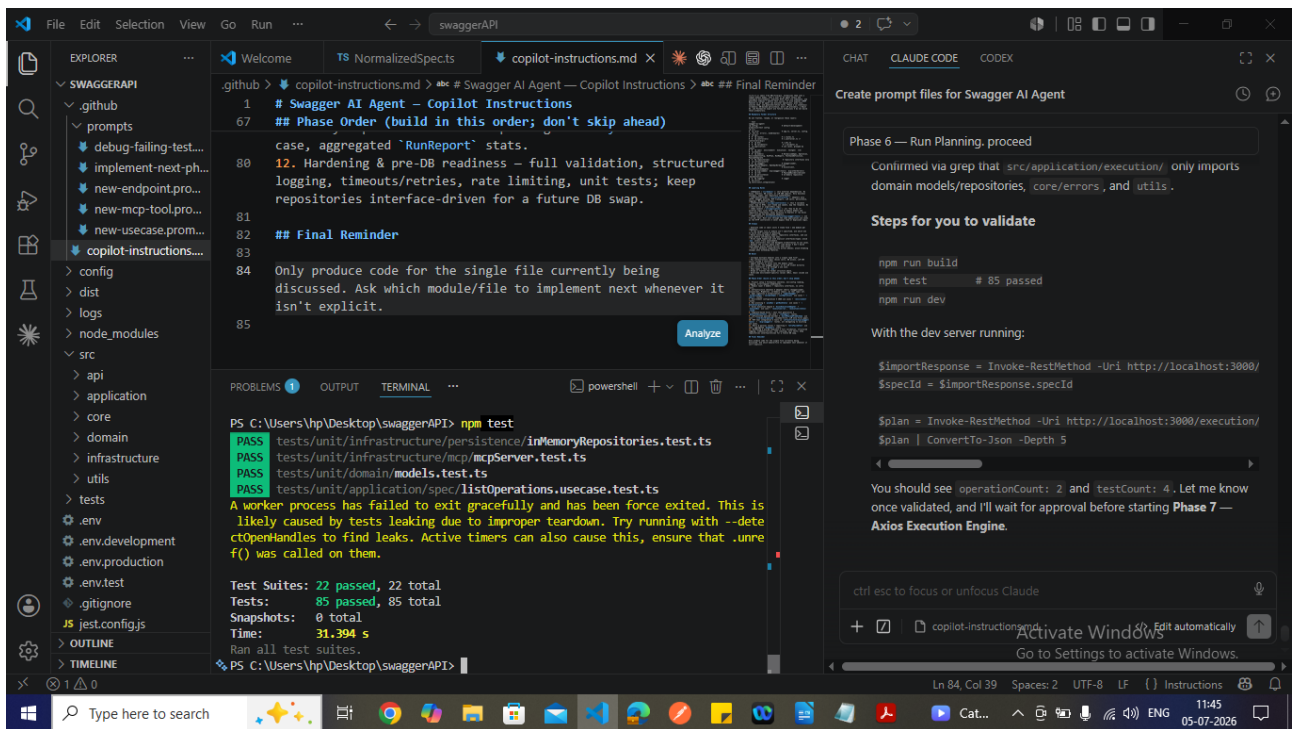

Proceeding to implement Phase 6 — Run Planning.

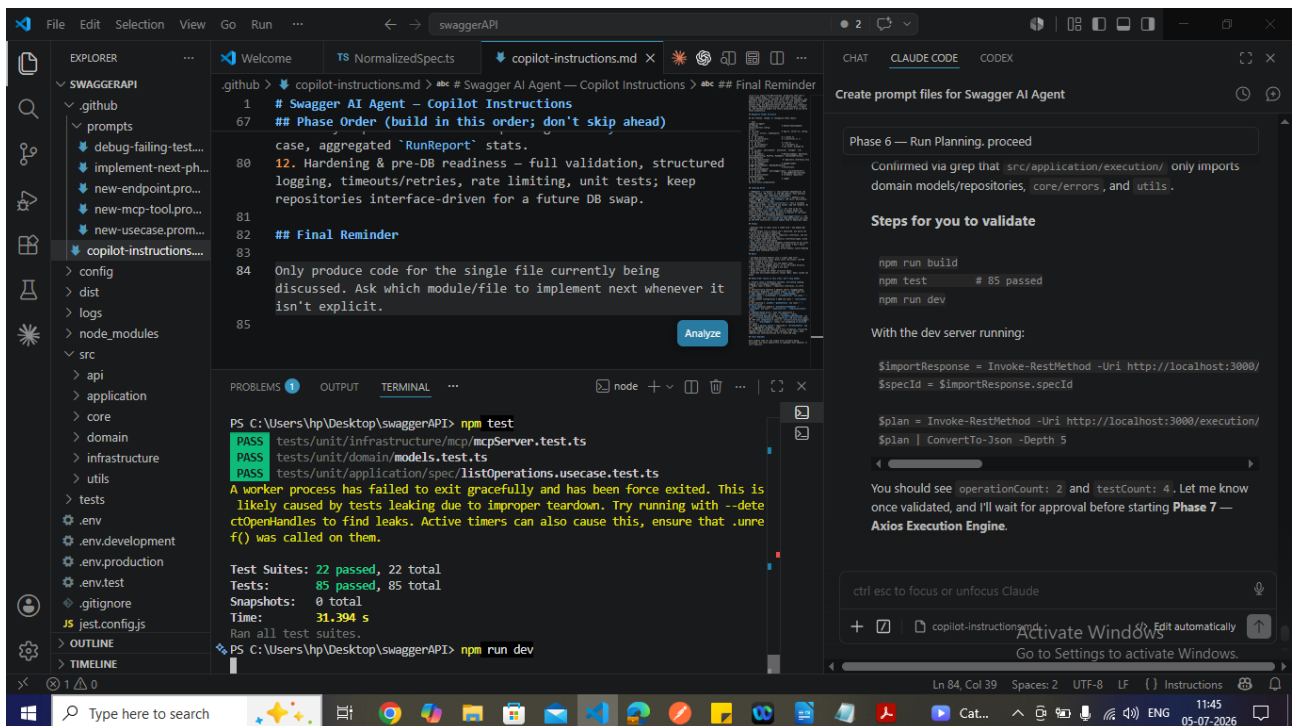

npm test

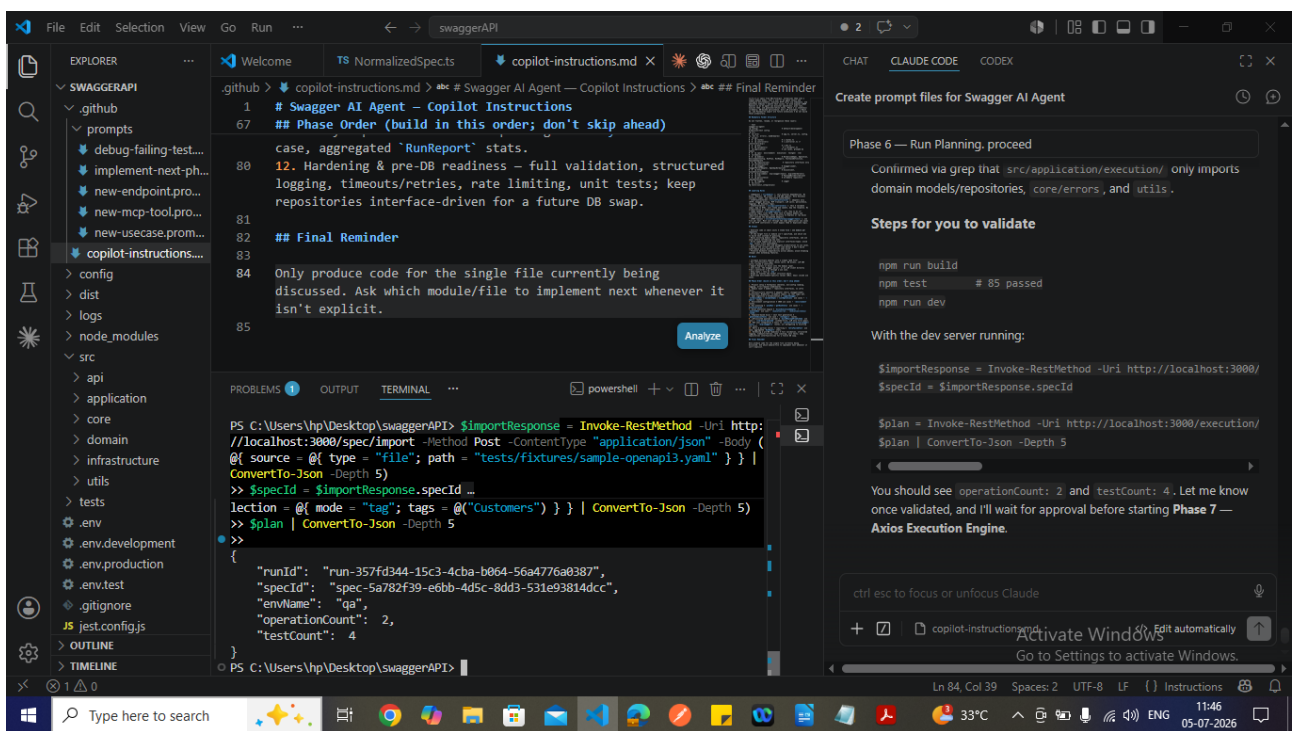

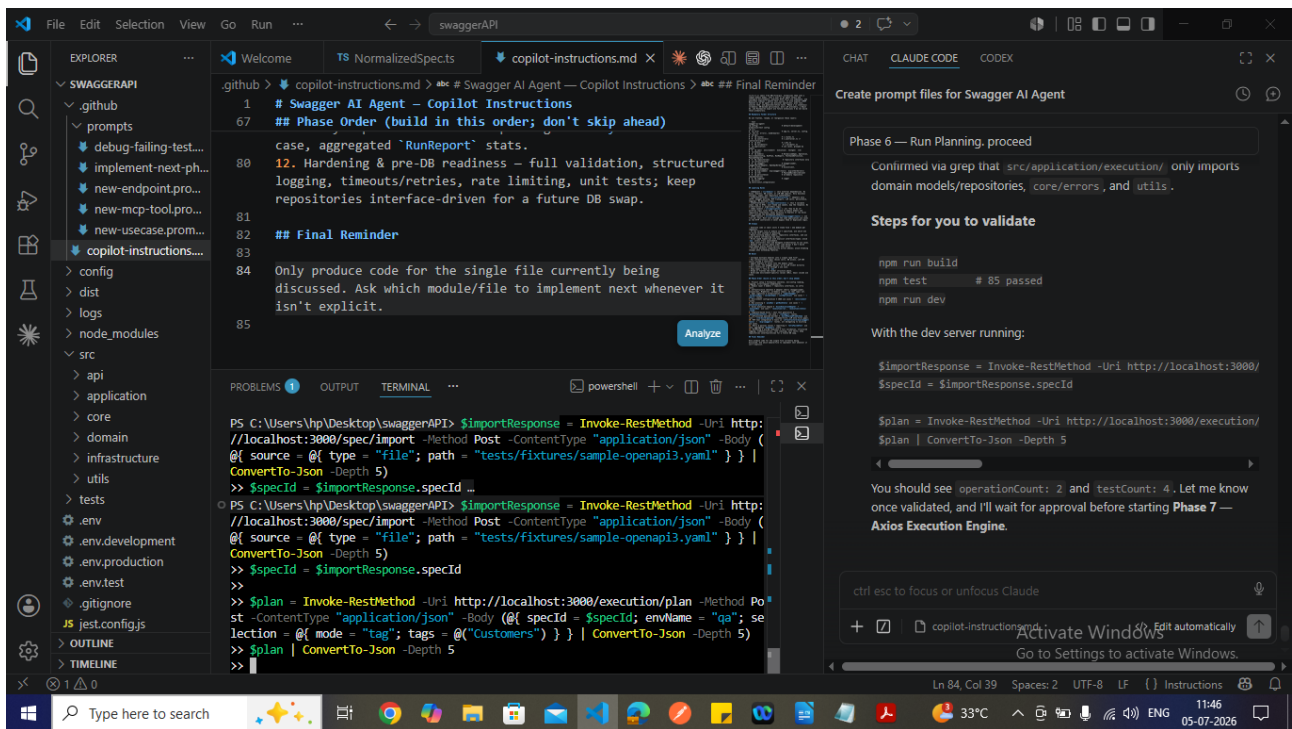

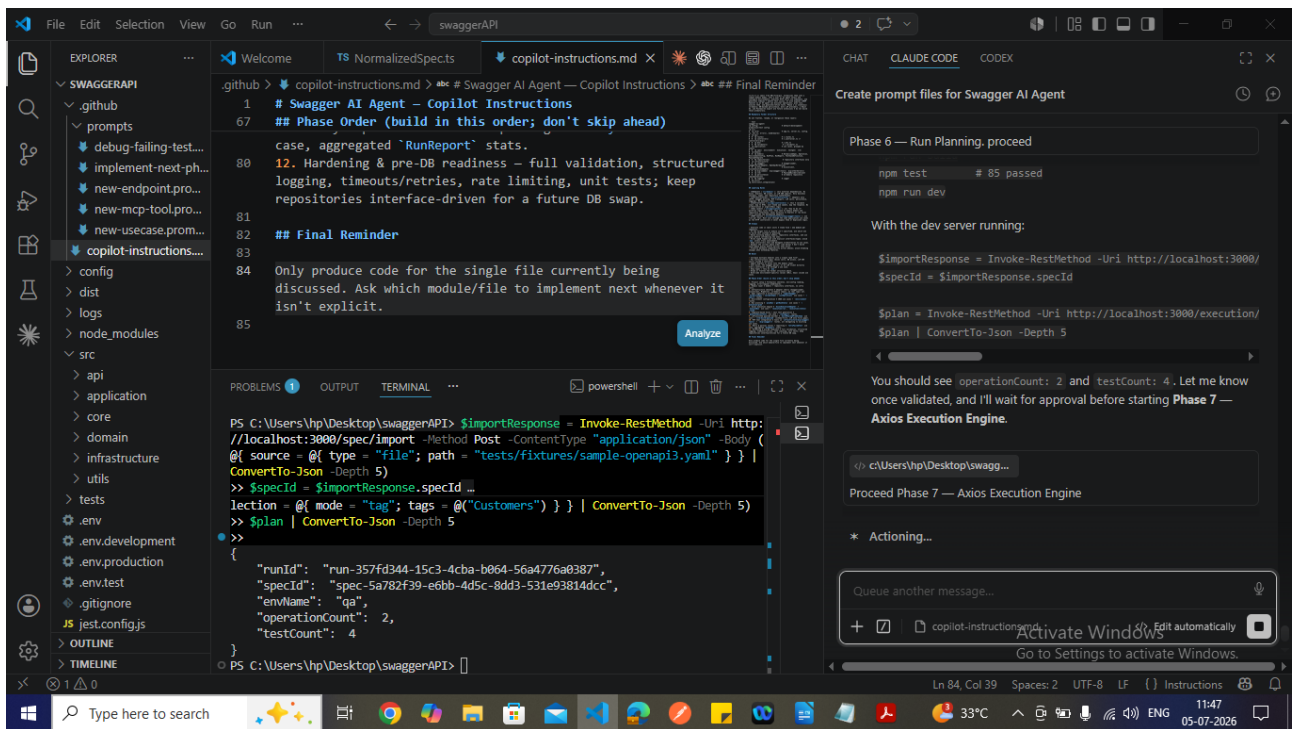

npm run dev

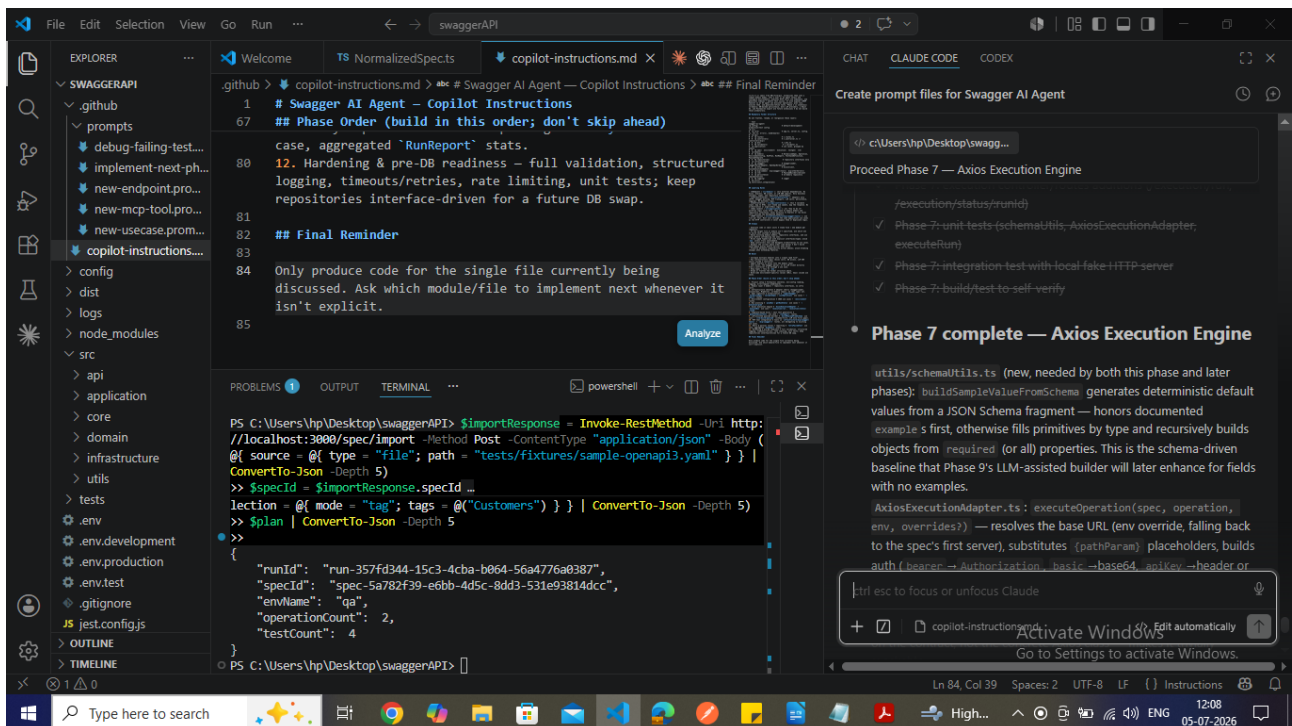

run the command in another terminal

Proceeding to implement Phase 7 — Axios Execution Engine

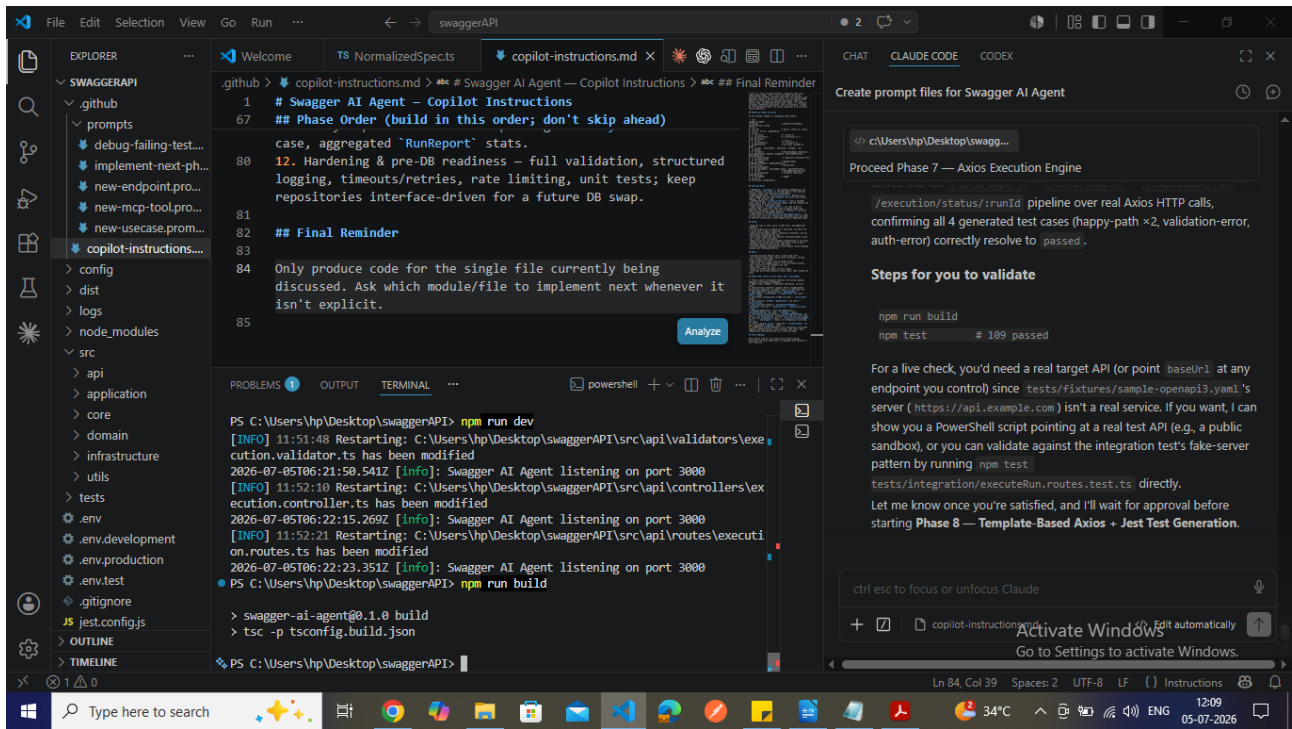

implementation done for Phase 7

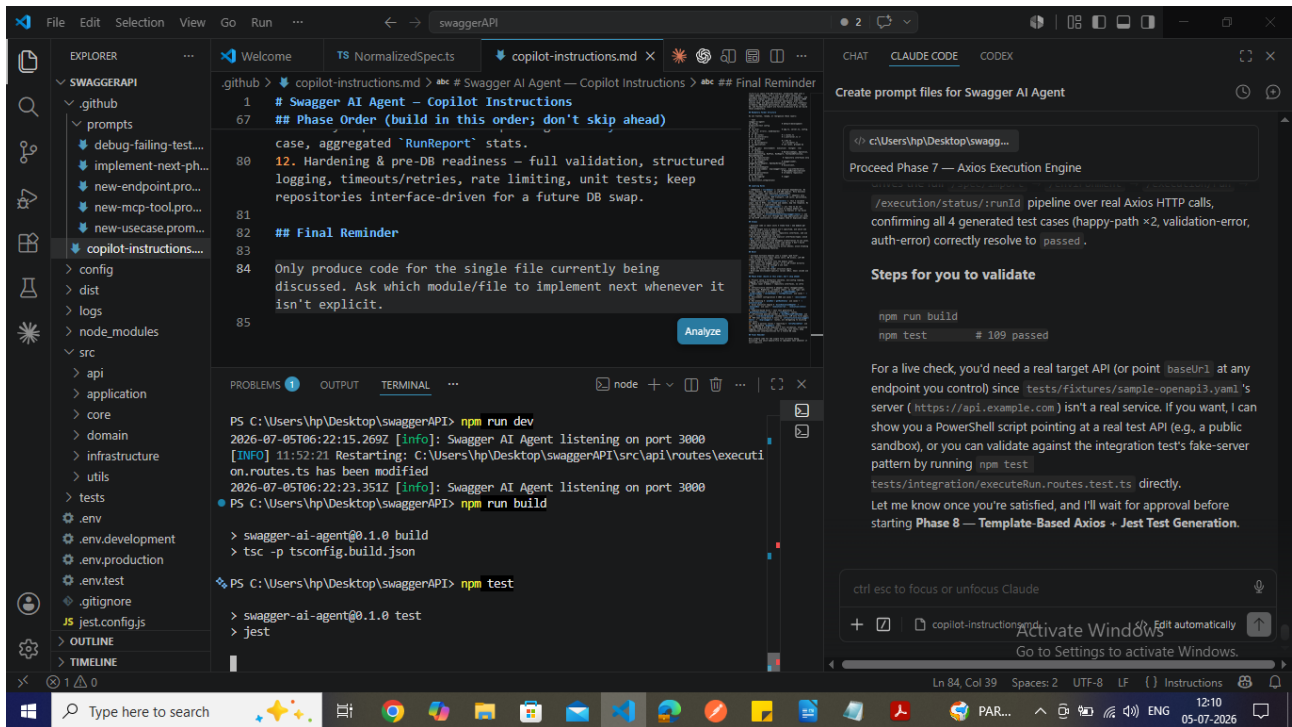

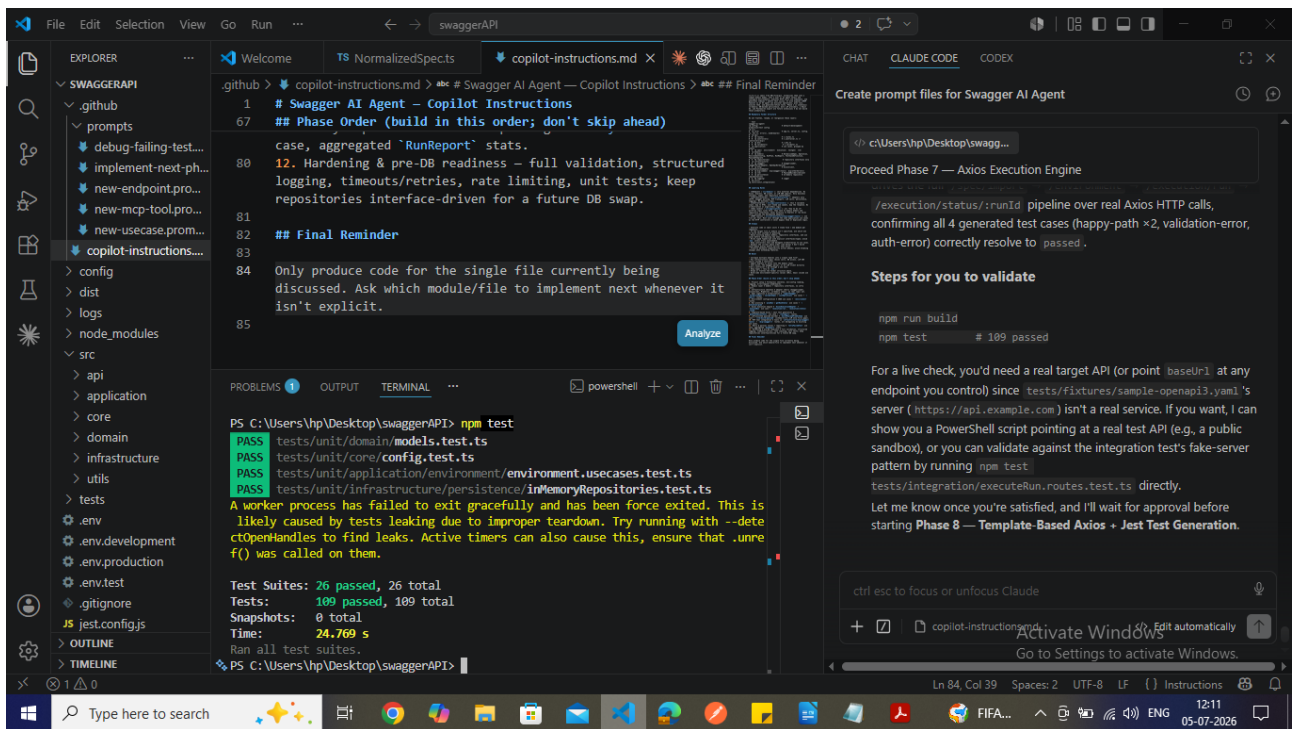

validating Phase 7

npm run build with no errors

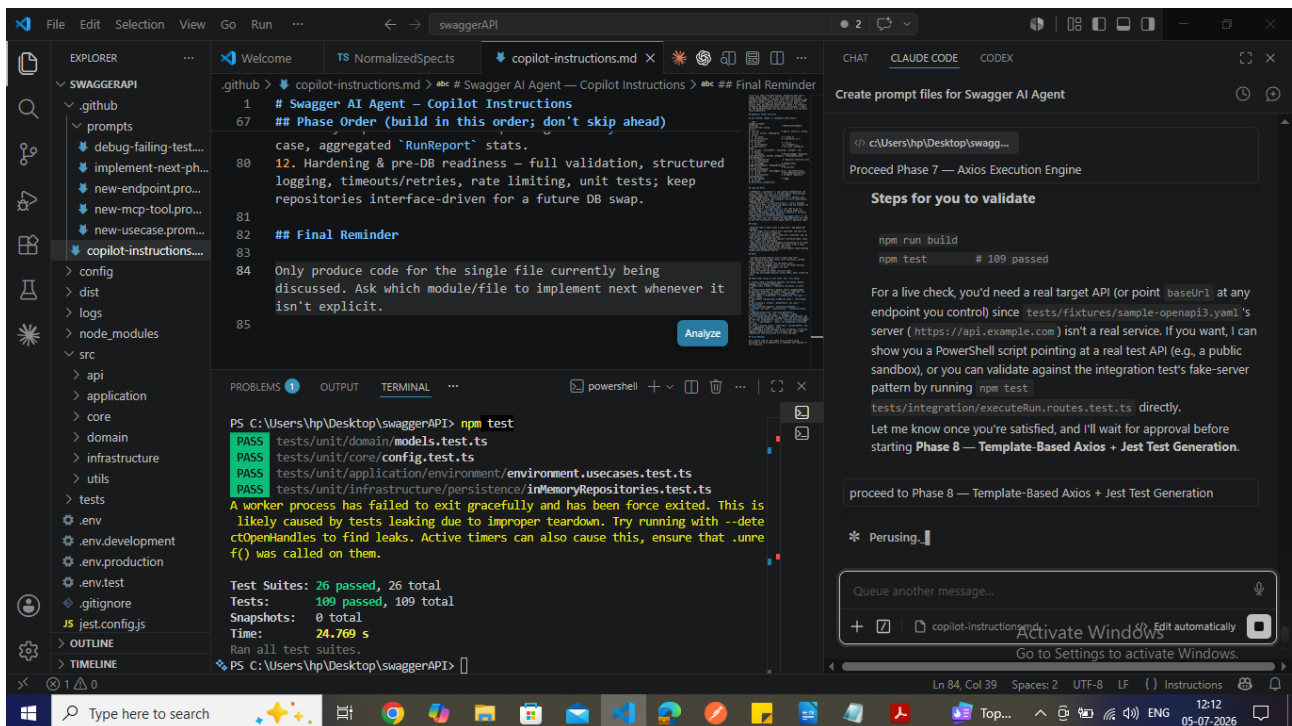

npm test

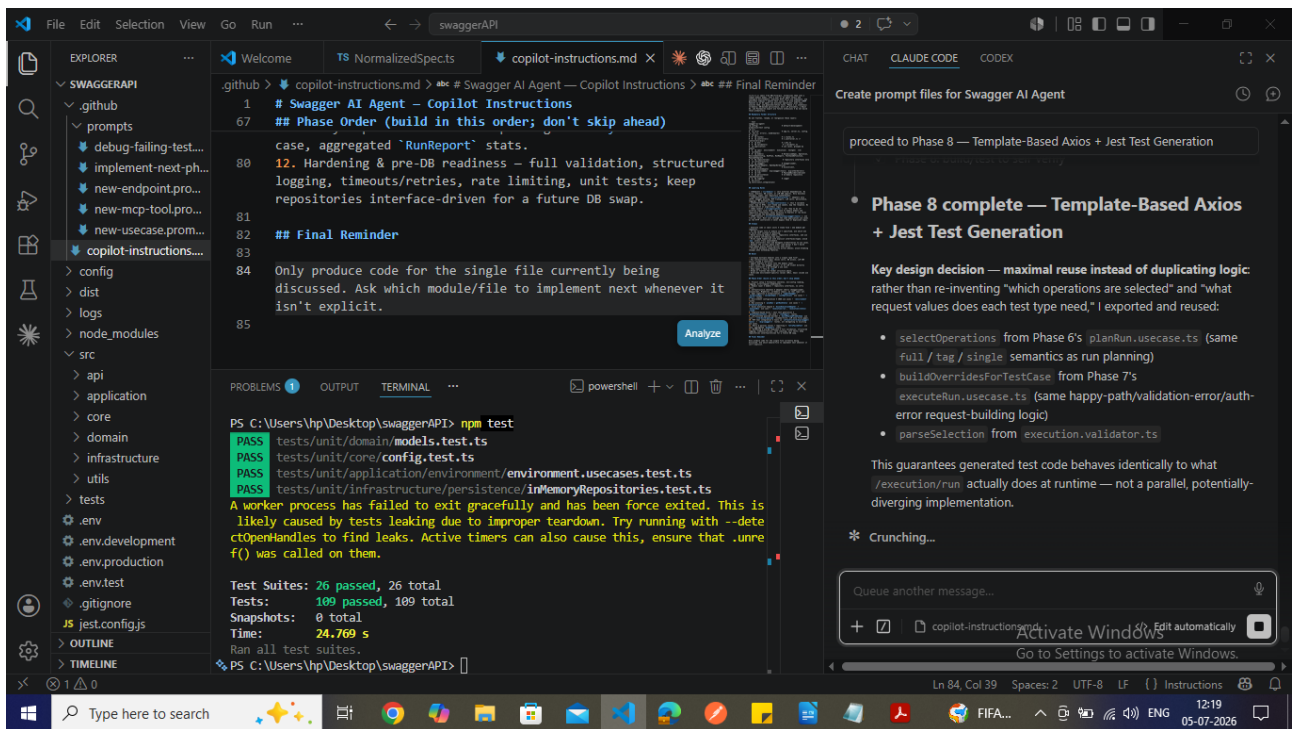

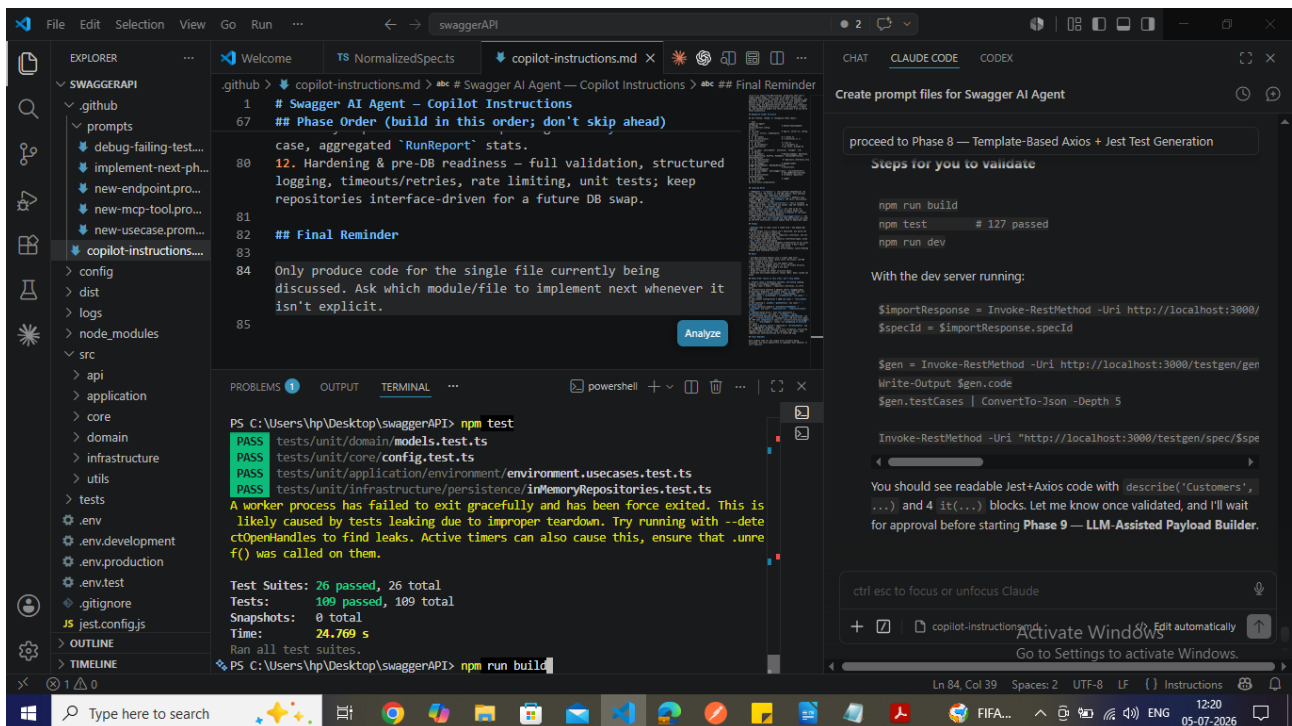

Proceeding to implement Phase 8 — Template-Based Axios + Jest Test Generation

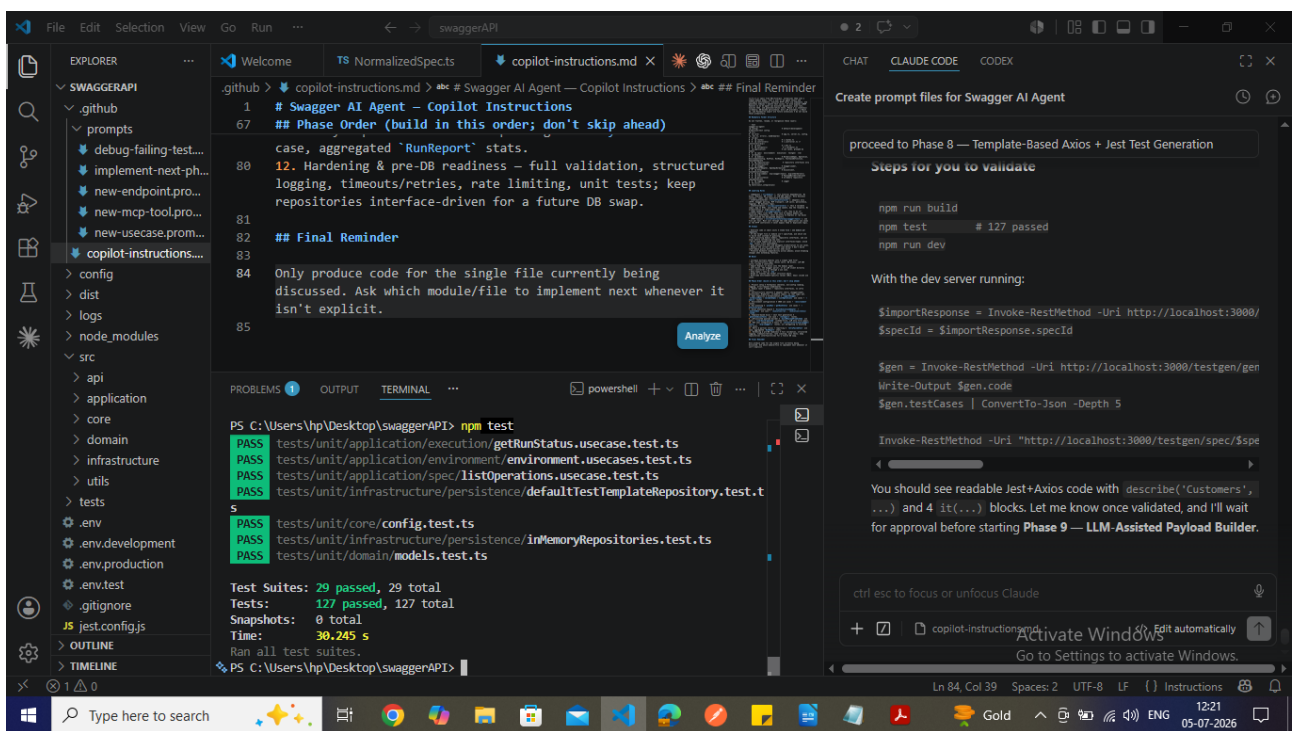

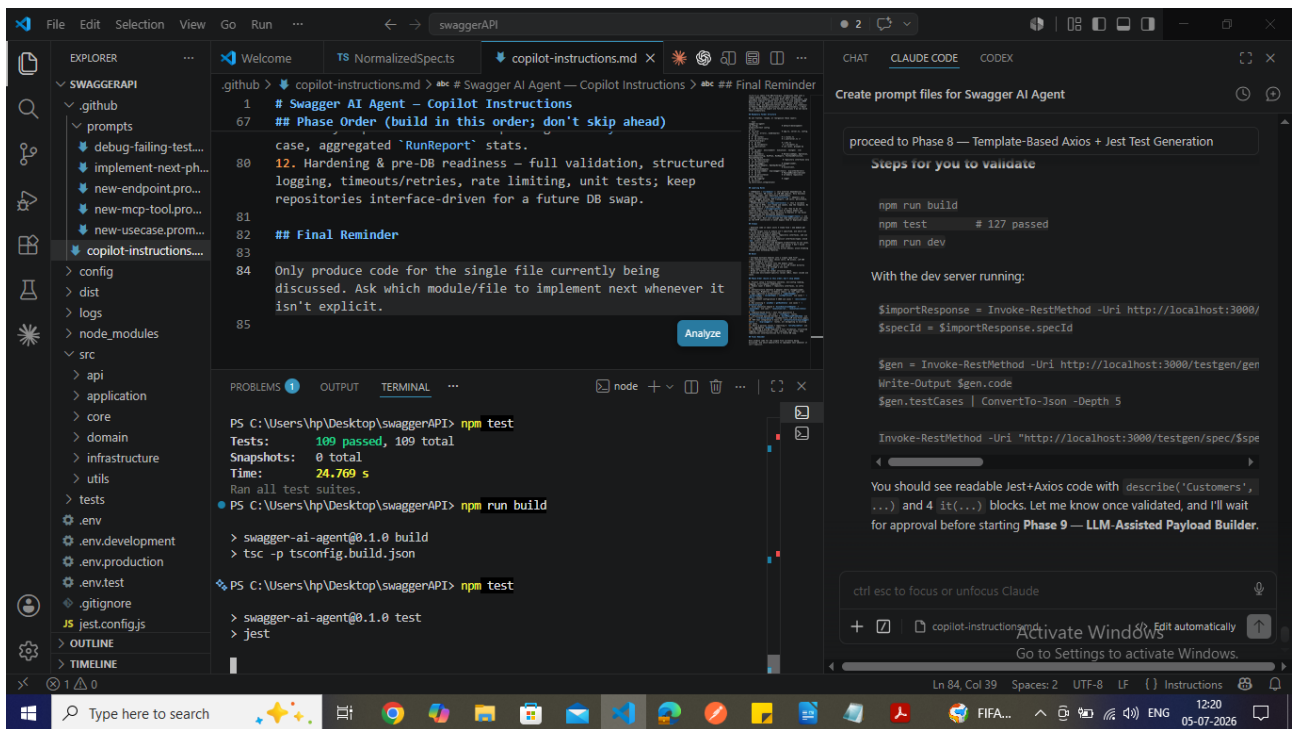

implementation done for Phase 8

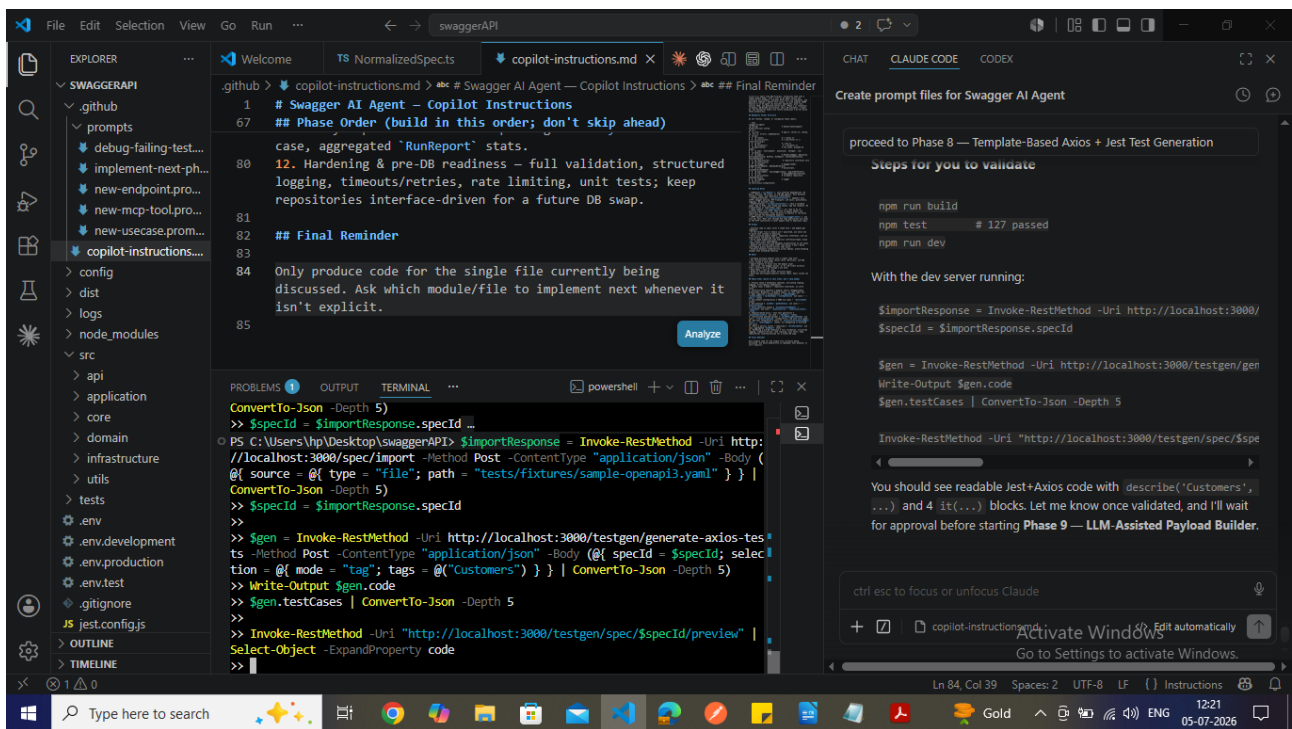

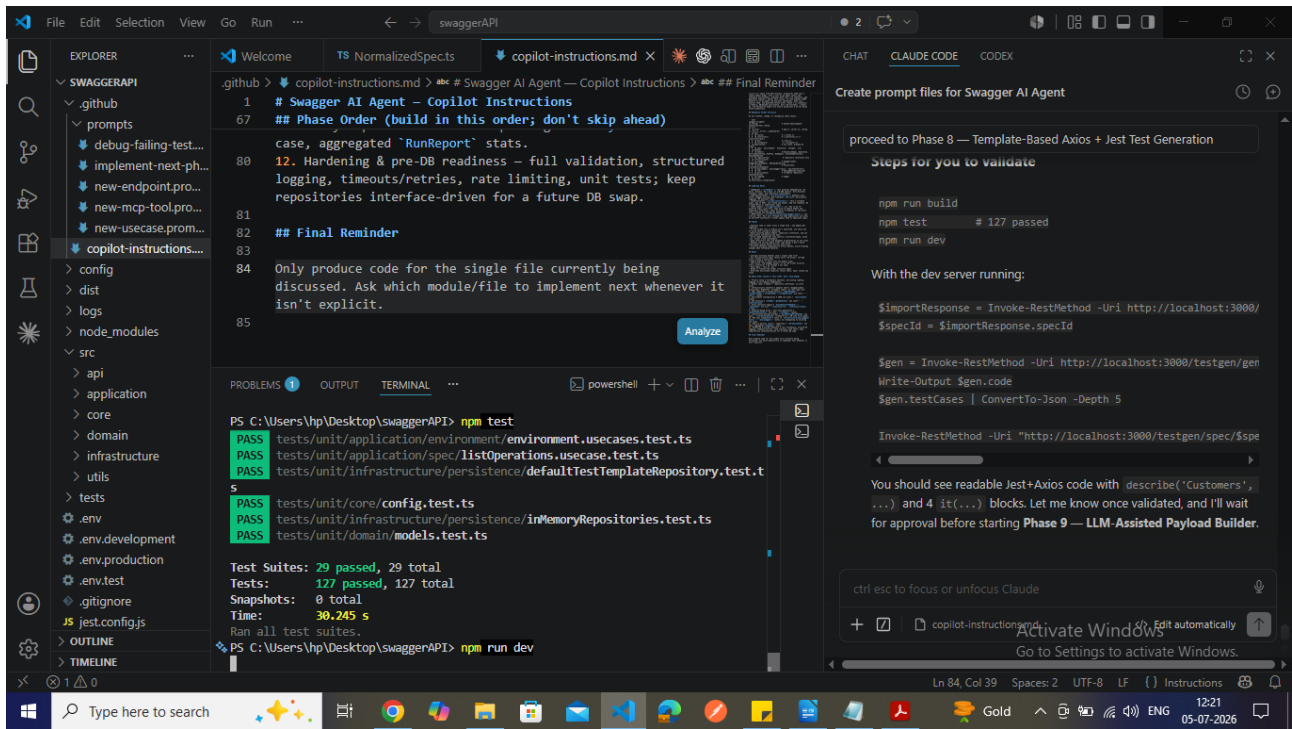

validating Phase 8

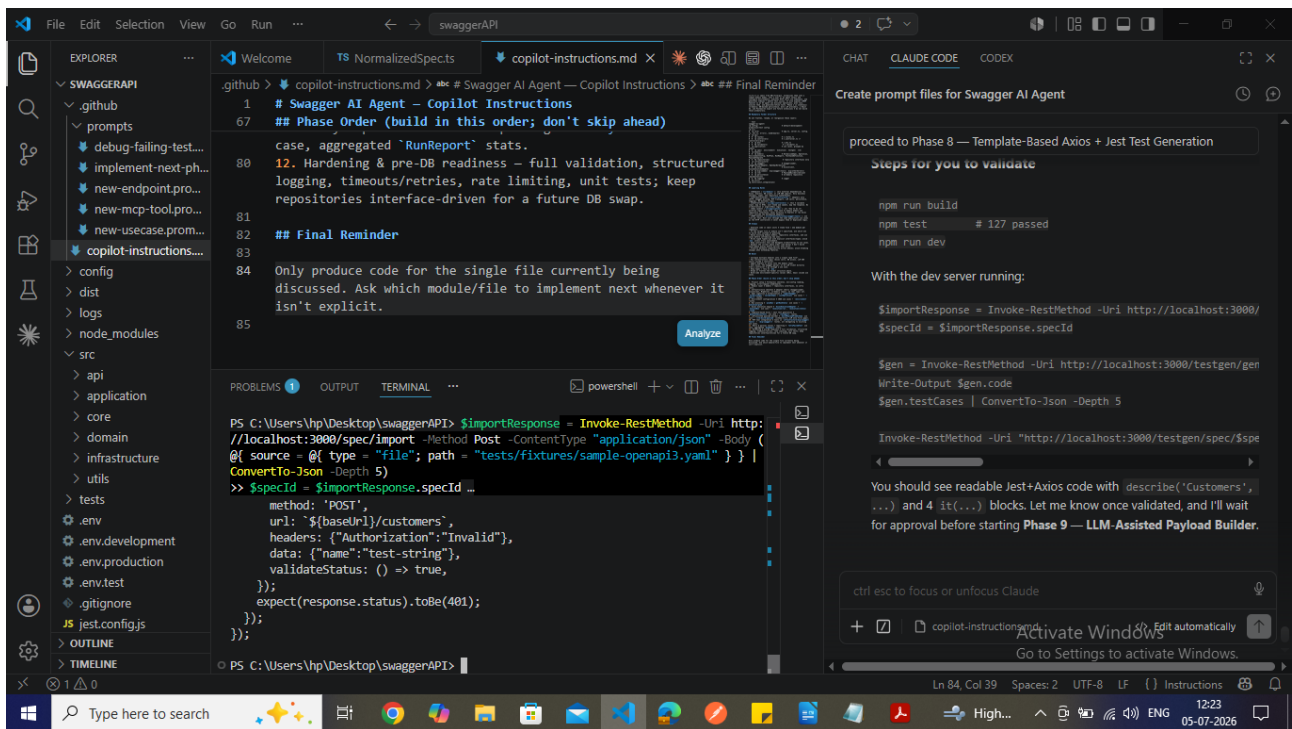

npm test

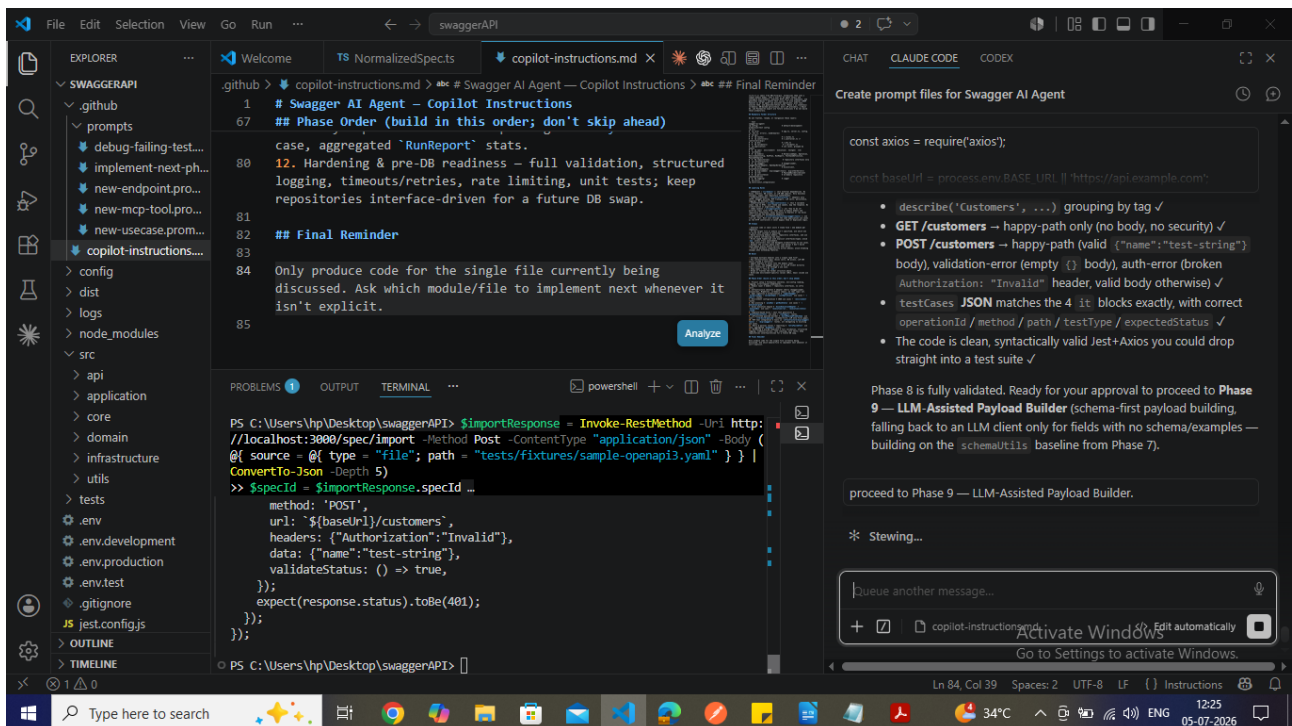

running run dev

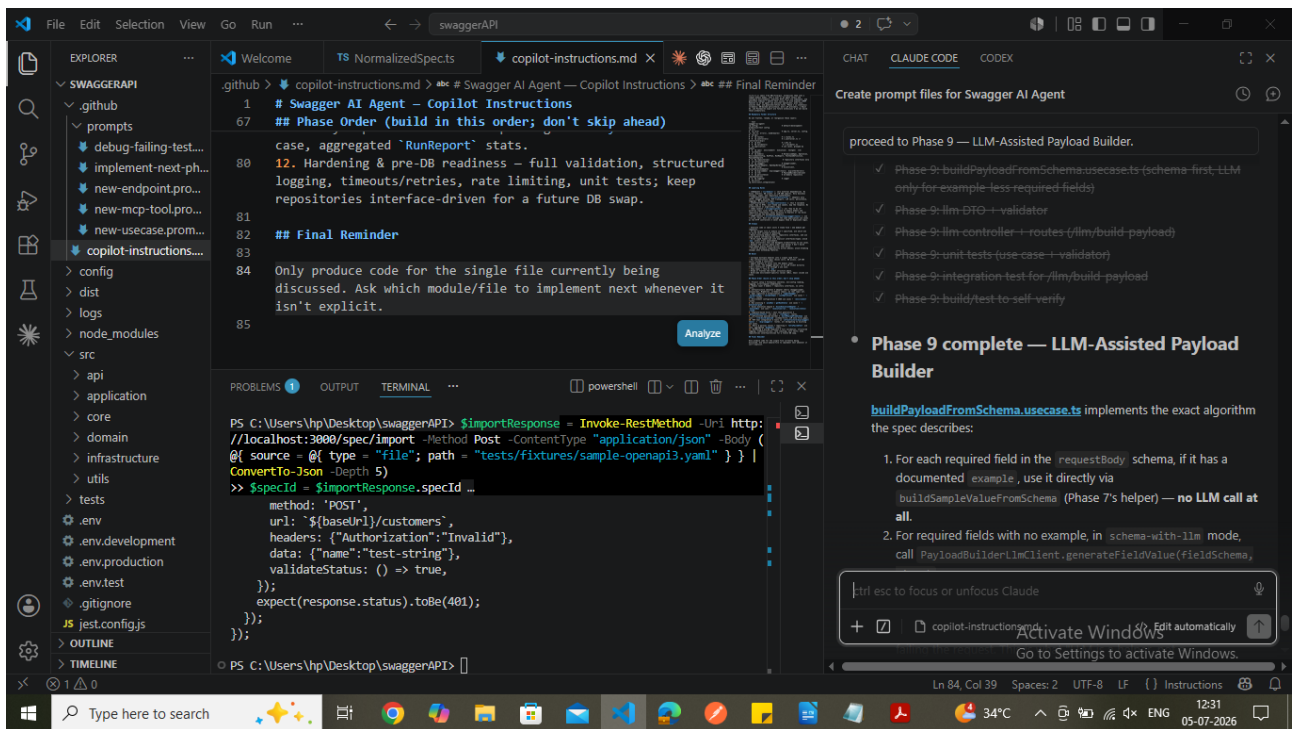

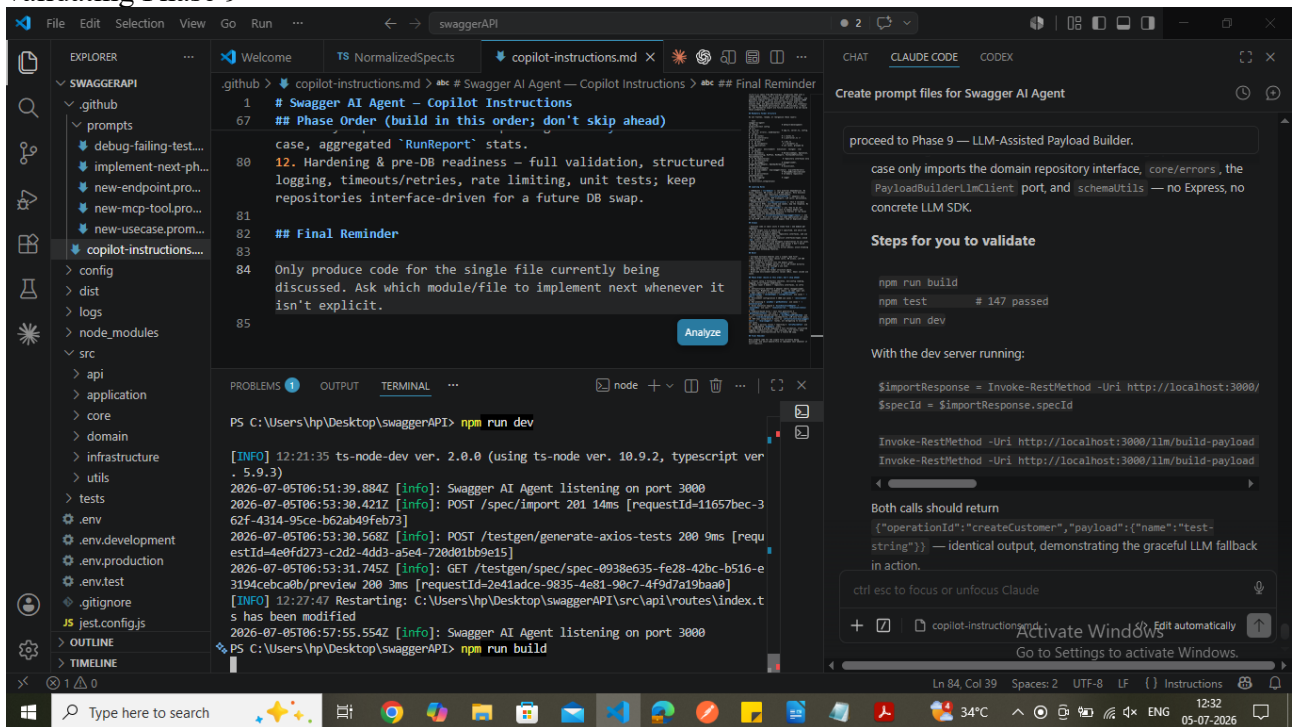

proceed to implement Phase 9 — LLM-Assisted Payload Builder.

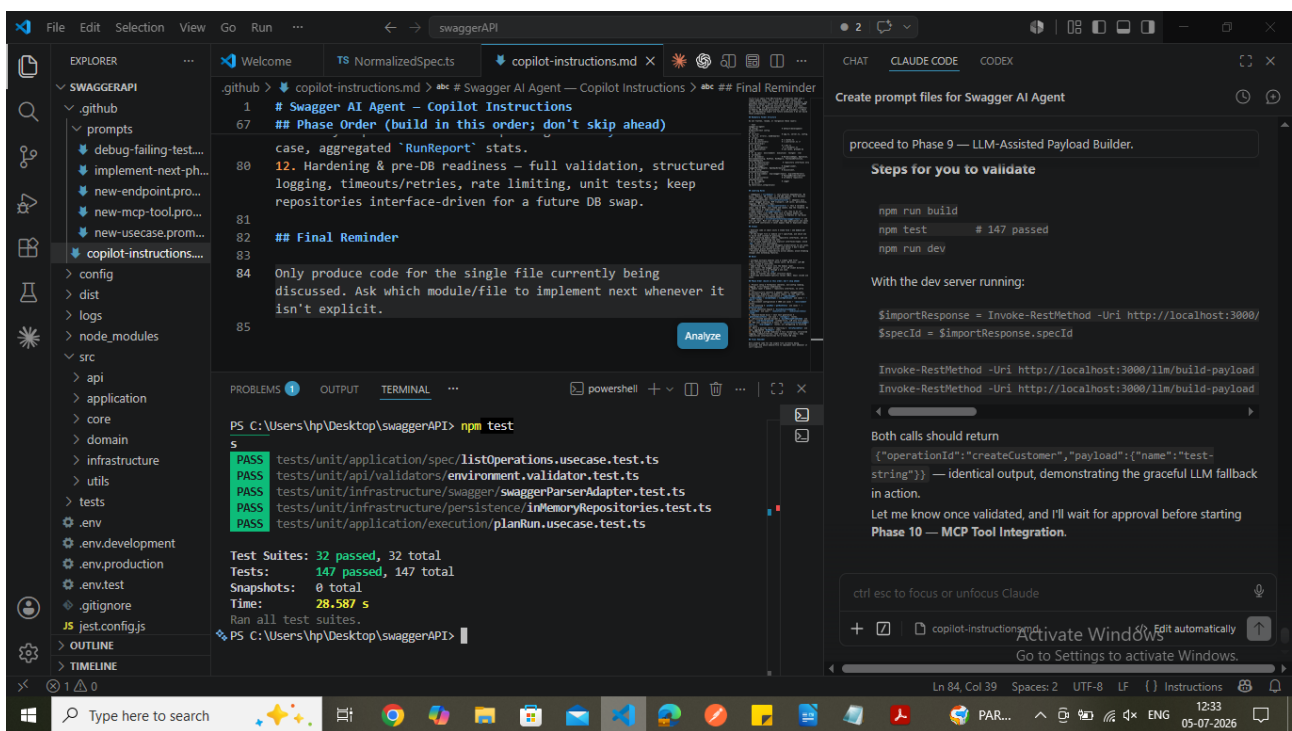

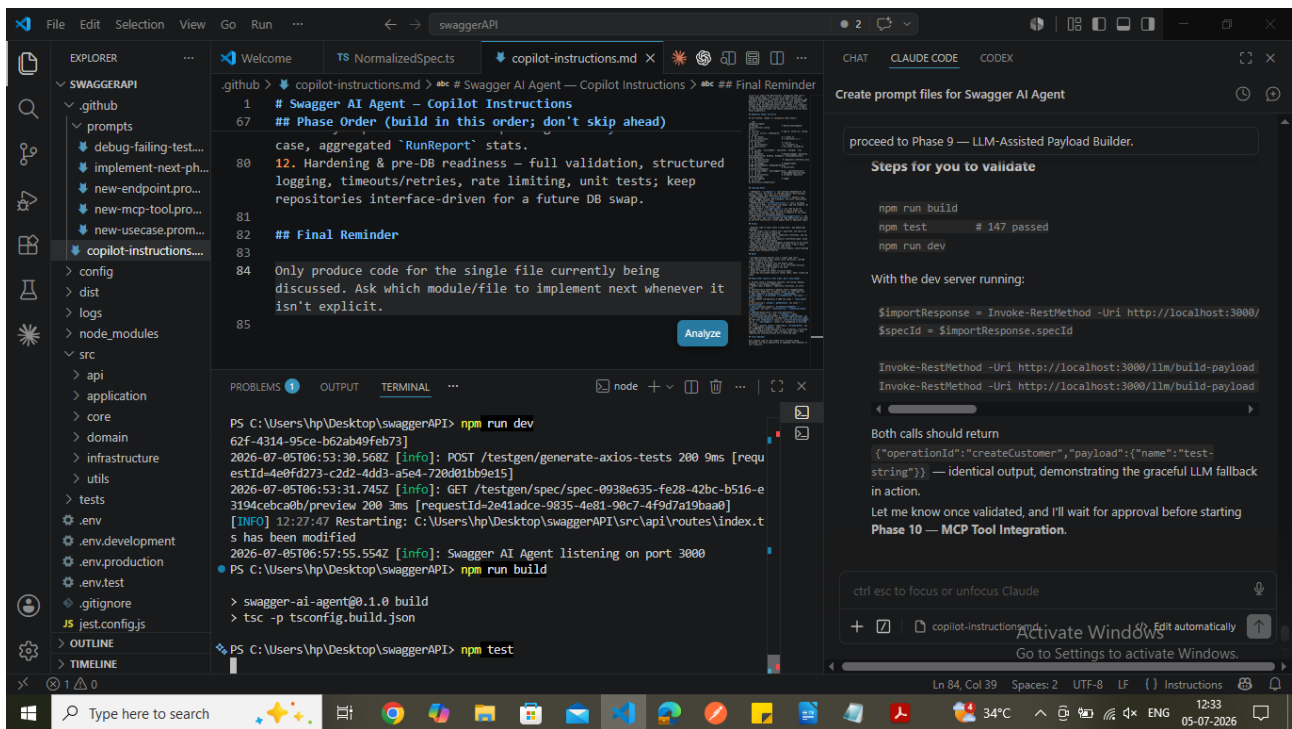

Phase 9 is completed

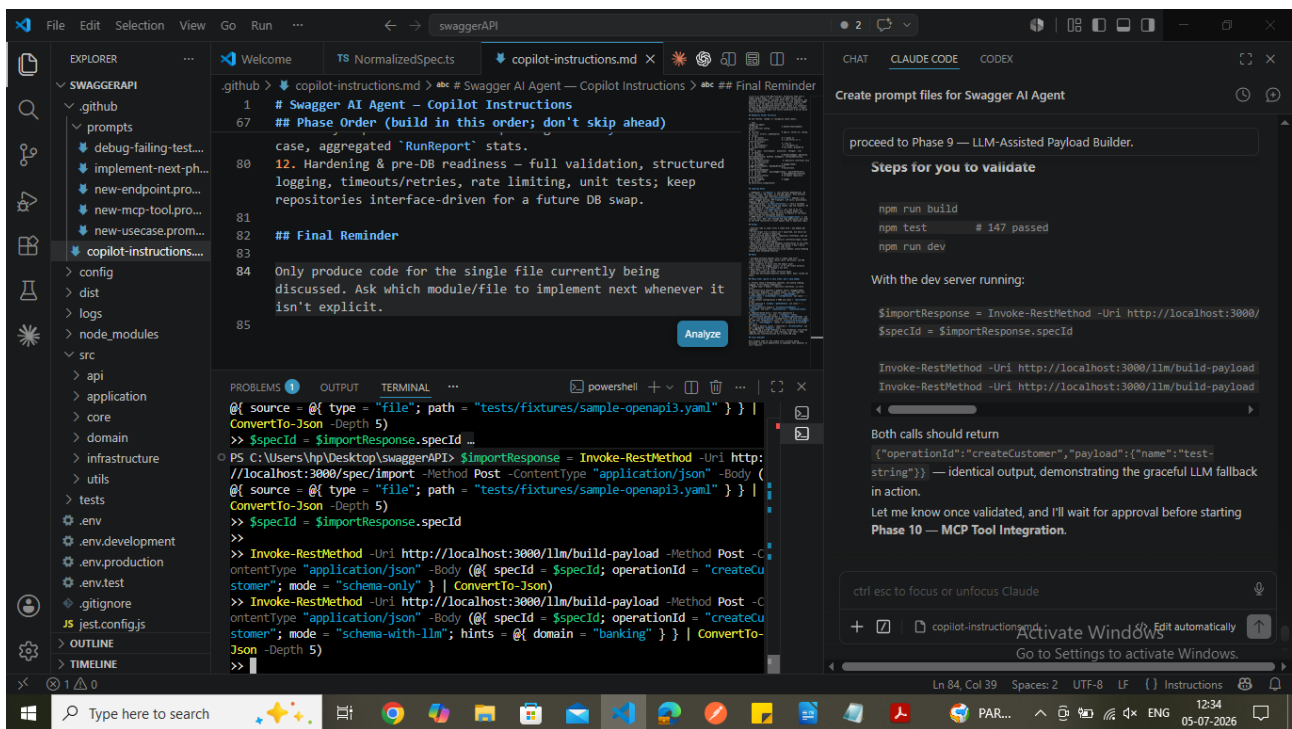

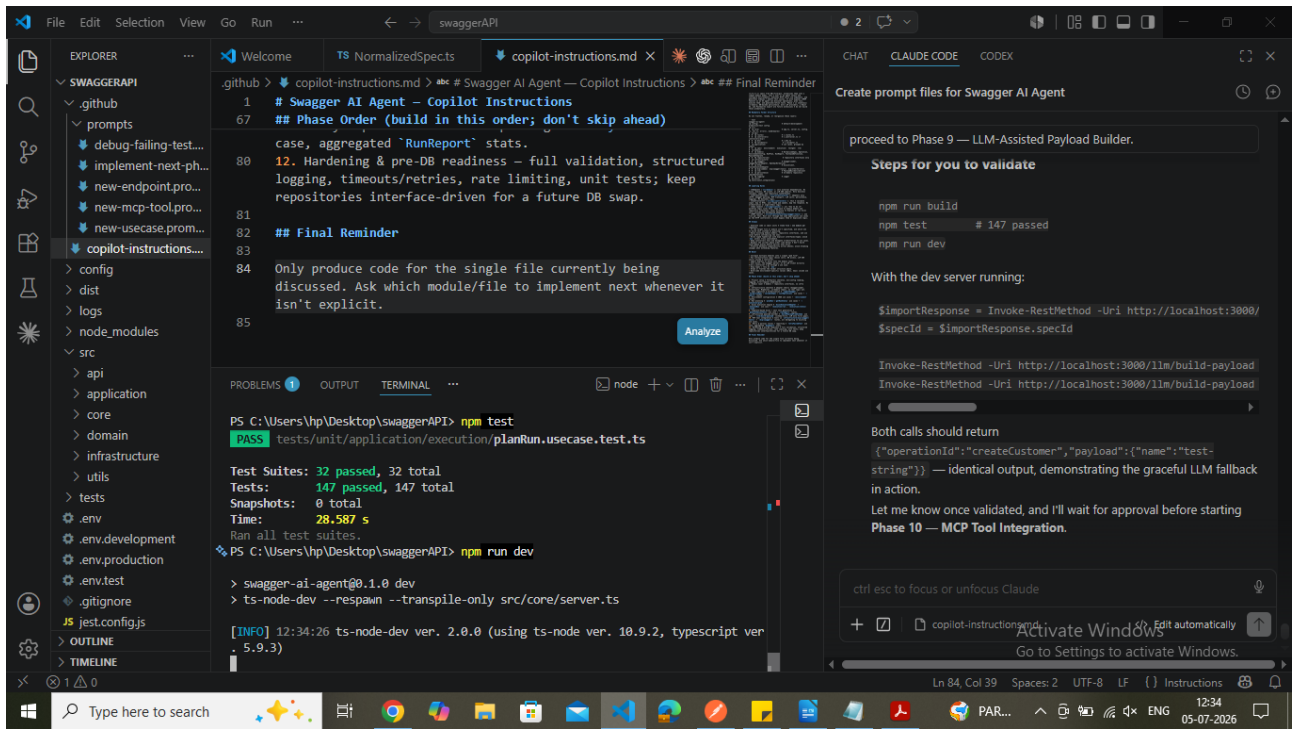

validating Phase 9

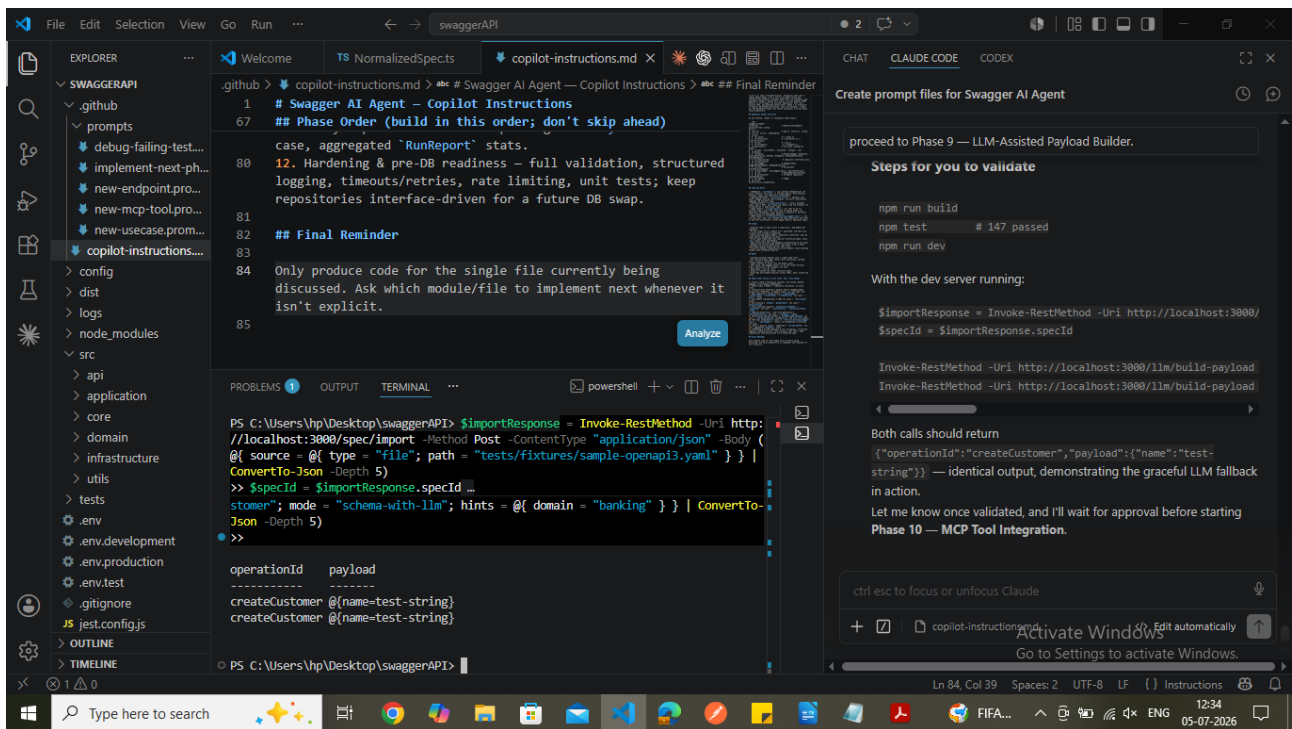

npm test

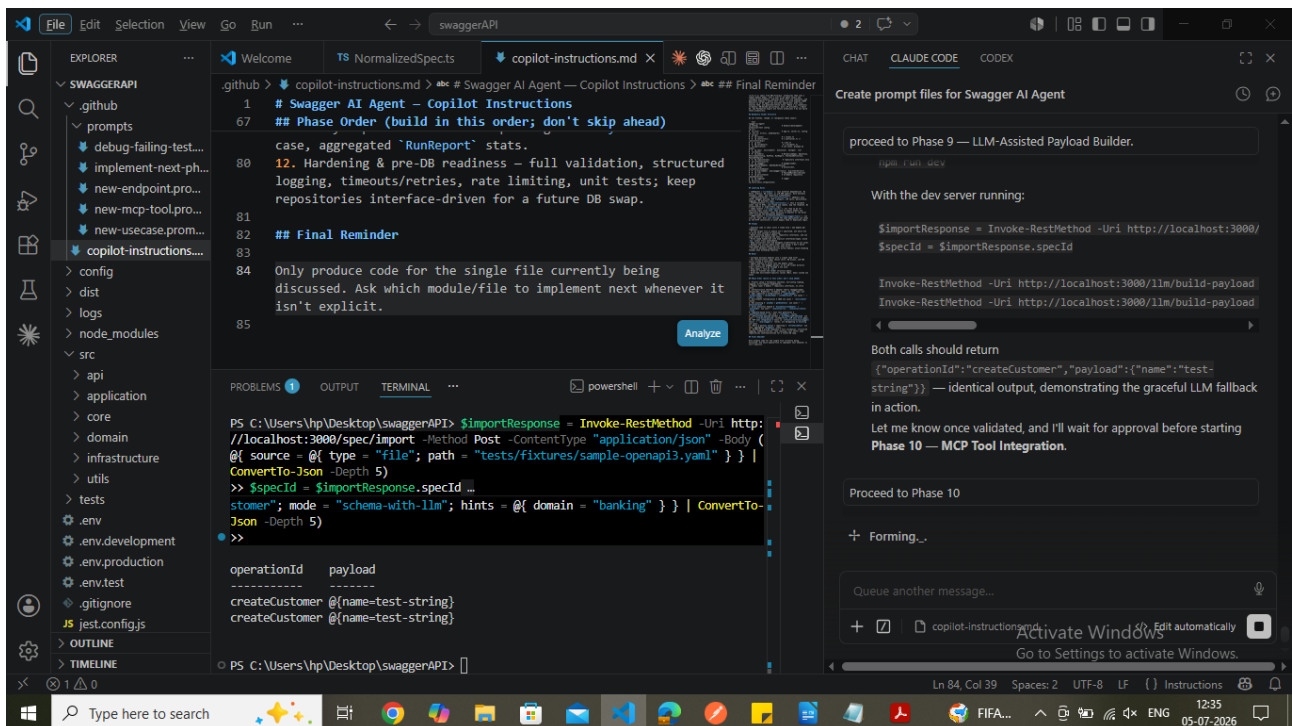

run npm run dev and validation command in another terminal

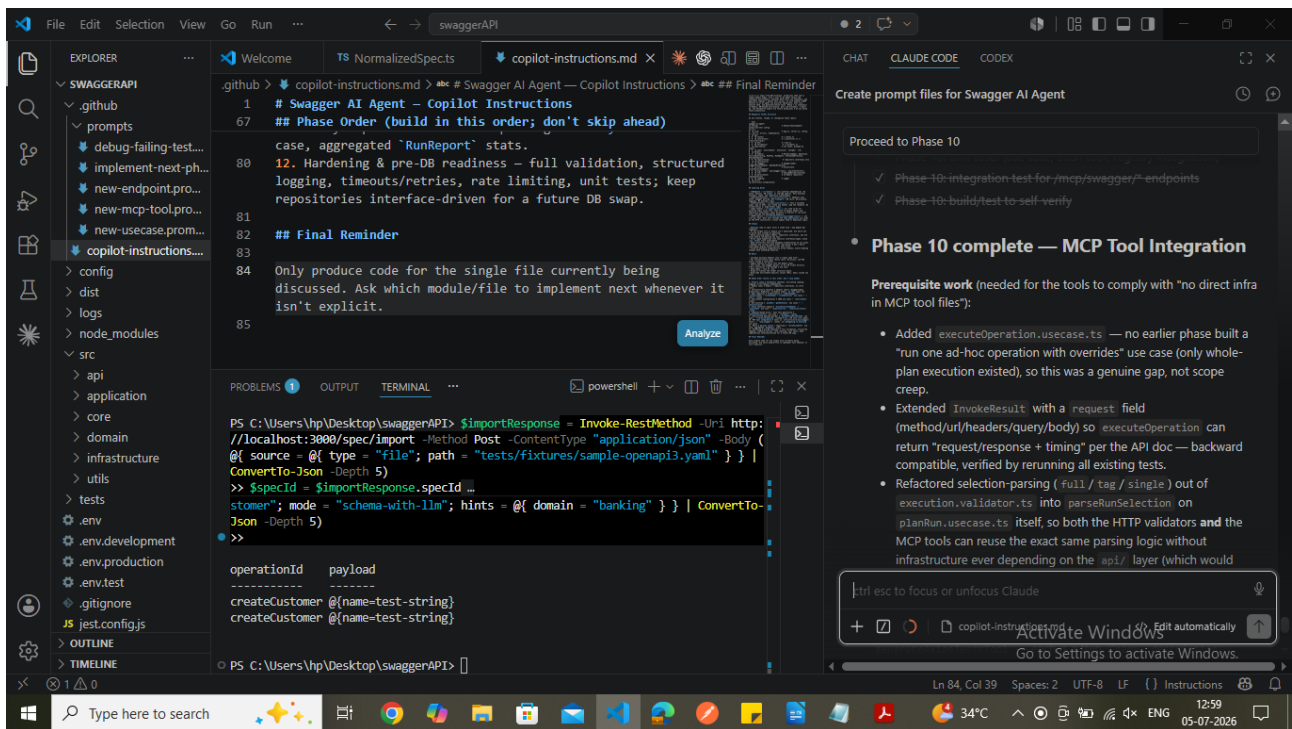

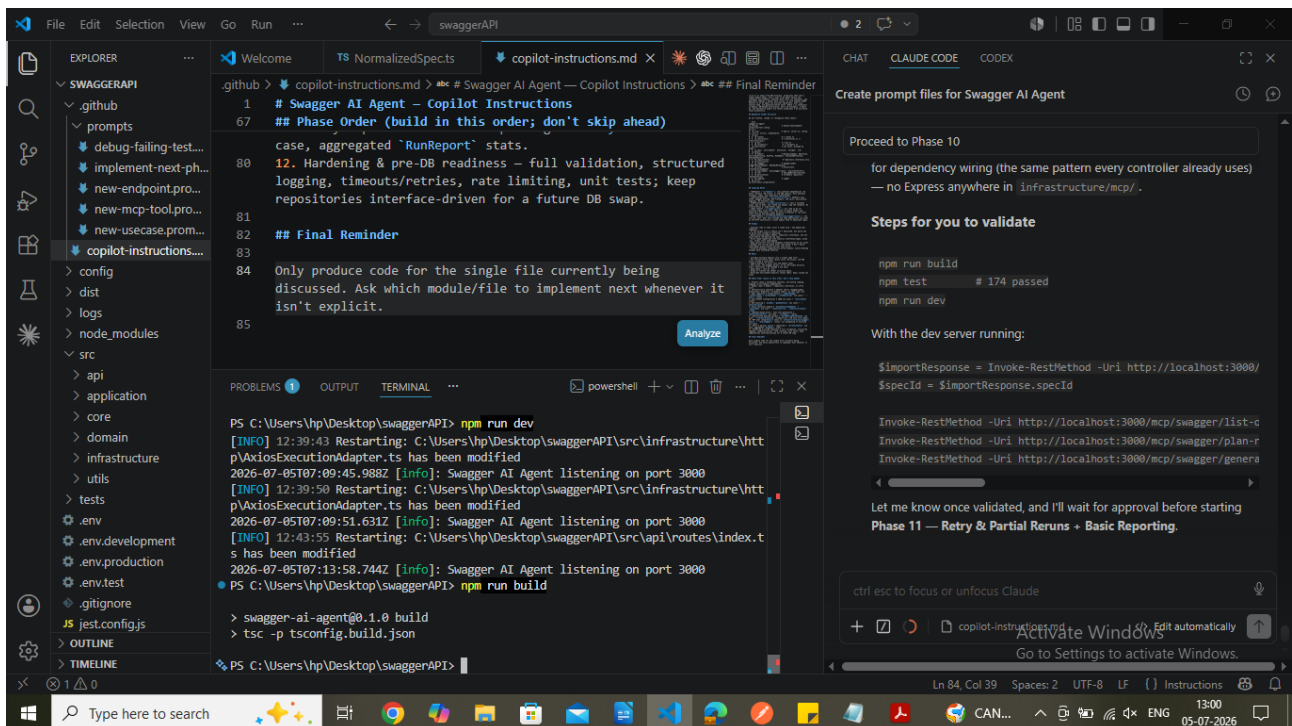

Proceed to implement Phase 10 — MCP Tool Integration

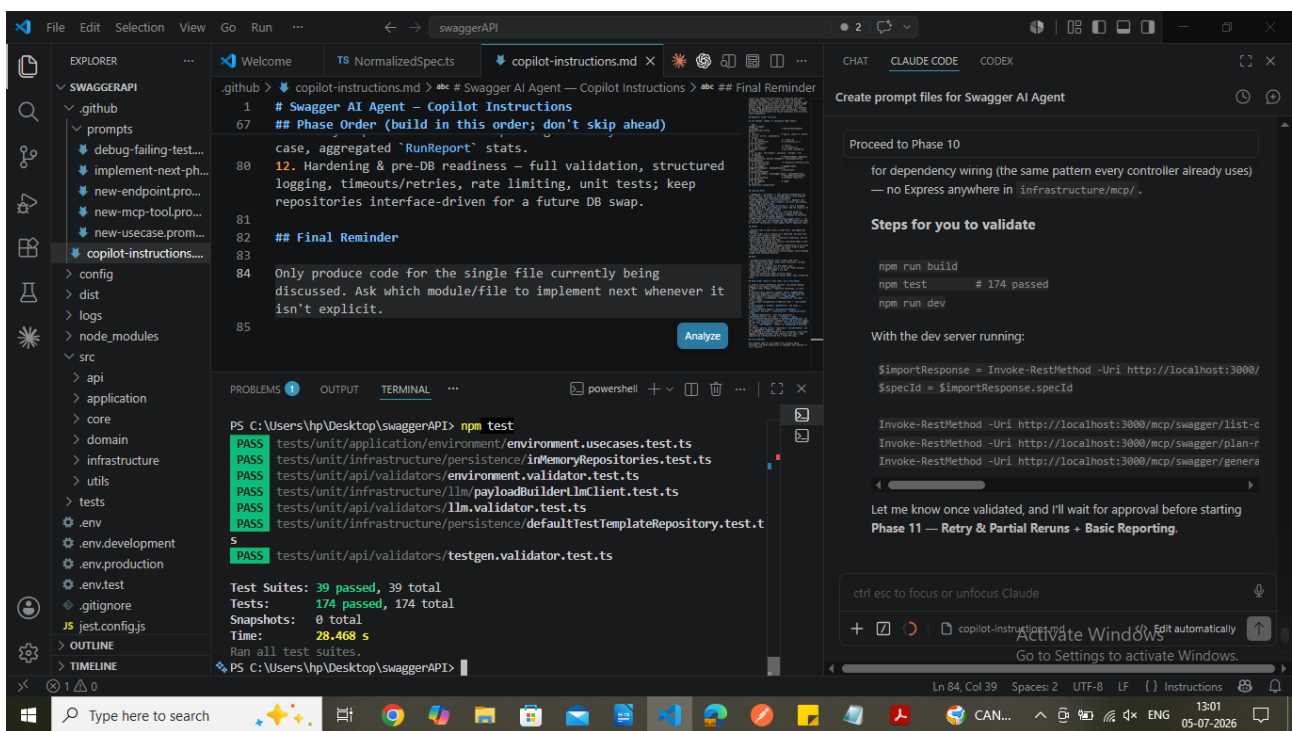

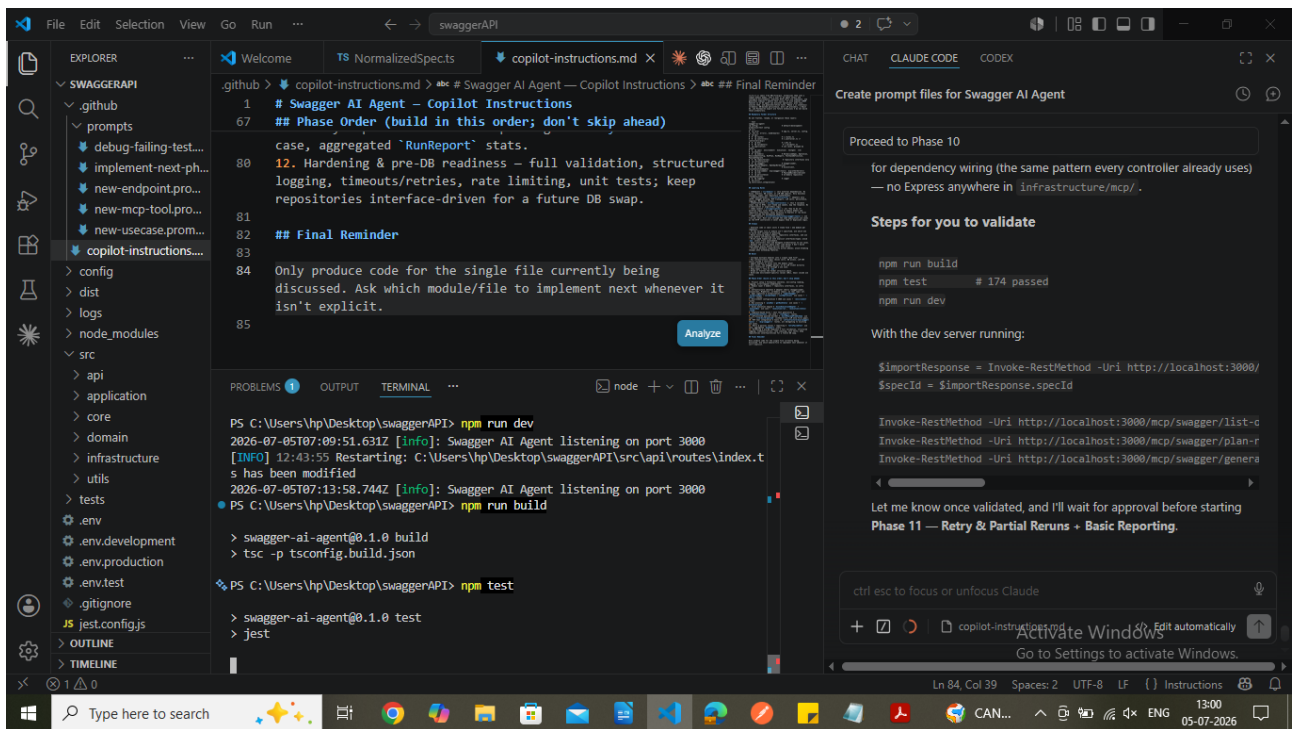

implementation done for Phase 10

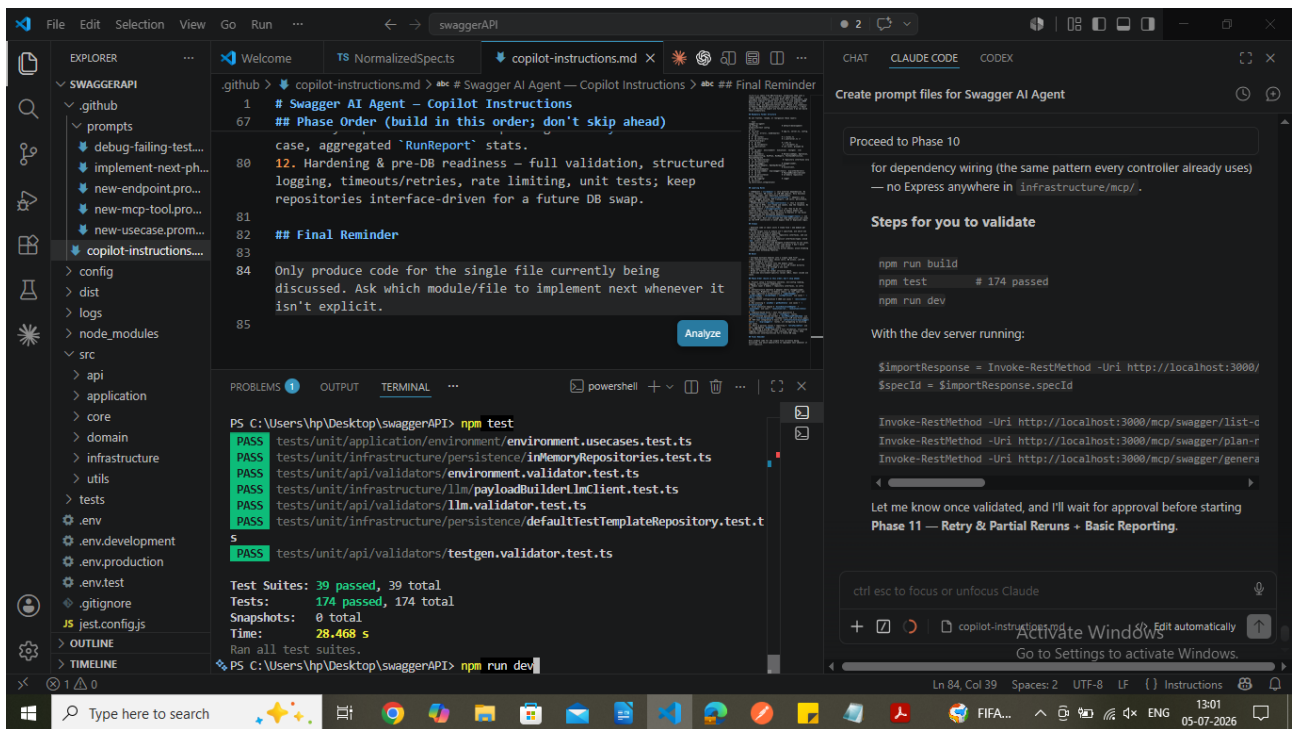

validating Phase 10

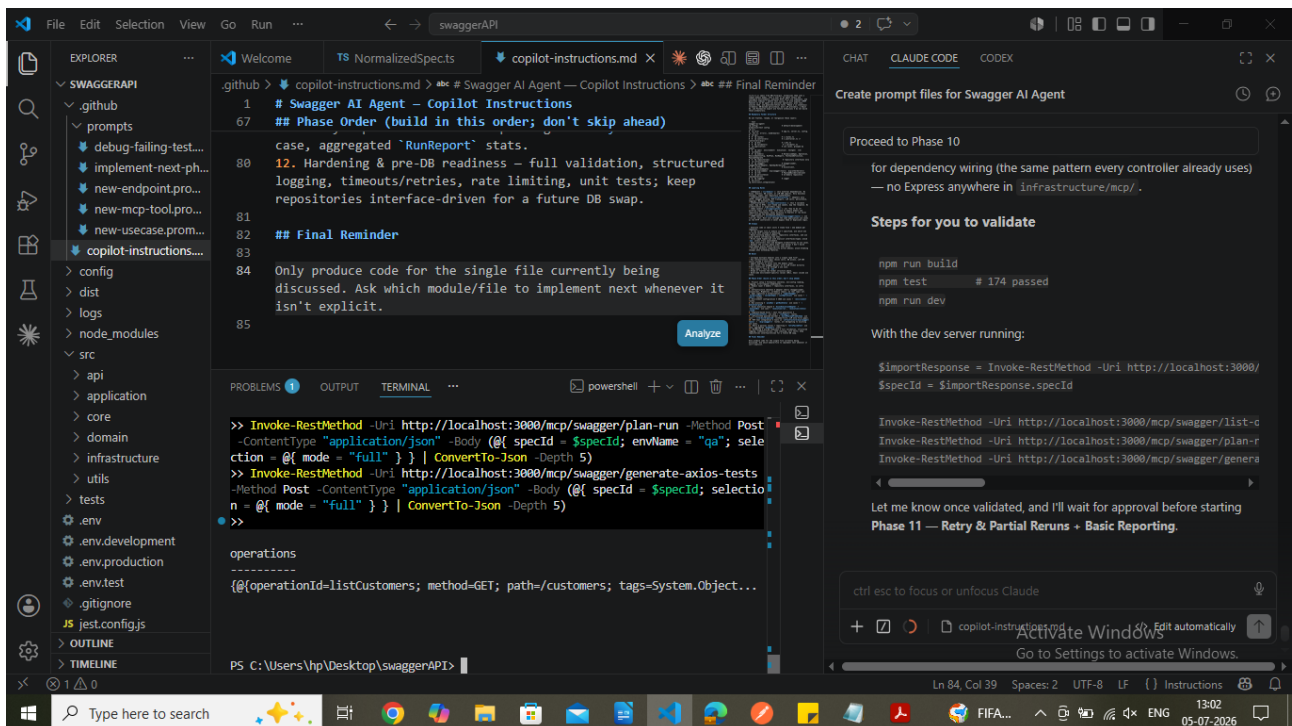

npm test

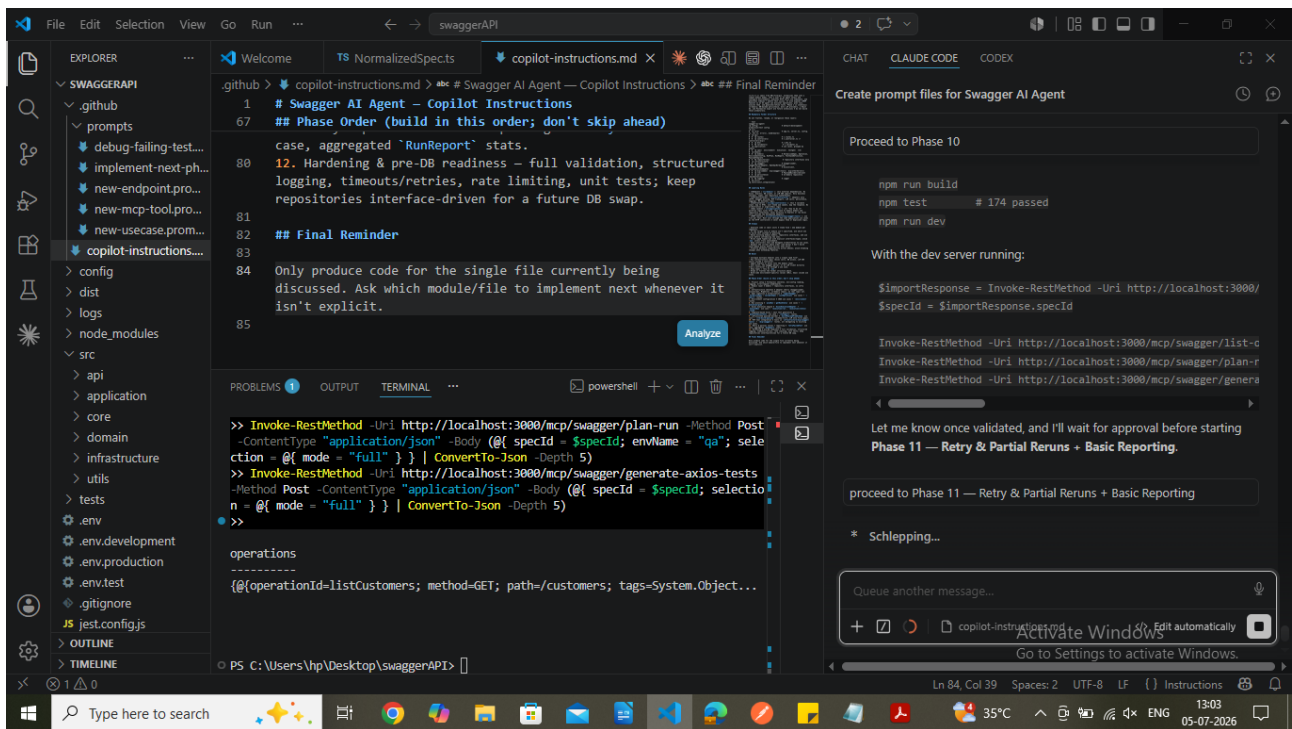

run npm run dev

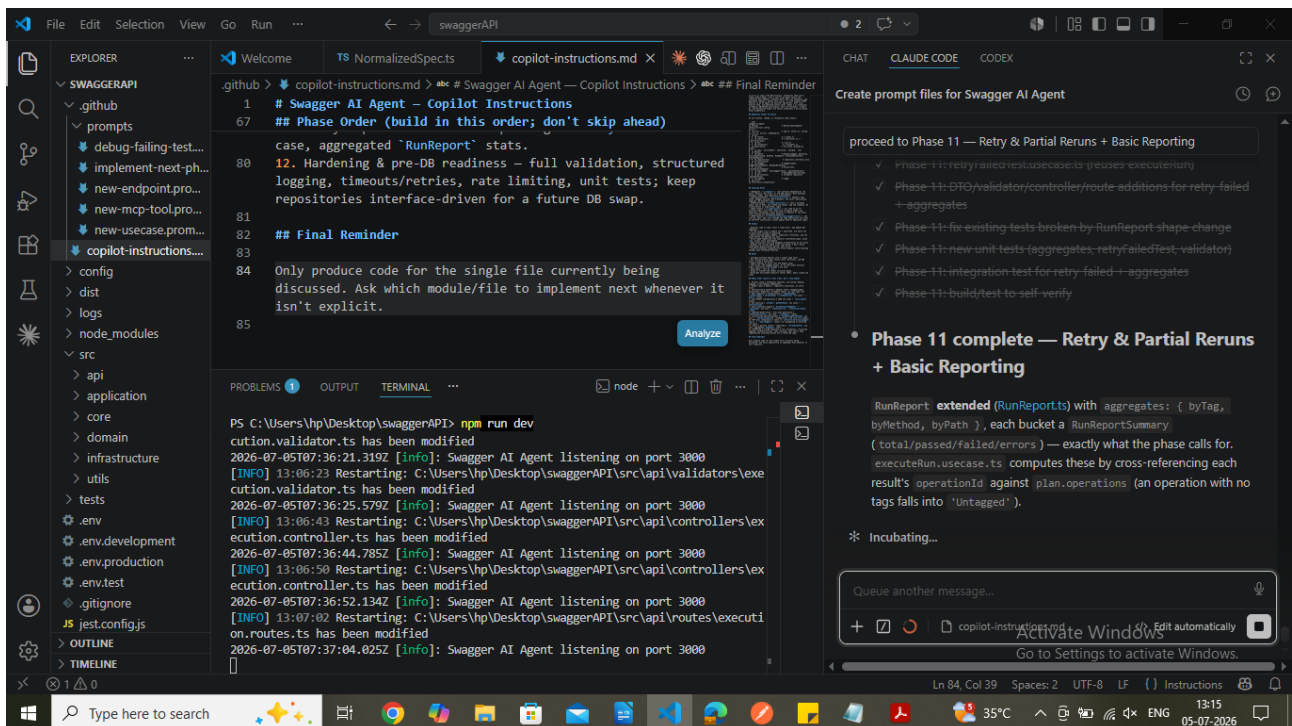

paste command in another terminal

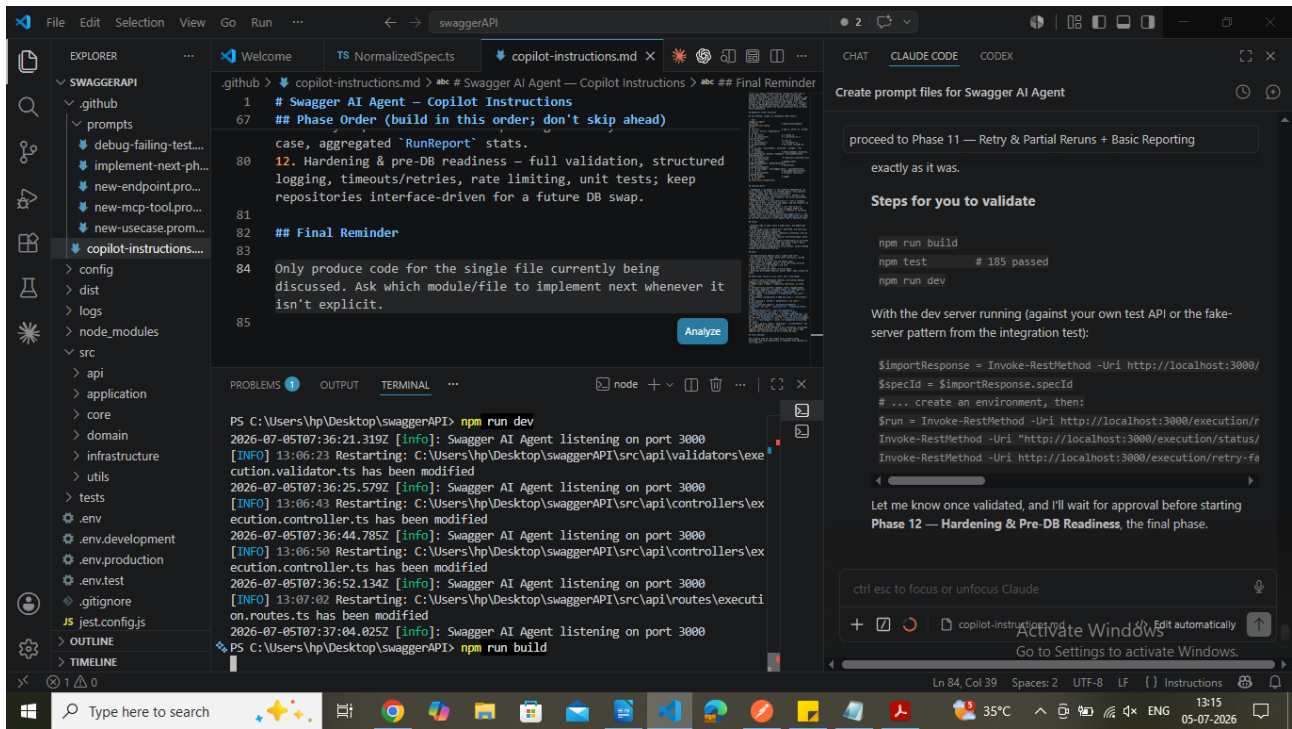

proceed to implement Phase 11 — Retry & Partial Reruns + Basic Reporting

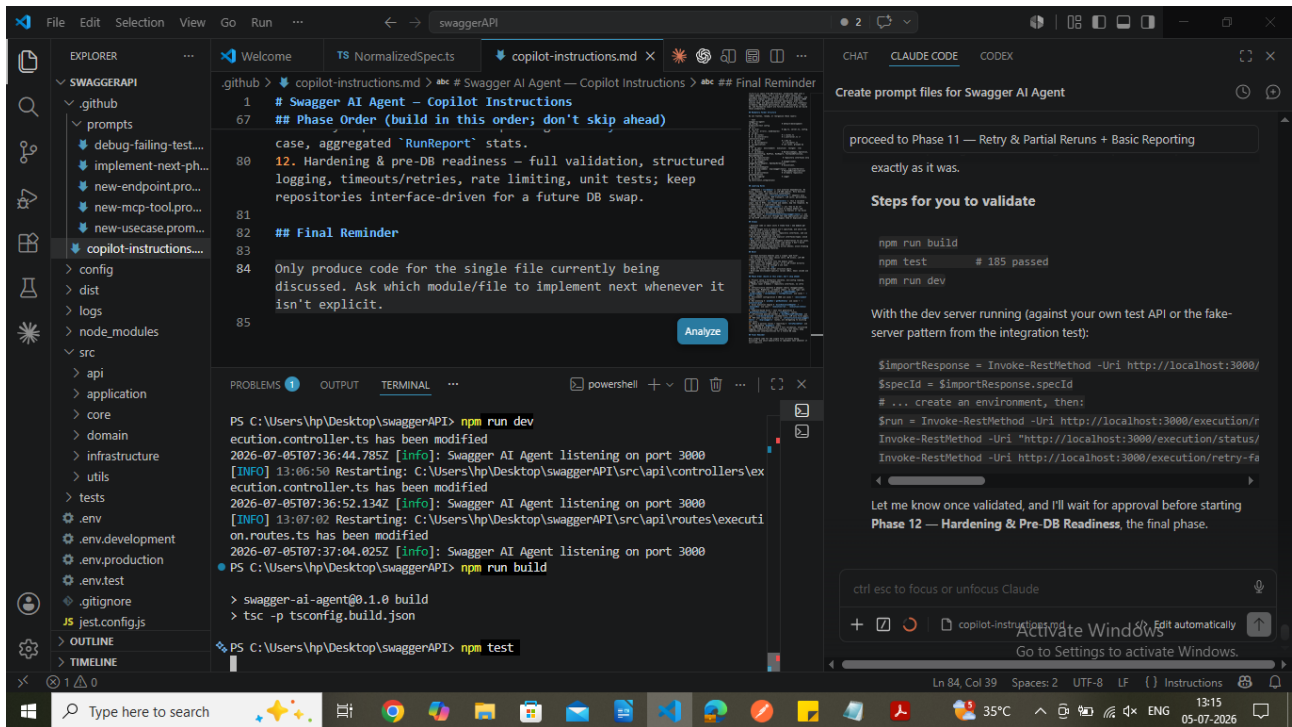

implementation done for Phase 11

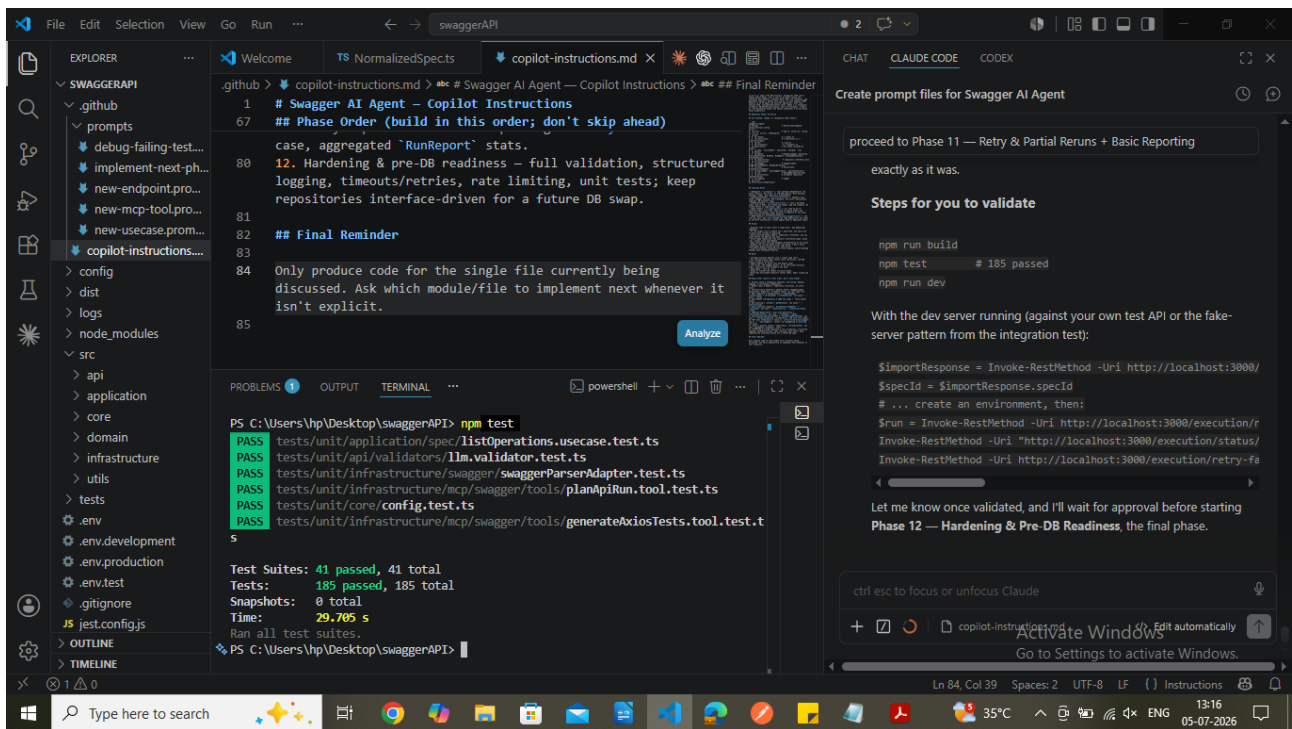

validating Phase 11

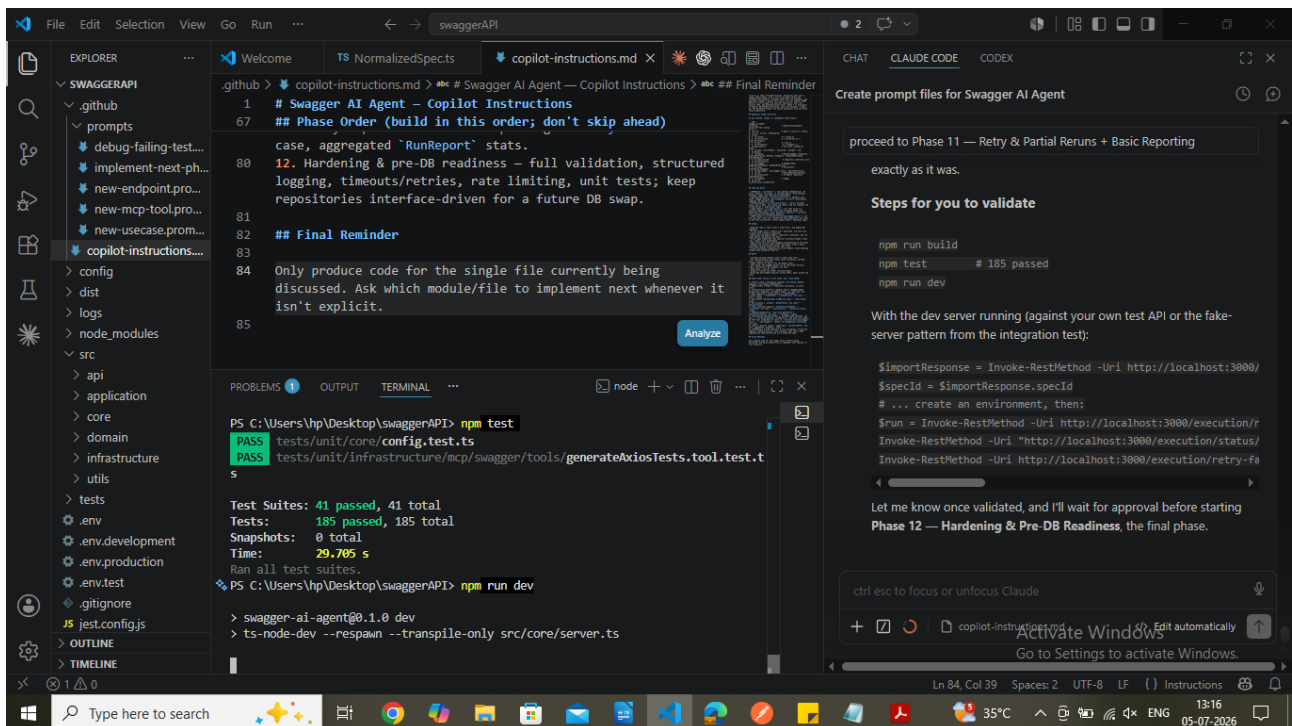

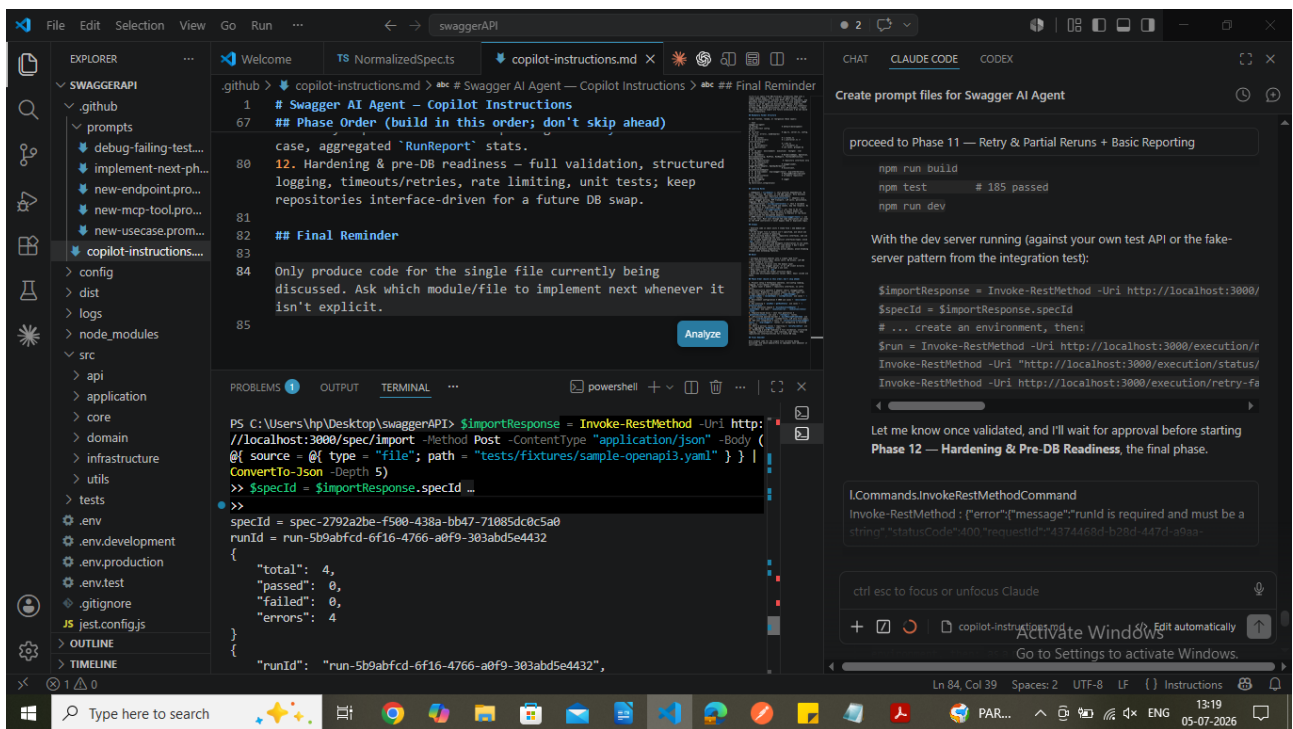

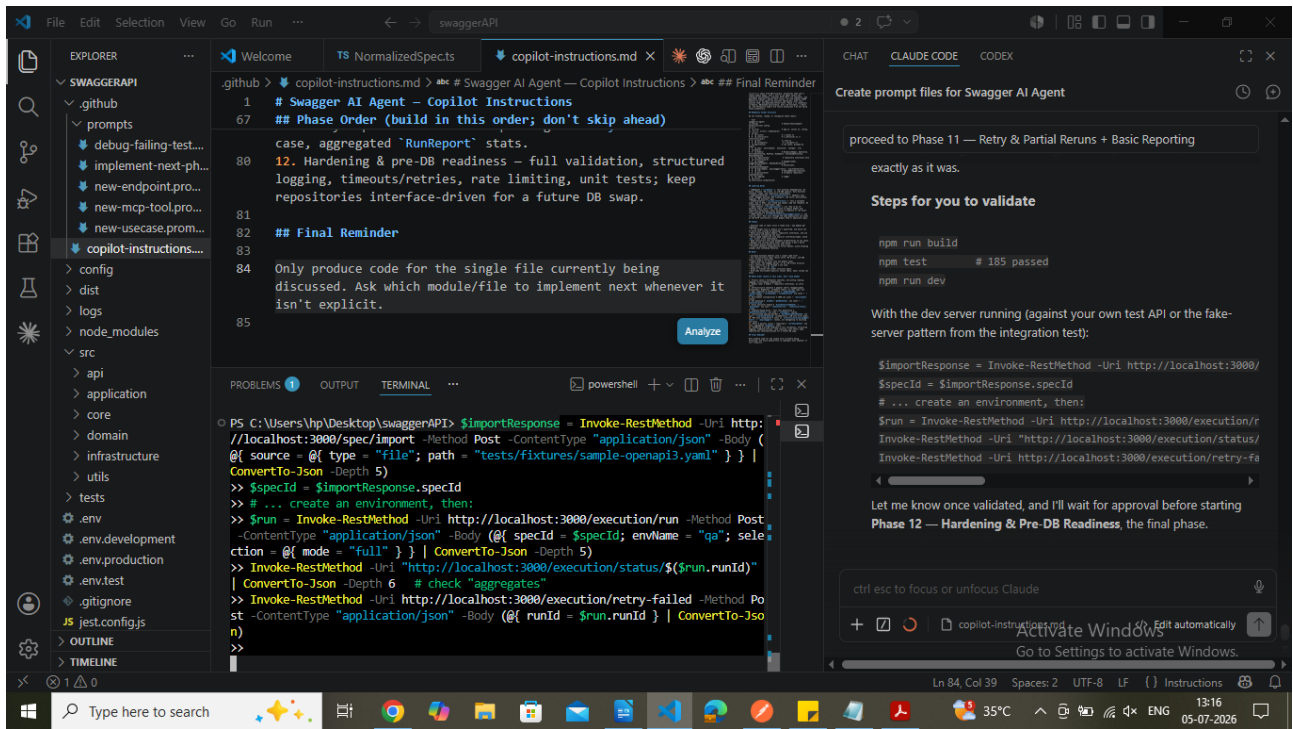

npm test

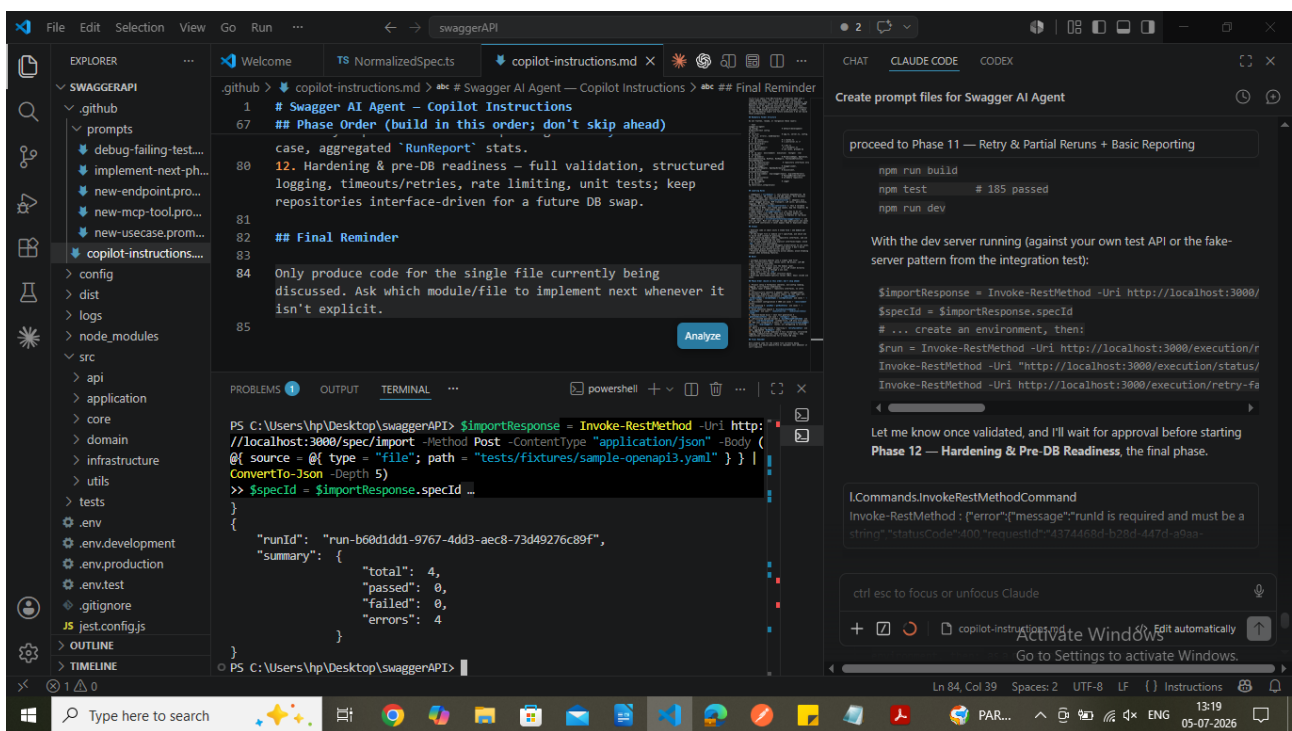

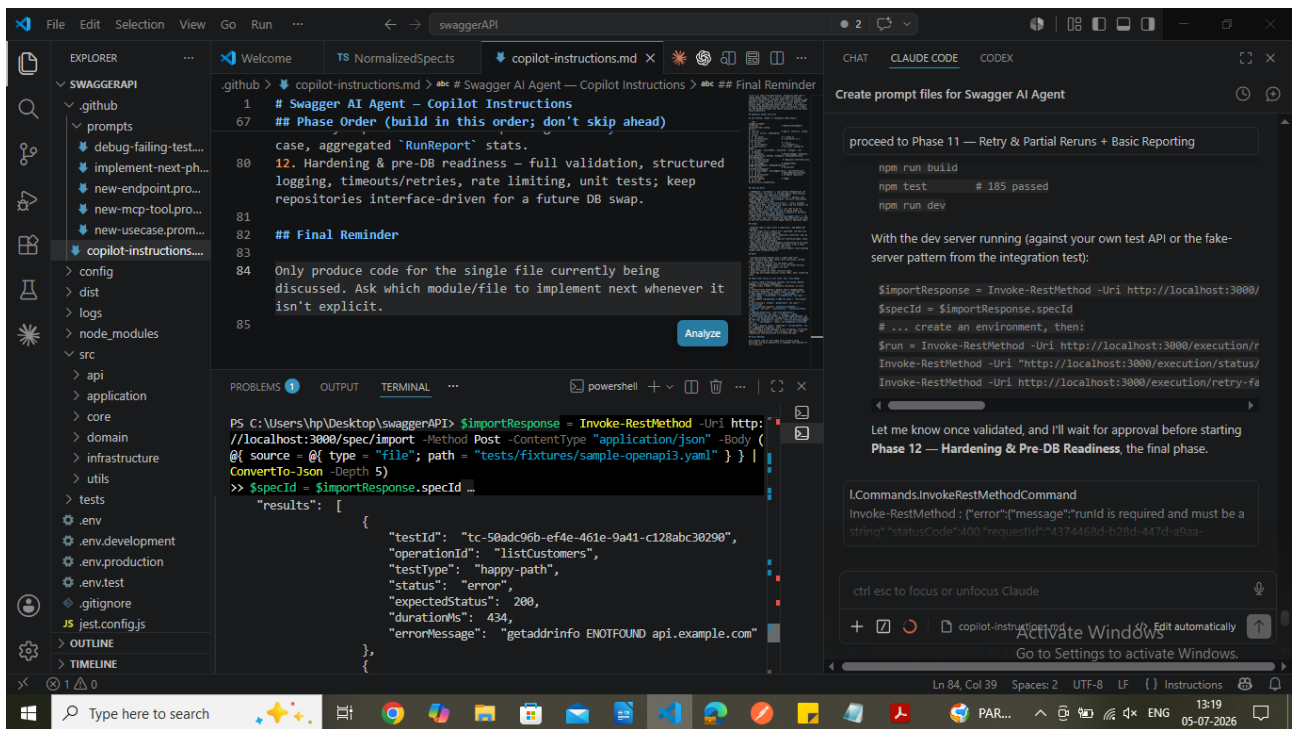

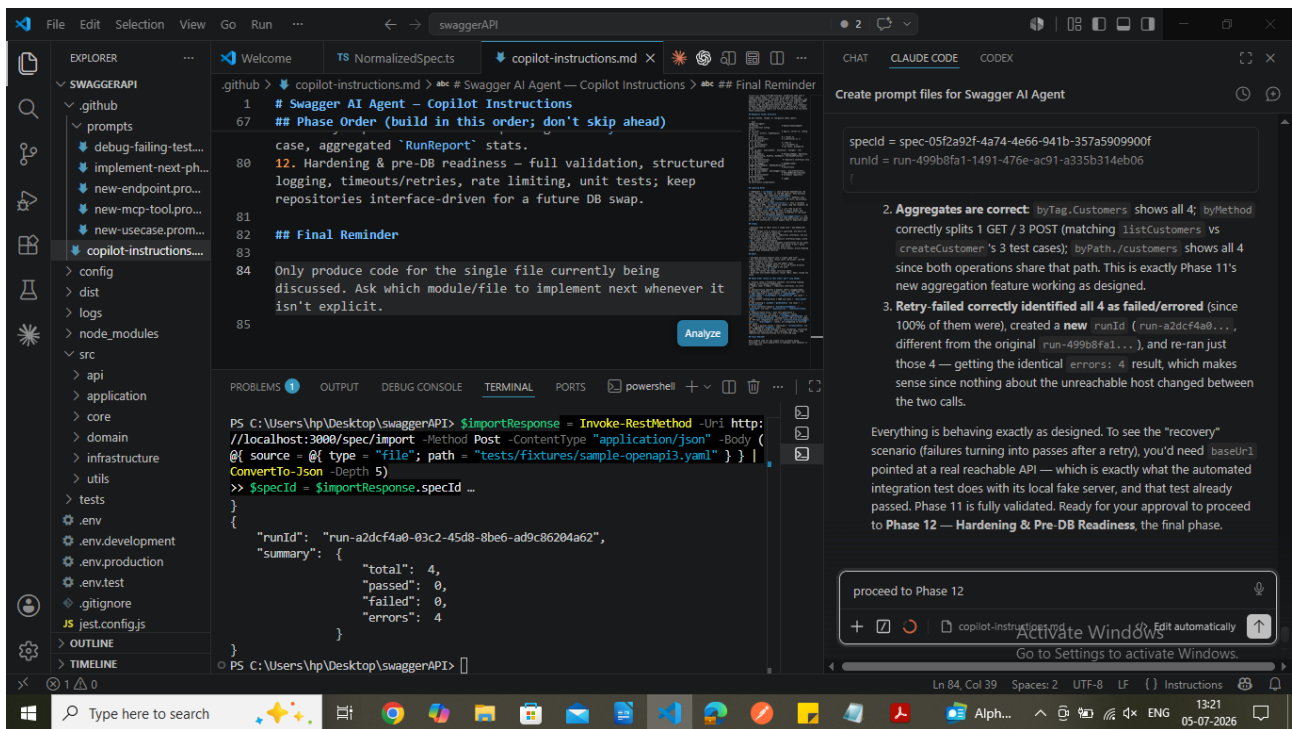

run npm run dev and command in another terminal

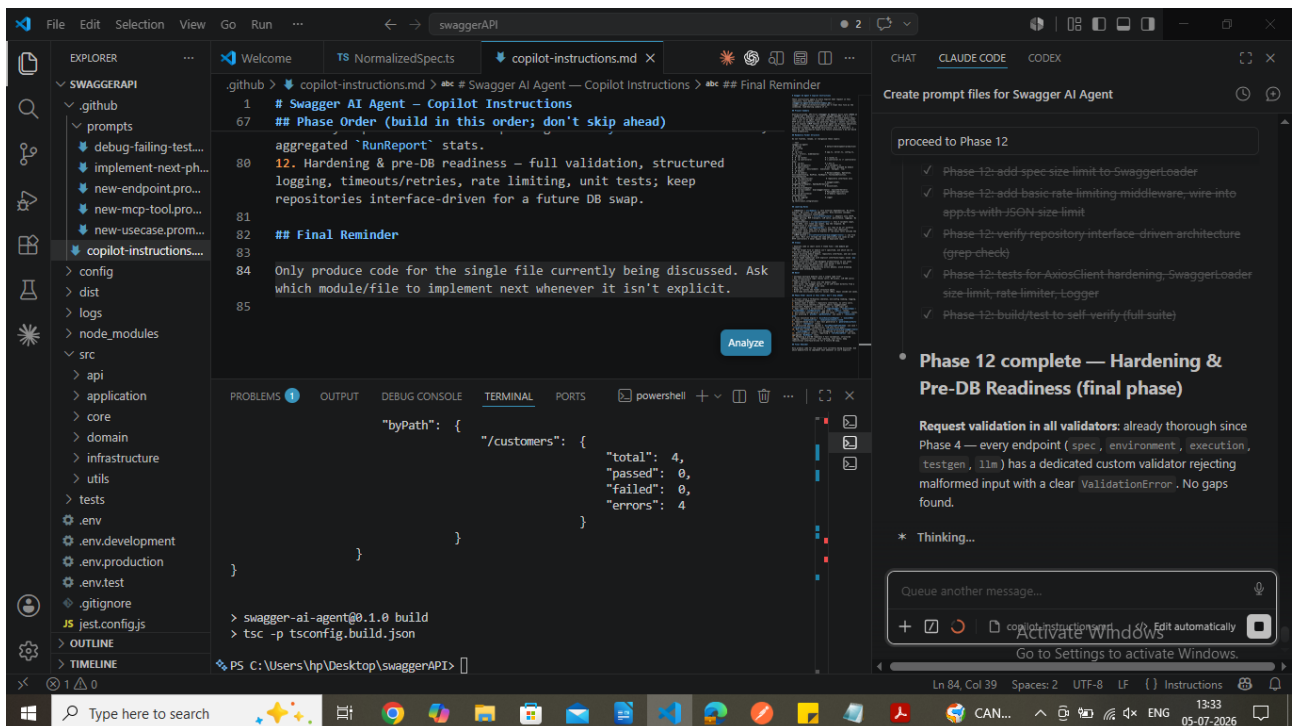

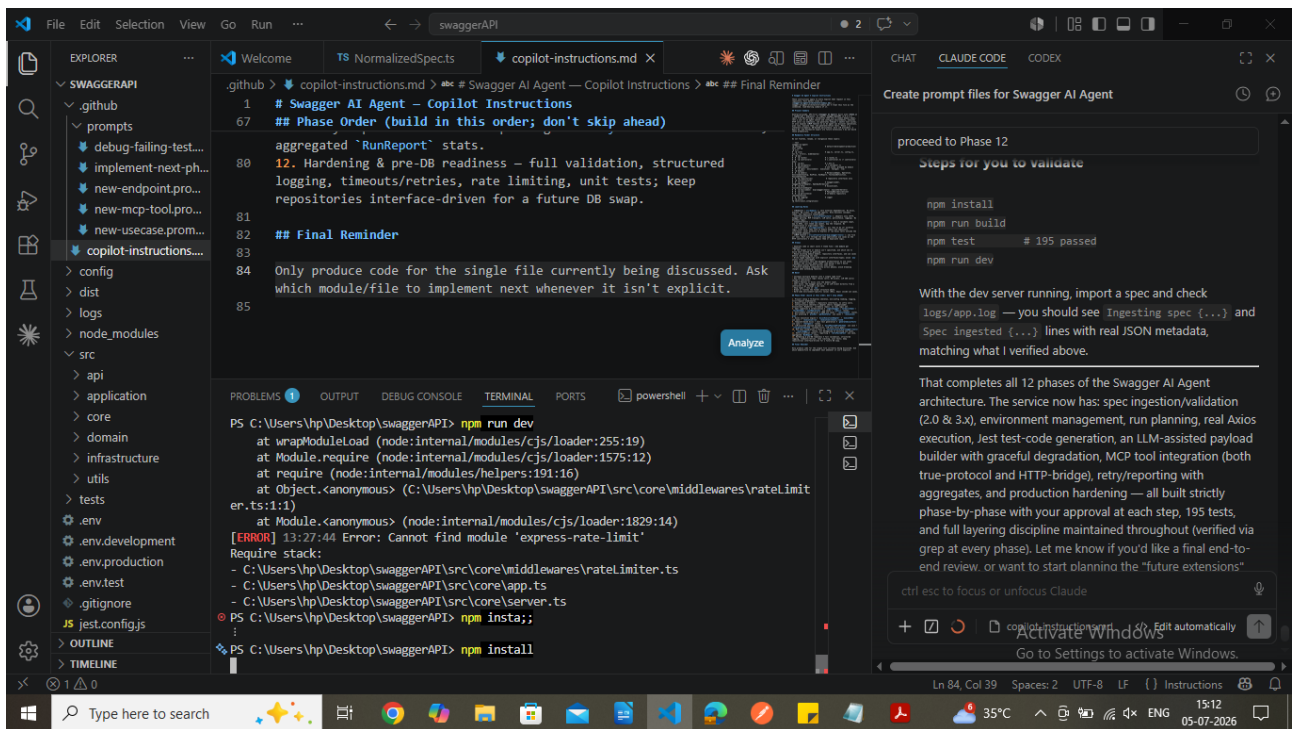

proceed to Phase 12 — Hardening & Pre-DB Readiness

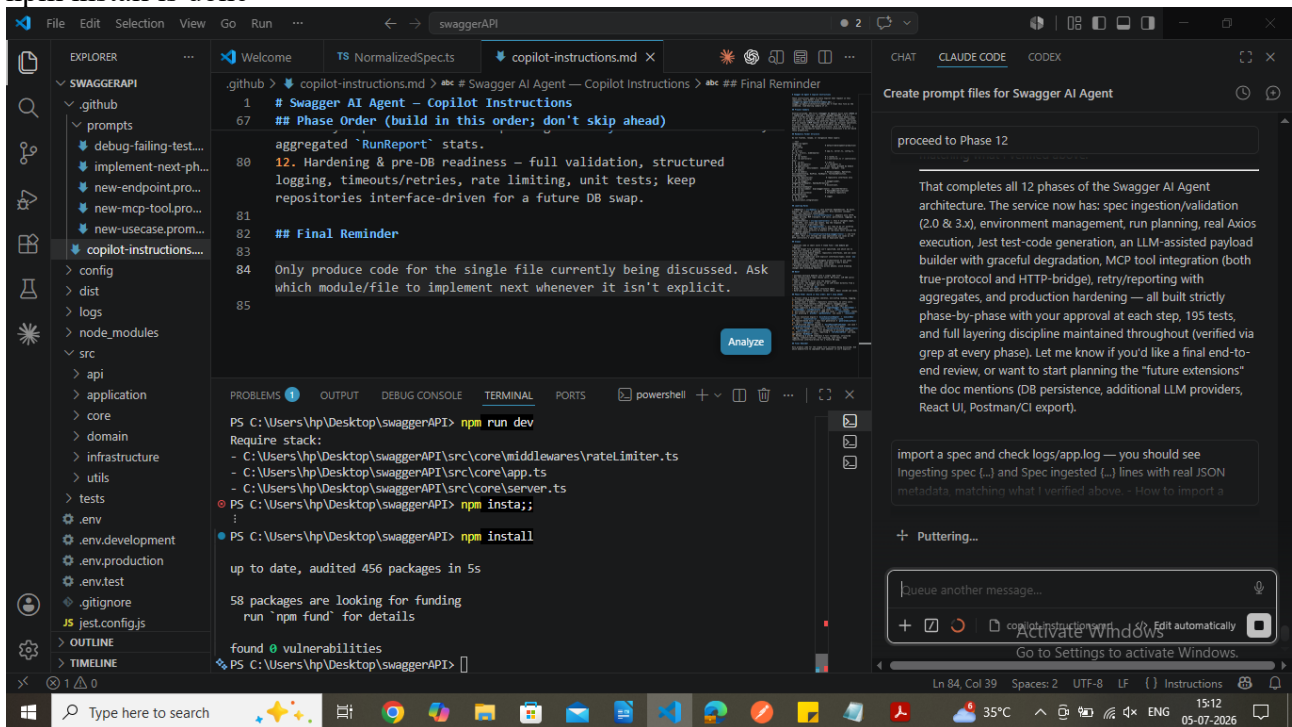

implementation done for Phase 12

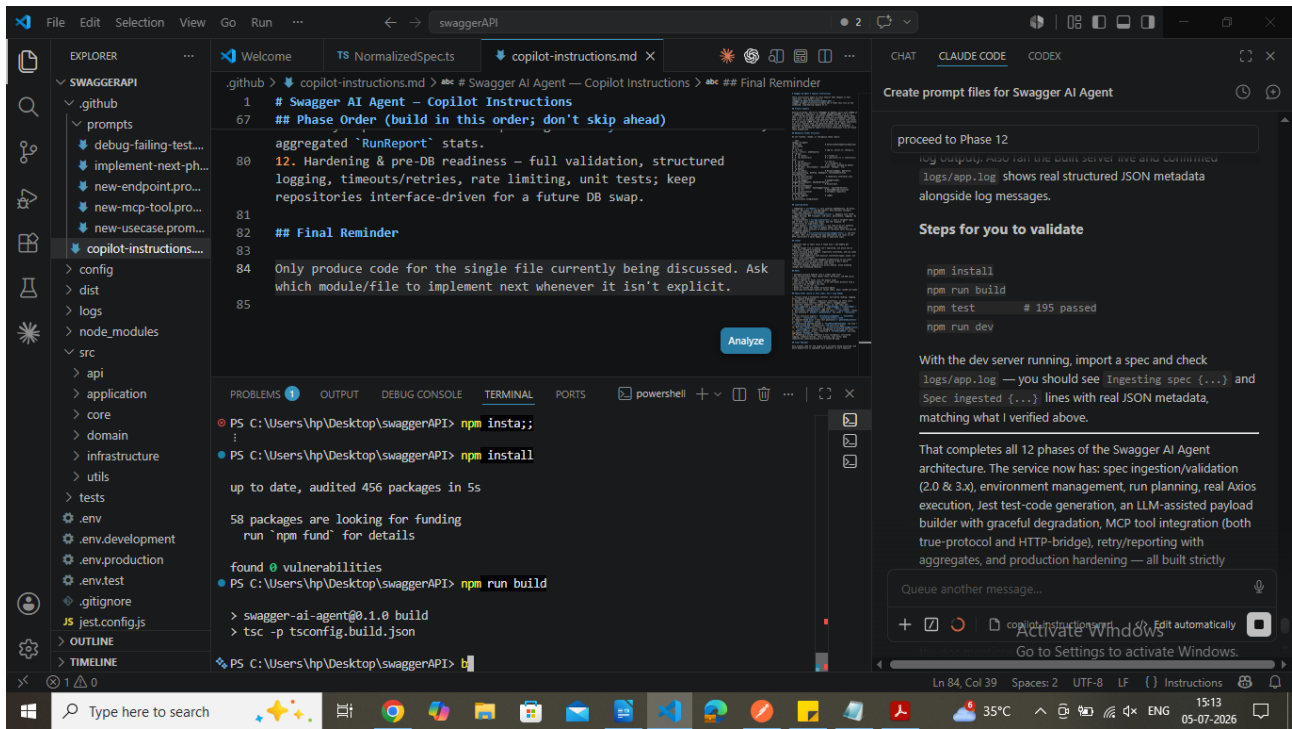

validating Phase 12

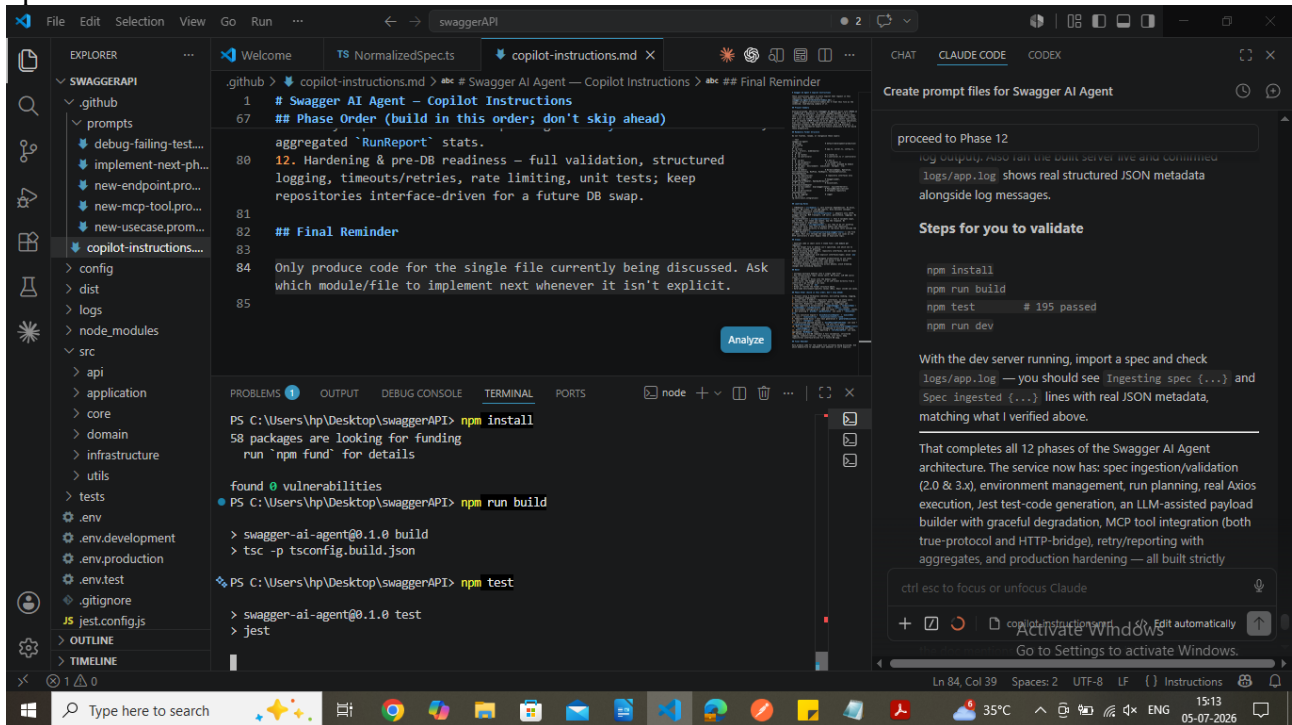

npm install is done

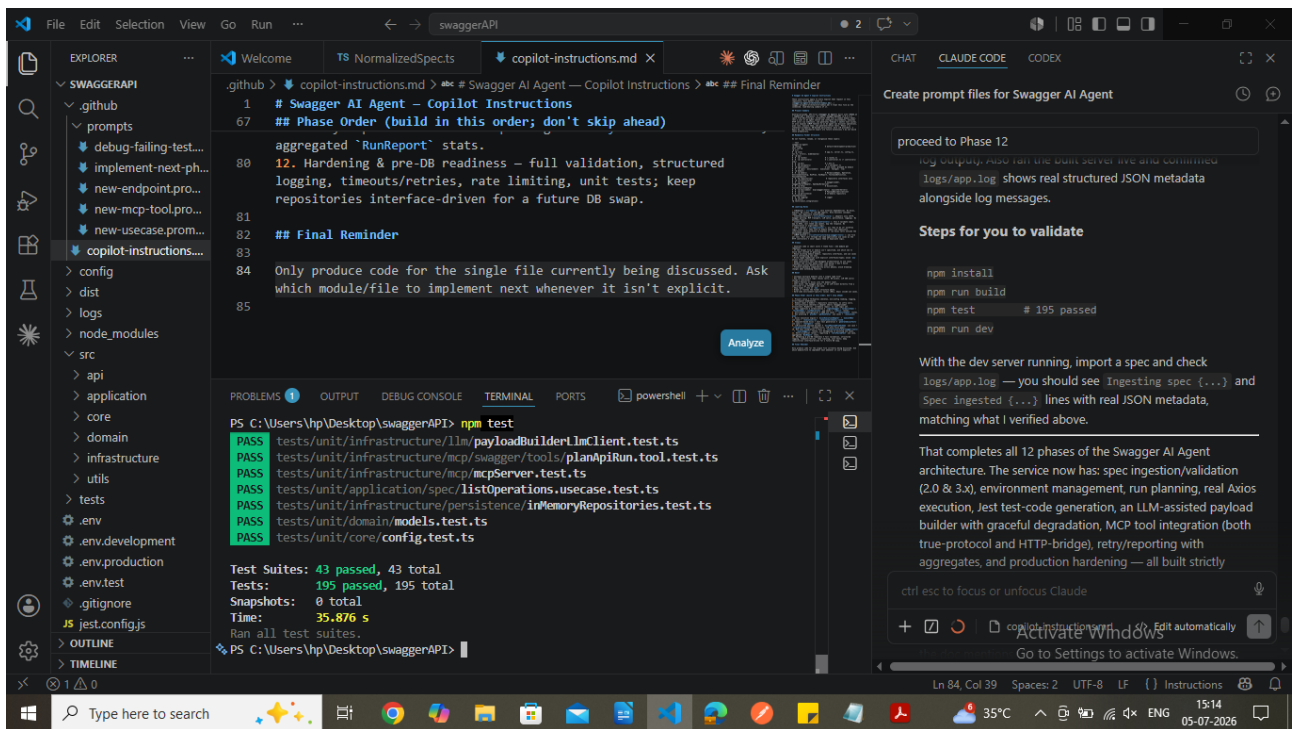

npm run build done

npm test

npm run dev
